

<b>Haberlea</b>	rhodopensis		Rosettes of soft hairy leaves and clusters of white shaded violet-blue flowers. Height 15cm. Moist well-drained soil in sun or shade. Apr.-Jun.
<b>Haberlea</b>	rhodopensis	"Virginalis"	Rosettes of soft hairy leaves and clusters of pure white flowers. Height 15cm. Moist well-drained soil in sun or shade. Apr.-Jun.
<b>Hacquetia</b>	epipactis		A clump-forming perennial with glossy bright green leaves and tiny yellow flowers surrounded by bright green bracts. Height 15cm. Moist well-drained soil in part shade. Feb.-Mar.
<b>Hacquetia</b>	epipactis	"Thor"	A clump-forming perennial with glossy bright green leaves edged white and tiny yellow flowers surrounded by variegated bracts. Height 15cm. Moist well-drained soil in part shade. Feb.-Mar.
<b>Hakenochloa</b>	macra		Low mounds of densely overlapping plain green leaves. Green flowers in autumn. Height 25cm. Moist well-drained soil in part shade.
<b>Hakonechloa</b>	macra	"Alboaurea"	Low mounds of densely overlapping leaves. Rich yellow with thin stripes of green occasional splashes of white on wiry red stems. Green flowers in autumn. Height 25cm. Moist well-drained soil in part shade.
<b>Hakonechloa</b>	macra	"Aureola"	Low mounds of rich yellow leaves with thin stripes of green on wiry red stems. Green flowers in autumn. Height 25cm. Well-drained soil in part shade. Aug.-Oct.
<b>Hakonechloa</b>	macra	"Naomi"	Low mounds of yellow-green leaves with thin cream stripes. Green flowers in autumn as the leaves take on purple tones. Height 20cm. Well-drained soil in sun or part shade. Aug.-Oct.
<b>Hakonechloa</b>	macra	"Nicolas"	Arching fans of densely overlapping leaves take on wonderful orange and red hues in autumn. Height 40cm. Well-drained soil in sun or part shade

<b>Halesia</b>	monticola var vestia		"Snowdrop Tree". A conical tree with mid-green leaves, downy when young, turning yellow in autumn. Clusters of pendent bell-shaped white flowers, tinged pink, just before the leaves, followed by four winged green fruit. Height and spread after 10 yrs. 2-3
<b>Hamamelis</b>	mollis	"Pallida"	A vase-shaped deciduous shrub with bright green leaves and large fragrant spider-like sulphur yellow flowers before the leaves in mid to late winter. Lovely autumn colour. Height 4m. Spread 4m. Moist well-drained soil in sun or part shade. January to Febr
<b>Hamamelis</b>	mollis	"Wisley Supreme"	A vase-shaped deciduous shrub with bright green leaves and large fragrant spider-like clear yellow flowers before the leaves in mid to late winter. Lovely autumn colour. Height 4m. Spread 4m. Moist well-drained soil in sun or part shade. Flowers from Janu
<b>Hamamelis</b>	x intermedia	"Arnold Promise"	A vase-shaped deciduous shrub with bright green leaves and large fragrant spider-like yellow flowers before the leaves in early to mid winter. Height 4m. Spread 4m. Moist well-drained soil in sun or part shade. December to January.
<b>Hamamelis</b>	x intermedia	"Diane"	A vase-shaped deciduous shrub with bright green leaves with good autumn colour. Large fragrant spider-like red flowers before the leaves. in early to mid winter. Ultimate height and spread 4m. Moist well-drained soil in sun or part shade. Flowers from Dec
<b>Hamamelis</b>	x intermedia	"Gingerbread"	A vase-shaped deciduous shrub with bright green leaves and large fragrant spider-like golden orange flowers with a reddish base before the leaves. Height and spread 4m. Moist well-drained soil in sun or part shade. December to January.
<b>Hamamelis</b>	x intermedia	"Jalena"	A vase-shaped deciduous shrub with bright green leaves with good autumn colour. Large fragrant spider-like coppery orange flowers

			before the leaves. in early to mid winter. Ultimate height and spread 4m. Moist well-drained soil in sun or part shade. Flow
<b>Hamamelis</b>	x intermedia	"Livia"	A vase-shaped deciduous shrub with bright green leaves and large fragrant spider-like carmine-red flowers before the leaves. Height and spread 4m. Moist well-drained soil in sun or part shade. December to January.
<b>Hamamelis</b>	x intermedia	"Orange Peel"	A vase-shaped deciduous shrub with bright green leaves and large fragrant spider-like clear orange-yellow flowers before the leaves. Height and spread 4m. Moist well-drained soil in sun or part shade. December to January.
<b>Hamamelis</b>	x intermedia	"Primavera"	A vase-shaped deciduous shrub with bright green leaves with good autumn colour. Spider-like bright yellow flowers tinged purple-red at the base, before the leaves. in early to mid winter. Ultimate height and spread 4m. Moist well-drained soil in sun or p
<b>Hamamelis</b>	x intermedia	"Robert"	A vase-shaped deciduous shrub with bright green leaves and large fragrant spider-like reddish coppery-orange flowers before the leaves. Excellent autumn colour. Height and spread 4m. Moist well-drained soil in sun or part shade. December to January. Disli
<b>Hamamelis</b>	x intermedia	"Ruby Glow"	An upright deciduous shrub with bright green leaves and large spider-like dull red flowers before the leaves in mid to late winter. Red autumn colour. Height 4m. Spread 4m. Moist well-drained soil in sun or part shade. January to February.
<b>Hebe</b>		"Autumn Glory"	An open evergreen bush with rounded green leaves with a slight red edge. Small panicles of rich violet flowers from leaf axils. Height 60cm. Spread 90cm. Moist well-drained soil in sun or part shade. Flowers from July to October.

<b>Hebe</b>	"Baby Marie"	An evergreen shrub with small green leaves and pale lilac flowers smothering the plant. Height 30-40cm. Moist well-drained soil in sun or part shade. May-Jun.
<b>Hebe</b>	"Blue Clouds"	An evergreen shrub with glossy, dark green leaves, purple tinted in winter. Long spikes of purple-blue flowers. Height 60-120cm. Moist well-drained soil in sun or part shade. Jun.-Aug.
<b>Hebe</b>	"Champion"	An evergreen shrub with small rounded deep green leaves, turning purple in winter. Terminal clusters of purple flowers. Height and spread 1m. Moist well-drained soil in sun or part shade. Flowers from May to July, and sometimes again in late autumn-early
<b>Hebe</b>	"County Park"	A low-growing, ground cover shrub with small, greyish-green spear-shaped, leaves and small spikes of violet flowers. Height 15cm. Spread 60cm. Moist well-drained soil in sun or part shade. Jun.-Jul.
<b>Hebe</b>	"Emerald Green"	An evergreen shrub making an almost perfect mound of green leaves and spikes of white flowers. Grown mainly for foliage. Height 45cm. Moist well-drained soil in sun or part shade. Jun.-Aug.
<b>Hebe</b>	"Nicola's Blush"	A small hebe with glossy green pointed leaves and small panicles of white flowers shading to pink. Height and spread 1m. Moist well-drained soil in sun or part shade. Protect from cold winds. May-Jun. and again in autumn if weather favourable.
<b>Hebe</b>	"Red Edge"	A spreading evergreen shrub with grey-green leaves, narrowly margined and veined red when young. Spikes of lilac-blue flowers fading to white in summer. Height 45cm. Spread 60cm. Moist well-drained soil in sun or part shade. Flowers from June to August.
<b>Hebe</b>	armstrongii	A compact shrub with arching whipcord bright yellow leaves and

			occasionally pretty small white flowers. Height 60cm. Moist well-drained soil in sun or part shade. May-Jun.
<b>Hebe</b>	cupressoides	"Boughton Dome"	An evergreen dwarf shrub with small green leaves congested around the stems. It does not appear to flower. Height 45cm. Moist well-drained soil in sun or part shade. Flowers from May to June.
<b>Hebe</b>	diosmifolia	"Celina"	A small evergreen shrub with slender dark green leaves and clusters of pale mauve flowers that fade to white. Height 20-30cm. Spread 30-45cm. Moist well-drained soil in sun or part shade. Flowers from May to June.
<b>Hebe</b>	ochracea	"James Stirling"	An attractive evergreen, compact, arching, whipcord shrub with rich ochre-yellow leaves and pretty small white flowers. Height 45cm. Spread 60cm. Moist well-drained soil in sun or part shade. Flowers from May to June.
<b>Hebe</b>	pinguifolia	"Pagei"	A spreading shrub with leathery blue-green leaves on purple stems and small clusters of white flowers. Height 30cm. Moist well-drained soil in sun or part shade. May-Jun.
<b>Hebe</b>	pinguifolia	"Sutherlandii"	A compact, evergreen rounded dwarf shrub with leathery glaucous green leaves on purple stems and small clusters of white flowers. Height 20cm. Spread 40cm. Moist well-drained soil in sun or part shade. Flowers from May to June.
<b>Hebe</b>	vernica		A compact, evergreen, rounded shrub with glossy dark green leaves and pale lilac-blue flowers fading to white. Height 60cm. Moist well-drained soil in sun or part shade. Jun.-Jul. Shelter from cold drying winds.
<b>Helenium</b>		"Biedermeier"	An upright herbaceous perennial producing rich yellow flowers with a deep red surrounding band and yellow-brown centres. Height 90cm. Moist well-drained soil in

sun. July to Sept.

<b>Helenium</b>	"Butterpat"	An upright herbaceous perennial producing rich yellow flowers with yellow-brown centres. Height 90cm. Moist well-drained soil in sun. July to Sept.
<b>Helenium</b>	"Chelsey"	An upright perennial with red flowers flecked randomly with yellow. Height 80cm. Moist well-drained soil in sun or part shade. Jul.-Aug.
<b>Helenium</b>	"Double Trouble"	A new variety of this upright perennial with stiff stems carrying double sunny yellow flowers. Height 80cm. Moist well-drained soil in sun or part shade. Jul.-Sep.
<b>Helenium</b>	"Dunkelpracht"	An upright perennial with deep red flowers fading to brown. Height 75cm. Moist well-drained soil in sun or part shade. Jul.-Sep.
<b>Helenium</b>	"Fatamorgana"	A clump forming perennial with upright stems carrying reflexed golden yellow daisy flowers flecked red-brown. Height 90cm. Moist well-drained soil in sun. Jul-Aug.
<b>Helenium</b>	"Goldrausch"	An upright herbaceous perennial producing rich golden-yellow flowers with green centres. Height 1.2m. Moist well-drained soil in sun. July to Sept.
<b>Helenium</b>	"Indianersommer"	A clump forming perennial with upright stems carrying brick-red daisy flowers with a yellow-brown boss. Height 1.1m. Moist well-drained soil in sun. Aug-Sept.
<b>Helenium</b>	"Kanaria"	A clump forming perennial with upright stems carrying yellow daisy flowers with a yellow-brown boss. Height 1.2m. Moist well-drained soil in sun. Aug-Sept.
<b>Helenium</b>	"Mardi Gras"	An upright late-flowering perennial producing yellow flowers, liberally splashed with orange-red and dark brown centres. Height 90cm. Moist well-drained soil in sun. Jun.-Aug.
<b>Helenium</b>	"Moerheim Beauty"	An upright late-flowering perennial producing copper-red

		flowers with dark brown centres. Height 90cm. Moist well-drained soil in sun. Jun.-Aug.
<b>Helenium</b>	"Pipsqueak"	A dwarf variety of this clump forming perennial with upright stems carrying reflexed yellow daisy flowers. Height 45cm. Moist well-drained soil in sun. Jul-Aug.
<b>Helenium</b>	"Red Jewel"	A late-flowering clump-forming, upright perennial with pinky-red daisy flowers with a hint of yellow at the tips, and a mahogany centre. Height 85cm. Moist well-drained soil in sun. Jul.-Sep.
<b>Helenium</b>	"Riverton Beauty"	A late-flowering clump-forming, upright perennial with yellow flowers and a brownish-yellow centre. Height 1.2m. Moist well-drained soil in sun. Aug.-Oct.
<b>Helenium</b>	"Riverton Gem"	A late-flowering clump-forming, upright perennial with flowers of burnt orange-red shades. Height 1.2m. Moist well-drained soil in sun. Aug.-Oct.
<b>Helenium</b>	"Rubinzweg"	A late-flowering clump-forming, upright perennial with flowers of burnt-red petals with a brownish-yellow centre. Height 1m. Moist well-drained soil in sun. Jul.-Sep.
<b>Helenium</b>	"Ruby Tuesday"	A dwarf form of this upright late-flowering perennial producing masses of dark red flowers. Height 50cm. Moist well-drained soil in sun. Jul.-Sep. Can be grown in pots.
<b>Helenium</b>	"Sahin's Early Flowerer"	An upright late flowering perennial with orange flowers streaked dull red. Height 1m. Moist well-drained soil in sun. Jul.-Sep.
<b>Helenium</b>	"The Bishop"	An upright herbaceous perennial with light green leaves producing yellow flowers with a brown centre. Height 60cm. Moist well-drained soil in sun. Jun.-Sept.
<b>Helenium</b>	"Waldtraut"	An upright late-flowering perennial producing golden yellow flowers with a brown centre. Height 80-100cm. Moist well-drained soil in sun. Aug.-Sep.

<b>Helenium</b>	"Wesergold"	A clump forming perennial with upright stems carrying light yellow daisy flowers with a brown boss. Height 1m. Moist well-drained soil in sun. Aug-Sept.
<b>Helenium</b>	"Wyndley"	A late-flowering perennial with yellow flowers overlaid with dark orange and a orange-brown centre. Height 80cm. Moist well-drained soil in sun.Jul.-Sep.
<b>Helianthemum</b>	"Amy Baring"	A spreading evergreen sub-shrub with dark green leaves and flat saucer-shaped, pure yellow flowers. Height 10cm.Well-drained soil in sun. Apr.-Sept.
<b>Helianthemum</b>	"Annabel"	A spreading evergreen perennial with double, soft pink flowers. Height 15cm. May-Jul. Full sun in well-drained soil. Prune after flowering.
<b>Helianthemum</b>	"Beech Park Red"	A spreading evergreen sub-shrub with greyish-green leaves and saucer-shaped, red flowers with yellow stamens. Height 15cm. Well-drained soil in sun. Apr.-Sept.
<b>Helianthemum</b>	"Ben Afflick"	A spreading evergreen sub-shrub with dark green leaves and rounded saucer-shaped, orange flowers with a dark eye. Height 10cm.Well-drained soil in sun. Apr.-Sept.
<b>Helianthemum</b>	"Ben Dearg"	A spreading evergreen sub-shrub with dark green leaves and saucer-shaped, orange-red flowers with a dark eye. Height 10cm.Well-drained soil in sun. Apr.-Sept.
<b>Helianthemum</b>	"Ben Fhada"	A spreading shrub with deep yellow flowers with an orange eye. Height 10cm. Well-drained soil in sun. Apr.-Sep.
<b>Helianthemum</b>	"Ben Heckla"	A spreading evergreen perennial with large copper orange flowers with a deep red rounded eye.. Height 15cm. May-Jul. Full sun in well-drained soil. Prune after flowering.
<b>Helianthemum</b>	"Ben Hope"	A spreading shrub with downy, pale grey-green leaves and saucer-shaped, carmine-red flowers with

		deep orange centres. Height 20-30cm. Well-drained soil in sun. May-Jul.
<b>Helianthemum</b>	"Ben Ledi"	A spreading evergreen perennial with wine red flowers. Height 15cm. May-Jul. Full sun in well-drained soil. Prune after flowering.
<b>Helianthemum</b>	"Ben More"	Deep green glossy leaves and saucer-shaped, deep orange flowers, on a spreading plant. Height 8cm. Well-drained soil in sun. Apr.-Sep. Trim after flowering.
<b>Helianthemum</b>	"Ben Nevis"	A spreading shrub with dark green leaves and saucer-shaped, rich orange-yellow flowers with bronze-crimson centres. Height 20cm. Well-drained soil in sun. May-Jul.
<b>Helianthemum</b>	"Ben Vane"	Greyish green leaves and saucer-shaped, apricot-orange flowers with a dark eye, on a spreading plant. Height 8cm. Well-drained soil in sun. Apr.-Sep. Trim after flowering.
<b>Helianthemum</b>	"Boughton Double Primrose"	A spreading shrub with shiny deep-green leaves and double primrose-yellow flowers. Height 20-30cm. Well-drained soil in sun. May-Jul.
<b>Helianthemum</b>	"Cerise Queen"	An erect to spreading shrub with dark green leaves and double, deep cerise flowers. Height 15cm. Well-drained soil in sun. May to July. Prune after flowering.
<b>Helianthemum</b>	"Cheviot"	A spreading evergreen perennial with grey leaves and soft apricot flowers. Height 15cm. May-Jul. Full sun in well-drained soil. Prune after flowering.
<b>Helianthemum</b>	"Chocolate Blotch"	A spreading evergreen perennial with grey leaves and mid-orange flowers with a large dark orange-red centre. Height 15cm. May-Jul. Full sun in well-drained soil. Prune after flowering.
<b>Helianthemum</b>	"Fairy"	A spreading evergreen perennial with double yellow flowers. Height 15cm. May-Jul. Full sun in well-drained soil. Prune after

flowering.

<b>Helianthemum</b>	"Fireball"	A spreading evergreen perennial with red double flowers. Height 15cm. Well-drained soil in sun. May-Jun. Prune after flowering.
<b>Helianthemum</b>	"Firedragon"	A spreading plant with greyish green leaves and saucer-shaped, orange scarlet flowers flushed yellow towards the centre. Height 20cm. Well-drained soil in sun. May-Jul.
<b>Helianthemum</b>	"Georgham"	A spreading evergreen perennial with huge dark pink flowers with a light centre. Height 15cm. May-Jul. Full sun in well-drained soil. Prune after flowering.
<b>Helianthemum</b>	"Golden Queen"	A spreading evergreen sub-shrub with dark green leaves and saucer-shaped, yellow flowers with orange marks at the petal bases. Height 20-30cm. Well-drained soil in sun. May-Jul.
<b>Helianthemum</b>	"Henfield Brilliant"	A spreading evergreen sub-shrub with grey-green leaves and saucer-shaped, deep orange flowers. Height 20-30cm. Well-drained soil in sun. May-July.
<b>Helianthemum</b>	"Highdown Apricot"	An evergreen sub-shrub with more upright growth than most rock roses. Light green foliage and deep apricot flowers suffused with a yellow eye. Height 20cm. Well-drained soil in sun. May-Jul. Prune after flowering.
<b>Helianthemum</b>	"Jeanie"	A spreading evergreen perennial with greyish-green leaves and double candy-pink flowers. Height 15cm. May-Jul. Full sun in well-drained soil. Prune after flowering.
<b>Helianthemum</b>	"Jubilee"	A spreading evergreen perennial with double yellow flowers. Height 15cm. May-Jul. Full sun in well-drained soil. Prune after flowering.
<b>Helianthemum</b>	"Kathleen Druce"	A spreading evergreen perennial with golden yellow semi-double flowers. Height 15cm. May-Jul. Full sun in well-drained soil. Prune after flowering.

<b>Helianthemum</b>	"Lawrenson's Pink"	A spreading evergreen perennial with small linear deep green leaves and rose-pink flowers. Height 15cm. May-Jul. Full sun in well-drained soil. Prune after flowering.
<b>Helianthemum</b>	"Mrs. C.W. Earle"	A spreading shrub with dark green leaves and double red flowers. Well-drained soil in sun. Height 20cm. May-Jul.
<b>Helianthemum</b>	"Raspberry Ripple"	A spreading plant with dark greyish green leaves and saucer-shaped, purplish pink flowers variably splashed white. Height 20cm. Well-drained soil in sun. May-Jul.
<b>Helianthemum</b>	"Rhodanthe Carneum"	A spreading evergreen perennial with clear pink flowers. Height 15cm. May-Jul. Full sun in well-drained soil. Prune after flowering.
<b>Helianthemum</b>	"Rose of Leeswood"	A spreading evergreen perennial with double mid-pink flowers. Height 15cm. May-Jul. Full sun in well-drained soil. Prune after flowering.
<b>Helianthemum</b>	"Salmon Queen"	A spreading shrub with and saucer-shaped, light salmon pink flowers, with a dark centre. Height 20cm. Well-drained soil in sun. May to July.
<b>Helianthemum</b>	"Shot Silk"	Deep green glossy leaves and saucer-shaped, wispy orange flowers, on a spreading plant. Height 8cm. Well-drained soil in sun. Apr.-Sep. Trim after flowering.
<b>Helianthemum</b>	"Southmead"	A spreading evergreen perennial with dark green leaves and rich orange flowers. Height 15cm. May-Jul. Full sun in well-drained soil. Prune after flowering.
<b>Helianthemum</b>	"St. John's College Yellow"	A spreading evergreen sub-shrub with grey-green leaves and saucer-shaped, almost pure yellow flowers. Height 20-30cm. Well-drained soil in sun. May-Jul.
<b>Helianthemum</b>	"Sudbury Gem"	A spreading evergreen perennial with grey-green leaves and cerise-pink flowers with a small orange eye. Height 20cm. Well-drained soil in sun. May-Jul.

<b>Helianthemum</b>		"Sulphur Moon"	A spreading evergreen perennial with grey-green leaves, often tinged yellow, particularly in spring and delicate pale yellow flowers. Height 15cm. May-Jul. Full sun in well-drained soil. Prune after flowering.
<b>Helianthemum</b>		"The Bride"	A spreading shrub with grey leaves and white flowers with yellow centres. Height 30cm. Well-drained soil in sun. May-Jul.
<b>Helianthemum</b>		"Tigrinum Plenum"	A spreading evergreen perennial with double orange flowers. Height 15cm. May-Jul. Full sun in well-drained soil. Prune after flowering.
<b>Helianthemum</b>		"Wisley Primrose"	A spreading shrub with grey-green leaves and pale primrose yellow flowers with a darker centre. Height 30cm. Well-drained soil in sun. May-Jul.
<b>Helianthemum</b>		"Wisley White"	A spreading shrub with grey leaves and white flowers with yellow centres. Height 30cm. Well-drained soil in sun. May-Jul.
<b>Helianthemum</b>	appeninum		A spreading sub-shrub with thin grey hairy leaves and smallish saucer-shaped white flowers with a central yellow blotch. Height 10-20cm. Well-drained soil in sun. May-Jun.
<b>Helianthemum</b>	croceum		A spreading evergreen with narrow grey foliage and white, yellow to apricot flowers. Height 20cm. Well-drained soil in full sun. May-Jul. Prune after flowering.
<b>Helianthemum</b>	lunulatum		An erect to spreading shrub with hairy grey-green leaves and saucer-shaped, clear yellow flowers with an orange base. Height 15cm. well-drained soil in sun. May to June.
<b>Helianthemum</b>	mumularium ssp. glabrum		A prostrate spreading shrub with shiny green leaves and saucer-shaped, bright yellow flowers. Height 5cm. Well-drained soil in sun May to July.
<b>Helianthus</b>		"Happy Days"	A perennial, non-invasive "sunflower" with upright stems

			carrying double, anemone-centred bright yellow flowers. Height 60cm. Moist well-drained soil in sun. Jul.-Sept.
<b>Helianthus</b>		"Miss Mellish"	A perennial "sunflower" with upright stems carrying double, dark yellow flowers. Height 1.8m. Moist well-drained soil in sun. Aug-Oct. Can be invasive.
<b>Helichrysum</b>		"County Park Silver"	A clump-forming prostrate evergreen alpine with thread-like silver leaves and small white flowers. Height 3cm. Well-drained soil in sun. Jun.-July.
<b>Heliopsis</b>	helianthoides	"Super Dwarf"	An upright perennial with deep green, ovate leaves and the stems topped with vibrant yellow daisy flowers. Height 40cm. Moist well-drained soil in sun. Jun.-Sept.
<b>Helleborus</b>	argutifolius		An evergreen perennial with grey-green, attractively veined leaves. Large clusters of bowl-shaped, pale apple-green flowers. Height 75cm. Moist well-drained soil in sun or part shade. Feb.-Apr..
<b>Helleborus</b>	foetidus		Clusters of bell-shaped, lime-green, purple margined flowers over dark green, divided leaves.. Height 80cm. Moist well-drained soil in sun or part shade. Jan.-Apr.
<b>Helleborus</b>	niger		"Christmas Rose". An evergreen perennial producing leathery dark green, divided leaves. Saucer-shaped white flowers ageing to pinkish white. Height 20-30cm. Moist well-drained soil in sun or shade. Jan.-Mar.
<b>Helleborus</b>	niger	"Harvington Double"	Leathery dark green, divided leaves and large saucer-shaped double white flowers. Height 30-40cm. Moist well-drained soil in sun or shade. Feb-Apr.
<b>Helleborus</b>	niger	"Harvington Hybrid"	A more vigorous form producing leathery dark green, divided leaves and large saucer-shaped white flowers ageing to pinkish white. Height 30-40cm. Moist well-drained soil in sun or shade. Jan.-Mar.

<b>Helleborus</b>	x ericsmithii	"Bob's Best"	Greyish-green divided leaves with relatively large pink-flushed white flowers tinged green. Height 40cm. Moist well-drained soil in sun or part shade. Mar.-May
<b>Helleborus</b>	x hybridus	"Lenten Rose"	An evergreen perennial producing leathery dark green, divided leaves. Large saucer-shaped flowers in shades from white to purple with or without spotting. Height 45cm. Effective in partly shaded site. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"Anemone Centred"	An evergreen perennial producing leathery dark green, divided leaves. Large saucer-shaped flowers in shades from white to purple, with a central ruff of petals. Height 45cm. Effective in partly shaded site. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"Double Spotted"	An evergreen perennial producing leathery dark green, divided leaves. Large saucer-shaped double, creamy white flowers variously spotted maroon within. Height 45cm. Moist well-drained soil in sun or part shade. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"Double Yellow"	"Lenten Rose". An evergreen perennial producing leathery dark green, divided leaves. Saucer-shaped double flowers in shades of yellow. Height 45cm. Effective in partly shaded site. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"Doubles"	An evergreen perennial producing leathery dark green, divided leaves. Double nodding flowers from white to purple, some fully double, others "anemone" centred. Height 45cm. Effective in partly shaded site. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"Green Shades"	"Lenten Rose". An evergreen perennial producing leathery dark green, divided leaves. Large saucer-shaped flowers in shades of greenish white or green, with or without spotting. Height 45cm. Effective in partly shaded site. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"Harvington Apricot"	"Lenten Rose". An evergreen perennial producing leathery dark

			green, divided leaves. Large saucer-shaped flowers, in pink and yellow suffused shades. Height 45cm. Effective in partly shaded site. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"Harvington Double Dark Purple"	"Lenten Rose". An evergreen perennial producing leathery dark green, divided leaves. Saucer-shaped double flowers in shades of purple. Height 45cm. Effective in partly shaded site. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"Harvington Double Pink Speckled"	"Lenten Rose". An evergreen perennial producing leathery dark green, divided leaves. Large saucer-shaped double pink flowers with varying degrees of darker speckling. Height 45cm. Effective in partly shaded site. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"Harvington Double Pink"	"Lenten Rose". An evergreen perennial producing leathery dark green, divided leaves. Saucer-shaped double flowers in shades of pink. Height 45cm. Effective in partly shaded site. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"Harvington Double Red"	"Lenten Rose". An evergreen perennial producing leathery dark green, divided leaves. Saucer-shaped double flowers in shades of red. Height 45cm. Effective in partly shaded site. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"Harvington Double Speckled"	An evergreen perennial producing leathery dark green, divided leaves. Large saucer-shaped double, creamy white flowers variously spotted maroon within. Height 45cm. Moist well-drained soil in sun or part shade. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"Harvington Double White"	"Lenten Rose". An evergreen perennial producing leathery dark green, divided leaves. Saucer-shaped white double flowers. Height 45cm. Effective in partly shaded site. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"Harvington Double Yellow"	"Lenten Rose". An evergreen perennial producing leathery dark green, divided leaves. Saucer-shaped double flowers in a good yellow. Height 45cm. Effective in partly shaded site. Jan.-Apr.

<b>Helleborus</b>	x hybridus	"Harvington Picotee"	"Lenten Rose". An evergreen perennial producing leathery dark green, divided leaves. Large saucer-shaped flowers, white with crimson veining and edging. Height 45cm. Effective in partly shaded site. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"Harvington Pink Speckled"	"Lenten Rose". An evergreen perennial producing leathery dark green, divided leaves. Large saucer-shaped pink flowers with varying degrees of darker speckling. Height 45cm. Effective in partly shaded site. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"Harvington Shades of Night"	"Lenten Rose". An evergreen perennial producing leathery dark green, divided leaves. Large saucer-shaped flowers in shades purple-black. Height 45cm. Effective in partly shaded site. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"Harvington Smokey Blue"	"Lenten Rose". An evergreen perennial producing leathery dark green, divided leaves. Large saucer-shaped flowers in shades purple with a bluish bloom. Height 45cm. Effective in partly shaded site. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"Harvington Speckled"	An evergreen perennial producing leathery dark green, divided leaves. Large saucer-shaped creamy white flowers variously spotted maroon within. Height 45cm. Moist well-drained soil in sun or part shade. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"Harvington White"	"Lenten Rose". An evergreen perennial producing leathery dark green, divided leaves. Strong stems carry large saucer-shaped white flowers. Height 40cm. Effective in partly shaded site. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"Harvington Yellow Speckled"	"Lenten Rose". An evergreen perennial producing leathery dark green, divided leaves. Large saucer-shaped yellow flowers, with varying degrees of red speckling. Height 45cm. Effective in partly shaded site. Jan.-Apr.

<b>Helleborus</b>	x hybridus	"Harvington Yellow"	"Lenten Rose". An evergreen perennial producing leathery dark green, divided leaves. Large saucer-shaped yellow flowers. Height 45cm. Effective in partly shaded site. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"Mrs. Betty Ranicar"	An evergreen perennial producing leathery dark green, divided leaves. Fully double pure white flowers on short stems. Height 40cm. Effective in partly shaded site. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"Picotee"	An evergreen perennial producing leathery dark green, divided leaves. Large saucer-shaped flowers white with crimson veining, with a darker backing. Height 45cm. Effective in partly shaded site. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"Red Shades"	"Lenten Rose". An evergreen perennial producing leathery dark green, divided leaves. Large saucer-shaped flowers in shades of red with varying degrees of other colours. Height 45cm. Effective in partly shaded site. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"Spotted"	An evergreen perennial producing leathery dark green, divided leaves. Large saucer-shaped creamy white flowers variously spotted maroon within. Height 45cm. Moist well-drained soil in sun or part shade. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"Tutu"	An evergreen perennial producing leathery dark green, divided leaves. An "anemone" centred hybrid with large saucer-shaped flowers pale pink flecked purple-pink, with a central ruff of petals. Height 45cm. Effective in partly shaded site. Jan.-Apr.
<b>Helleborus</b>	x hybridus	"White Lady"	"Lenten Rose". An evergreen perennial producing leathery dark green, divided leaves. Strong stems carry large saucer-shaped white flowers sometimes with a green tinge. Height 40cm. Effective in partly shaded site. Jan.-Apr.

<b>Helleborus</b>	x hybridus	"Yellow Lady"	"Lenten Rose". An evergreen perennial producing leathery dark green, divided leaves. Strong stems carry large saucer-shaped flowers ranging from cream to lemon-yellow sometimes with some spotting. Height 40cm. Effective in partly shaded site. Jan.-Apr.
<b>Heloniopsis</b>	orientalis		Clump forming perennial with green strap-like leaves and nodding rose-pink flowers in spring. Grow in moist soil in part shade. Height 30cm.
<b>Hemerocallis</b>		"All American Plum"	A clump-forming perennial with arching strap-like leaves and trumpets of large plum-purple flowers with a yellow-green throat. Height 75cm. Moist well-drained soil in sun or part shade. Flowers June. This new variety reblooms and also individual blooms la
<b>Hemerocallis</b>		"American Revolution"	A clump-forming semi-evergreen perennial with arching strap-like leaves and trumpets of mauve flowers edged buff with a purple throat. Height 60cm. Moist well-drained soil in sun or part shade. Flowers June. This variety reblooms.
<b>Hemerocallis</b>		"Arctic Snow"	A clump-forming perennial with arching strap-like leaves and trumpets of large ivory white flowers with a yellow-green throat. Height 60cm. Moist well-drained soil in sun or part shade.
<b>Hemerocallis</b>		"Awesome Blossom"	A clump-forming perennial with sword-shaped leaves and large rose flowers with a purple eye and a green throat. Height 60cm. Moist well-drained soil in sun or part shade. Flowers June. This variety reblooms.
<b>Hemerocallis</b>		"Black Magic"	A clump-forming perennial with handsome, sword-shaped arching leaves. Deep ruby-mahogany flowers with a yellow throat. Height 90cm. Moist well-drained soil in sun or part shade. Jun.-Aug.

<b>Hemerocallis</b>	"Blackberry Candy"	A clump-forming perennial with sword-shaped arching leaves. Round rich yellow flowers with a strong maroon-purple ring in the throat. Height 50cm. Moist well-drained soil in sun or part shade. Jun.-Aug.
<b>Hemerocallis</b>	"Bonanza"	A clump-forming perennial with handsome, sword-shaped arching leaves. Large light orange flowers with a brown throat. Height 75cm. Moist well-drained soil in sun or part shade. Jul.-Aug.
<b>Hemerocallis</b>	"Buffy's Doll"	A clump-forming perennial with strap-like leaves and trumpets of pink flowers with a rose-red eye zone and yellow throat. Height 30cm. Moist well-drained soil in sun or part shade. Reblooms.
<b>Hemerocallis</b>	"Cartwheels"	A clump-forming perennial with handsome, sword-shaped arching leaves. Large orange-gold flowers with a central white line. Height 75cm. Moist well-drained soil in sun. Jul.-Aug.
<b>Hemerocallis</b>	"Catherine Woodberry"	Slightly fragrant, light lavender-pink flowers with a wide green throat Height 75cm. Jul.-Aug. Best in full sun in fertile well-drained soil.
<b>Hemerocallis</b>	"Cathy's Sunset"	A clump-forming perennial with arching strap-like leaves and trumpets of yellow and terracotta petals. Height 60cm. Moist well-drained soil in sun or part shade.
<b>Hemerocallis</b>	"Chicago Royal Robe"	A clump-forming perennial with slightly fragrant deep purple flowers with a green throat. Height 60cm. Moist well-drained soil in sun or part shade. Jun.-Jul.
<b>Hemerocallis</b>	"Chicago Sunrise"	A clump-forming perennial with arching strap-like leaves and trumpets of deep orange-yellow flowers and a red blush in the throat. Height 60cm. Moist well-drained soil in sun or part shade. Jun.-Aug.
<b>Hemerocallis</b>	"Destined to See"	Clump forming perennial with strap-like leaves and creamy-buff, fragrant flowers edged in deep

purple with a violet-purple eye-zone and yellow throat. Height 60cm. Best in sun in fertile well-drained soil. Jul.-Sep.

<b>Hemerocallis</b>	"Diamond Dust"	A clump-forming perennial with arching strap-like leaves and trumpets of pale yellow flowers with a silvery sheen. Height 90cm. Moist well-drained soil in sun or part shade. Flowers June.
<b>Hemerocallis</b>	"Double Cutie"	A new variety with relatively long-lasting upturned, scented double pale yellow flowers. Height 30cm. Re-blooms late summer. Moist well-drained soil in sun. Jun.-Aug.
<b>Hemerocallis</b>	"Double Dream"	A clump-forming perennial with handsome, sword-shaped, arching leaves. Double pinky-orange flowers Height 75cm. Moist well-drained soil in sun. Jul.-Aug.
<b>Hemerocallis</b>	"Double Firecracker"	A clump-forming perennial with handsome, sword-shaped leaves and double red flowers. Height 70cm. Moist well-drained soil in sun or part shade. Jul.-Aug.
<b>Hemerocallis</b>	"Double River Wye"	A clump-forming perennial with handsome, sword-shaped leaves and double bright yellow flowers. Height 70cm. Moist well-drained soil in sun or part shade. Jul.-Aug.
<b>Hemerocallis</b>	"Edge Ahead"	A clump-forming perennial with sword-shaped arching leaves. Stunning pink flowers with a raspberry ring surrounding a yellow throat. Height 60cm. Moist well-drained soil in sun or part shade. Jun.-Aug. Reblooms.
<b>Hemerocallis</b>	"Franz Hals"	A clump-forming perennial with handsome, sword-shaped arching leaves and bright orange-yellow and brick red petals giving a two-tone effect. Height 90cm. Moist well-drained soil in sun or part shade. Jun.-Aug.
<b>Hemerocallis</b>	"Gentle Shepherd"	Off-white flowers with a greenish throat. Height 90cm. Moist well-drained soil in sun or part shade. Jun.-Jul.
<b>Hemerocallis</b>	"Georgette Belden"	A clump-forming perennial with sword-shaped, arching leaves.

		Clusters of red-purple flowers with a darker eye and a green throat. Moist well-drained soil in sun or part shade. Height 75cm. Jun.-Aug.
<b>Hemerocallis</b>	"Giant Moon"	A clump-forming perennial with arching strap-like leaves and trumpets of very large pale, lemon-yellow flowers with a white stripe. Height 80cm. Moist well-drained soil in sun or part shade. Jul.-Aug.
<b>Hemerocallis</b>	"Golden Chimes"	A clump-forming perennial with handsome, sword-shaped, arching leaves. Clusters of mahogany-brown buds open into deep yellow bell-shaped flowers. Moist well-drained soil in sun or part shade. Height 90cm. Jun.-Aug.
<b>Hemerocallis</b>	"Joan Senior"	Off-white yellowish flowers with a yellowish green throat. Height 45cm. Jul.-Sep. Best in full sun in well-drained fertile soil.
<b>Hemerocallis</b>	"Lacy Dolly"	A clump-forming perennial with handsome, sword-shaped leaves and double flowers in shades of pink. Height 50cm. Moist well-drained soil in sun or part shade. Jul.-Aug.
<b>Hemerocallis</b>	"Little Missy"	A clump-forming perennial with arching strap-like leaves and purple-red flowers with a thin white edge. Height 70cm. Moist well-drained soil in sun. Jun.-Sept.
<b>Hemerocallis</b>	"Moonlight Masquerade"	A clump-forming perennial with strap-like leaves and trumpets of cream flowers with a dark purple eye zone and yellow throat. Height 70cm. Moist well-drained soil in sun or part shade. Reblooms.
<b>Hemerocallis</b>	"Mountain Laurel"	A clump-forming perennial with arching strap-like leaves and trumpets of crimped edge, dark red flowers with a yellow-green throat. Height 75cm. Moist well-drained soil in sun or part shade. Flowers June.
<b>Hemerocallis</b>	"Night Beacon"	A clump-forming perennial with arching strap-like leaves and trumpets of maroon-purple flowers with a large yellow-green throat.

		Height 70cm. Moist well-drained soil in sun or part shade. Jun.-Jul. This new variety reblooms and also individual blooms last
<b>Hemerocallis</b>	"Pardon Me"	A shorter variety with clumps of broadish leaves and stems of fragrant bright red flowers with a yellow-green throat. Height 45cm. Moist well-drained soil in sun. Jul.-Aug.
<b>Hemerocallis</b>	"Pink Charm"	A clump-forming perennial with handsome, sword-shaped, arching leaves. Rosy pink flowers with narrow petals. Height 75cm. Moist well-drained soil in sun. Jul.-Aug.
<b>Hemerocallis</b>	"Purple Bicolour"	A clump-forming perennial with arching strap-like leaves and trumpets of purple-rose flowers with a darker throat. Height 60cm. Moist well-drained soil in sun or part shade.
<b>Hemerocallis</b>	"Purple Rain"	A clump-forming perennial with sword-shaped leaves and deep purple-maroon flowers with a dark centre. Height 60cm. Moist well-drained soil in sun or part shade. Jul.-Aug.
<b>Hemerocallis</b>	"Purpleicious"	A clump-forming perennial with arching strap-like leaves and trumpets of dark purple ruffled flowers with a large yellow-green throat. Height 70cm. Moist well-drained soil in sun or part shade. Jun.-Jul. This new variety reblooms.
<b>Hemerocallis</b>	"Sammy Russell"	A clump-forming perennial with handsome, sword-shaped, arching leaves and large brick red flowers. Height 70cm. Moist well-drained soil in sun or part shade. Jun.-Aug.
<b>Hemerocallis</b>	"Siloam Showgirl"	A clump forming perennial with strap-like leaves and mid-red flowers with a deeper red eye and yellow-green throat. Height 80cm. Best in sun in fertile well-drained soil. Jul.-Aug.
<b>Hemerocallis</b>	"Siloam Ury Winniford"	Clump forming perennial with strap-like leaves and creamy flowers with a red centre. Height 50cm. Best in sun in fertile well-

		drained soil. Jul.-Aug.
<b>Hemerocallis</b>	"Stafford"	Clump forming perennial with strap-like leaves and mahogany-red flowers with a yellow midrib and throat. Height 75cm. Best in sun in fertile well-drained soil. Jul.-Sep.
<b>Hemerocallis</b>	"Startle"	A clump-forming perennial with arching strap-like leaves and trumpets of bright red flowers with a frilled cream margin and a yellow throat. Height 75cm. Moist well-drained soil in sun or part shade. Flowers June.
<b>Hemerocallis</b>	"Strawberry Candy"	Clump forming perennial with strap-like leaves and strawberry red flowers with dark red eye-zone and yellow throat. Height 60cm. Best in sun in fertile well-drained soil. Jul.-Sep.
<b>Hemerocallis</b>	"Strutters Ball"	A clump-forming perennial with handsome, sword-shaped leaves and substantial flowers of deep purple.. Height 70cm. Moist well-drained soil in sun or part shade. Jun.-Jul.
<b>Hemerocallis</b>	"Summer Wine"	A clump-forming perennial with handsome, sword-shaped leaves and scented flowers of violet-purple.. Height 60cm. Moist well-drained soil in sun or part shade. Jun.-Jul.
<b>Hemerocallis</b>	"Veins of Truth"	A clump-forming perennial with handsome, sword-shaped leaves and scented rose and cream bicoloured flowers with a white midrib. Height 75cm. Moist well-drained soil in sun or part shade. Jul.-Sept.
<b>Hemerocallis</b>	"Whichford"	A clump-forming perennial with handsome, sword-shaped leaves and scented clear lemon-yellow flowers with a greenish throat. Height 90cm. Moist well-drained soil in sun or part shade. Jul.-Sept.
<b>Hemerocallis</b>	"White Coral"	A clump-forming perennial with handsome, sword-shaped leaves and large flowers of pale buff-yellow. Height 80cm. Moist well-

			drained soil in sun or part shade. Jul.-Sept.
<b>Hemerocallis</b>		"Winsome Lady"	A clump-forming perennial with handsome, sword-shaped leaves and large, ruffled flowers of blush pink with a yellow-green throat. Height 95cm. Moist well-drained soil in sun or part shade. Jul.-Sept.
<b>Hemerocallis</b>	<i>lilioasphodelus</i>		A clump-forming perennial with narrow leaves and fragrant, clear bright lemon-yellow flowers. Height 1m. Moist well-drained soil in sun or part shade. Jun.-Jul.
<b>Hemerocallis</b>	<i>minor</i>		Clumps of narrow grassy leaves with stems carrying scented yellow trumpets, opening from brownish buds. Height 25cm. Moist well-drained soil in sun or part shade. May-Jun.
<b>Hepatica</b>	<i>acutiloba</i>		Tri-lobed leaves, usually longer than wide and pointed. Flowers white, pink or light blue. Height 20cm. Moist well-drained soil in part shade. Mar.-Apr.
<b>Hepatica</b>	<i>nobilis</i>		Slow growing perennial with lobed, leathery leaves and cup-shaped blue, pink or white flowers Mar.-Apr. Height 10cm. Grow in moist soil in part shade.
<b>Hepatica</b>	<i>nobilis</i> var. <i>japonica</i>		Slow growing perennial with lobed, leathery leaves and cup-shaped blue, pink or white flowers Mar.-Apr. Height 10cm. Grow in moist soil in part shade.
<b>Hepatica</b>	<i>transsilvanica</i>		Semi evergreen perennial with shallow cup-shaped blue flowers in early spring. Height 20cm. Part shade in humus-rich soil
<b>Hepatica</b>	<i>transsilvanica</i>	"Elison Spence"	Semi evergreen perennial with tri-lobed leaves and small deep blue petals held within a circle of broader blue petals. Height 10-15cm. moist well-drained soil in part shade. March.
<b>Hepatica</b>	<i>x media</i>	"Ballardii"	A hybrid between <i>H. nobilis</i> and <i>H. transsilvanica</i> , this form has a neat habit with tri-lobed leaves and large mid-blue flowers. Height 10-15cm. Moist well-drained soil in part shade. Mar.-Apr.

<b>Hesperantha</b>	<b>baurii</b>		Short stems of sword-like leaves topped with symmetrically arranged, starry rose-pink flowers. Height 20-30cm. Moist well-drained soil in sun. Jun.-Aug.
<b>Hesperantha</b>	<b>huttonii</b>		Short stems of sword-like leaves, tinged crimson at the base topped with starry rose-pink flowers. Height 20-30cm. Moist well-drained soil in sun. Jun.-Aug.
<b>Hesperis</b>	<b>matronalis</b>		A short-lived perennial with dark green leaves. Clusters of lilac or purple flowers Very attractive to insects. Height 90cm. Moist well-drained soil in sun or shade. May.-Jul.
<b>Hesperis</b>	<b>matronalis var albiflora</b>	"Alba Plena"	A clump-forming perennial with dark green leaves and clusters of scented double white flowers. Height 60cm. Moist well-drained soil in sun or part shade. May-July.
<b>Hesperis</b>	<b>matronalis var. albiflora</b>		A short-lived perennial with clusters of white flowers Very attractive to insects. Height 90cm. Moist well-drained soil in sun or shade. May.-Jul.
<b>Heuchera</b>		"Amethyst Mist"	Large glossy dark amethyst-burgundy foliage with a silvery overlay. Height 35cm. Grows in most soils in sun or shade.
<b>Heuchera</b>		"Autumn Leaves"	New foliage is a strong red lightening during summer before darkening to a ruby red in autumn. Flowers are a pink/white colour. Height 45cm. Moist well-drained soil in part shade. May-Jun.
<b>Heuchera</b>		"Berry Smoothie"	New foliage is a rose-pink deepening to a purple-pink as the season progresses. Flowers are a cream colour. Height 45cm. Moist well-drained soil in part shade. May-Jun.
<b>Heuchera</b>		"Blackberry Jam"	Blackberry maroon foliage with darker veining and insignificant creamy-coral flowers. Height 25cm. Moist well-drained soil in sun or part shade. Jun.-Jul.
<b>Heuchera</b>		"Blackbird"	Very dark brown ruffled leaves with sprays of cream flowers. Height 30-35cm. Moist well-

		drained soil in sun or part shade. Jun.-Jul.
<b>Heuchera</b>	"Blackout"	Mounds of smooth, evergreen black-purple leaves (darker than ("Obsidian")) with airy stems of cream flowers. Height 25-50cm. Moist well-drained soil in sun or (probably best) in part shade, where it will take drier conditions. Jun.-Jul..
<b>Heuchera</b>	"Caramel"	Honey-apricot wavy foliage and stems of very pale pink flowers. Height 30cm. Moist well-drained soil probably in part shade. Jun.-Jul.
<b>Heuchera</b>	"Cascade Dawn"	Large dark red-purple leaves with strong silver veining. Insignificant flowers, probably best cut off. Height 50cm. Will grow in most soils in sun or shade. More compact in sun.
<b>Heuchera</b>	"Creme Brulee"	A new variety with amber-bronze leaves, particularly sharp in spring and stems of small white bells. Height 30-40cm. Grows in most conditions and positions.
<b>Heuchera</b>	"Electric Lime"	Ultimately a large plant with huge lime-tinted leaves that take on red veining with age, with the bonus of stems of closely packed white flowers. Height 40cm. Moist well-drained soil in sun or part shade. Jun.-Jul.
<b>Heuchera</b>	"Fire Chief"	Glowing wine-red leaves on a compact plant. Airy stems carry pink and white bicoloured flowers. Height 20-35cm. Moist well-drained soil in sun or part shade.
<b>Heuchera</b>	"Fireworks"	Bronzey-chocolate slightly ruffled foliage and stems carrying coral pink flowers. Height 45cm. Will grow in most soils in sun or shade. May-Jul.
<b>Heuchera</b>	"Geisha's Fan"	Dark purple veined leaves fan out to an unusual leaf shape. Pink flowers appear from late spring onwards. Height 35cm. Will grow in most soils and conditions.
<b>Heuchera</b>	"Ginger Ale"	Amber coloured foliage strongly overlaid with silver and darker

		veining. Flowers are a yellowish-pink colour. Height 30cm. Moist well-drained soil in part shade.
<b>Heuchera</b>	"Green Spice"	Dark grey-edged, silver-green leaves contrasting with purple veins and shortish stems of green flowers. Height 20cm. Moist well-drained soil in sun or part shade. Apr.-Jun.
<b>Heuchera</b>	"Guardian Angel"	Rounded grey-green leaves with prominent darker veining and purple flushing on newer leaves. Small white flower spikes on long stems. Height 30cm. Moist well drained soil in part shade.
<b>Heuchera</b>	"Kassandra"	An unusual variety that has caramel to orange leaves in spring changing to reddish-pink to maroon in autumn. Flowers are white Height 40cm. Moist well-drained soil in sun or part shade. Apr.-Jun.
<b>Heuchera</b>	"Key Lime Pie"	A new introduction with lime green foliage and stems of pink flushed white flowers. Height 20-40cm. Moist well-drained soil in sun or part shade. Apr.-Jun.
<b>Heuchera</b>	"Licorice"	Mounds of glossy, evergreen, slightly ruffled dark burgundy leaves with airy stems of coral flowers. Height 25-45cm. Moist well-drained soil in sun or part shade. Apr.-May.
<b>Heuchera</b>	"Lime Ricky"	In early spring leaves are a bright yellow colour toning down to lime green as the season proceeds. Produces masses of small white flowers. Height 35cm. Moist well drained soil in part shade.
<b>Heuchera</b>	"Mahogany"	A new variety with ruffled foliage, a glossy mahogany-red colour, darker in spring. Height 25-40cm. Moist well-drained soil in sun or part shade.
<b>Heuchera</b>	"Marmalade"	A new variety with ruffled foliage varying from russet to amber colour with a pink reverse. Insignificant red-brown flowers in spring. Height 40cm. Moist well-drained soil in sun or part shade.

<b>Heuchera</b>	"Midnight Rose"	Wonderful leaves, starting deep purple-black with pink spots developing. Leaf colour lightens in the summer with cream and pink dots. Height 40-60cm. Moist well-drained soil in sun or part shade.
<b>Heuchera</b>	"Obsidian"	Mounds of smooth, evergreen black-purple leaves with airy stems of cream flowers. Height 25-50cm. Moist well-drained soil. Probably best in part shade, where it will take drier conditions. May-Aug.
<b>Heuchera</b>	"Peach Flambe"	New foliage is a flaming red-orange colour, toning down to a peachy plum. Spikes of white flowers. Height 40cm. Most soils in sun or even dry shade. May-Aug.
<b>Heuchera</b>	"Plum Royale"	A new variety with scalloped leaves a wonderful shiny purple with hints of pink and silver and dark veins. Pink/white flowers on dark stems. Height 30-50cm. Moist well-drained soil in sun or part shade. Apr.-Jun.
<b>Heuchera</b>	"Rave On"	Forms a mound of small silver, veined leaves with sprays of good pink flowers. Height 35cm. Moist well-drained soil in sun or part shade. Apr.-May.
<b>Heuchera</b>	"Silver Indiana"	Burgundy leaves with heavy silvering and tall stems of white flowers in early summer. Height 45cm. Grows in most soils even dry shade.
<b>Heuchera</b>	"Silver Scrolls"	Silver leaves with red-purple veins. White flowers in early summer. Height 35cm. Grows in most soils even dry shade.
<b>Heuchera</b>	"Southern Comfort"	Large cinnamon-peach leaves that change to burnished copper and amber in the season. Produces stems of white flowers. Height 40cm. Moist well-drained soil in sun or part shade. Aug.-Sep.
<b>Heuchera</b>	"Tiramisu"	Chartreuse-yellow foliage with deep plum red veining and shading, that fades in summer, returning in autumn. long stems of

			small pink flowers. Height 30-40cm. Moist well-drained soil in sun or part shade.
<b>Heuchera</b>		"Velvet Night"	Large dark slate black leaves with metallic purple overlays. Insignificant flowers, probably best cut off. Height 30cm. Will grow in most soils in sun or shade.
<b>Heuchera</b>		"Venus"	An evergreen with silvery leaves and dark veining. Height 45cm. Most soils in sun or shade. Flowers are insignificant.
<b>Heuchera</b>	cylindrica var. alpina		Mats of crisp, pleated white edged leaves. Short stems carry dumpy creamy white flowers. Height 10-20cm. Well-drained soil in sun or part shade. Apr.-May.
<b>Heuchera</b>	pulchella		A lovely dwarf species with light to dark pink hanging bells over mid-green scalloped leaves. Height 15-20cm. Moist well-drained soil in sun or part shade. Jun.-Jul.
<b>Hosta</b>		"Big Daddy"	A large hosta with deep blue round puckered leaves and white flowers. Height up to 1m. Moist soil in shade.
<b>Hosta</b>		"Fire and Ice"	A medium sized hosta with elliptical white leaves with a wide dark green margin and lavender flowers. Height 40cm. Moist soil in part shade.
<b>Hosta</b>		"Fireworks"	A small hosta with small, upright pointed leaves, cream with a narrow two-tone green edge that can streak into the centre. Light lavender flowers. Height 25cm.
<b>Hosta</b>		"Frances Williams"	Heart-shaped, cupped, puckered, glaucous blue leaves with a wide irregular yellow, green and cream margins. Greyish white flowers. Height 60cm. Moist soil in part shade. Jun.-Jul.
<b>Hosta</b>		"Gay Feather"	A small variety with pointed elliptical cream leaves and an irregular green margin. Violet flowers. Moist well-drained soil in sun or part shade.
<b>Hosta</b>		"Ginko Craig"	Narrow dark green leaves, margined clear white. Deep purple to violet flowers in late summer.

		Height 25cm. Moist well-drained soil in sun.
<b>Hosta</b>	"Gold Standard"	A large hosta with gold leaves with a dark green edge. Pale lavender flowers. Height 60cm. Moist well-drained soil in part shade. Jul.-Aug.
<b>Hosta</b>	"Golden Prayers"	A dwarf variety, forming a mound of golden leaves, followed in late summer by lilac flowers. Height 25cm. Moist well-drained soil in sun or part shade.
<b>Hosta</b>	"Golden Tiara"	Pretty heart-shaped mid-green leaves with irregular yellow margins and purple flowers. Height 30cm. Spread 50cm. Moist well-drained soil in shade. Jul.-Aug. Herbaceous. Foliage colour
<b>Hosta</b>	"Green Gold"	Dark green leaves with a creamy white margin. Lavender flowers, Jun.-Jul. Height 60cm. Moist well-drained soil in part shade.
<b>Hosta</b>	"Halcyon"	Elegant, heart-shaped glaucous blue leaves. Lilac-grey flowers in summer. Height 40cm. Moist well-drained soil in part shade.
<b>Hosta</b>	"Hydon Sunset"	A dwarf hosta with bright golden foliage that holds well through the season and spikes of purple flowers. Height 15cm. Moist soil in part shade.
<b>Hosta</b>	"June"	A compact variety with blue-green leaf margins and a yellowish-green centre that fades to creamy-yellow. White tubular flowers flared at the ends. Height 45cm. Moist soil in sun or part shade.
<b>Hosta</b>	"Krossa Regal"	An architectural, vase-shaped plant. Large glaucous blue-grey, veined leaves and pale lilac flowers. Height 70cm. Moist well-drained soil in part shade. Jul.-Aug.
<b>Hosta</b>	"Lemon, Lime"	A dwarf hosta with bright golden foliage and spikes of lilac flowers. Height 15cm. Moist soil in part shade.
<b>Hosta</b>	"Munchkin"	Small lanceolate, wavy margined, dark green leaves. Violet flowers. Height 10cm. Protect from drying

		winds. Moist site in part shade. Jun.-Aug.
<b>Hosta</b>	"Patriot"	A large hosta with dark green heart shaped leaves and a variable broad white margin. Lavender flowers. Height 50cm. Moist well-drained soil in sun or part shade. Jul.-Aug.
<b>Hosta</b>	"Rock Princess"	A dwarf hosta with undulated, ribbed dark green leaves and lavender-mauve flowers. Height 20cm. Moist well-drained soil in sun or part shade.
<b>Hosta</b>	"Royal Standard"	Large heart-shaped, ribbed bright pale green leaves and fragrant white flowers. Height 60cm. Moist well-drained soil in sun or part shade. Jul.-Aug.
<b>Hosta</b>	"Sharman"	Creamy-yellow leaves with a green edge. Height 45cm. Lavender flowers in Jul.-Aug. Moist soil in part shade.
<b>Hosta</b>	"Shining Tot"	A dwarf hosta with green heart-shaped leaves and lavender flowers. Height 20cm. Moist soil in part shade.
<b>Hosta</b>	"Stiletto"	A small variety with narrow wavy-edged green leaves with a yellow-green margin. Stems of purple striped flowers. Height 30cm. Moist well-drained soil in sun or part shade.
<b>Hosta</b>	"Sum & Substance"	Huge heart-shaped, yellow-green leaves deeply puckered when mature. Very pale lilac flowers. Height 75cm. Moist soil in sun (brings out the gold colour). Jul.-Aug.
<b>Hosta</b>	"Wolverine"	A new variety with neat clumps of cream-edged, grey-green, pointed leaves. Spikes of mauve flowers. Height 30cm. Moist well-drained soil in sun or part shade.
<b>Hosta</b>	kikutii var yakusimana	A small species with lance-shaped mid green leaves and pale lilac flowers. Height 25cm. Moist soil in part shade.
<b>Hosta</b>	rohdeifolia	Elongated leaves, green with a broad creamy yellow margin. Height 25cm. Purple striped flowers. Moist well-drained soil in

part shade.

<b>Hosta</b>	sieboldiana	"Frances Williams"	Heart-shaped, cupped, puckered, glaucous blue leaves with a wide irregular yellow-green margin. Greyish white flowers in early summer. Height 60cm. Part shade.
<b>Hosta</b>	venusta		Tiny oval, wavy margined, dark green leaves. Violet flowers. Height 5cm. Spread 25cm. Protect from drying winds. Moist site in part shade. Jun.-Aug.
<b>Hydrangea</b>		"Preziosa"	An upright shrub with glossy mid-green leaves and small round clusters of white flowers turning to rich red, blue or mauve on acid soil. Height 1.5m. Moist well-drained soil in sun or part shade. Jul.-Aug.
<b>Hydrangea</b>	anomala ssp. petiolaris		A self-clinging deciduous climber with fresh apple-green heart-shaped leaves and large flat flowerheads of white flowers with an outer ring of white bracts. Height 6m. upwards. Moist well-drained soil in sun or shade.
<b>Hydrangea</b>	anomala ssp. petiolaris	"Miranda"	A self-clinging deciduous climber with fresh apple-green heart-shaped leaves with a creamy yellow margin. Large flat flowerheads of white flowers with an outer ring of white bracts. Height 4-5m. Moist well-drained soil in sun or shade.
<b>Hydrangea</b>	arborescens	"Annabelle"	A rounded deciduous shrub with glossy dark green leaves and large round clusters of cream flowers. Height 2.5m. Moist well-drained soil in sun or part shade. July to August.
<b>Hydrangea</b>	arborescens	"Hayes Starburst"	A compact shrub with narrow, shiny, wavy-edged dark green leaves and sterile dome-shaped heads of double white florets. Height and spread 1.2m. Moist well-drained soil in sun or part shade. Flowers from July to August. Prune in early spring.

<b>Hydrangea</b>	arborescens	"Invincibelle Spirit"	A rounded deciduous shrub with glossy dark green leaves and large round clusters of scented pink flowers. Height 2.5m. Moist well-drained soil in sun or part shade. Flowers from July to August.
<b>Hydrangea</b>	arborescens ssp. discolor		A rounded deciduous shrub with glossy dark green leaves grey tomentose beneath and heads of pure white flowers with a few ray-florets.. Height 2.5m. Moist well-drained soil in sun or part shade. July to August.
<b>Hydrangea</b>	arborescens ssp. radiata	"Samantha"	A rounded deciduous shrub with glossy dark green leaves with silver backs and large round clusters of cream flowers. Height 2.5m. Moist well-drained soil in sun or part shade. July to August.
<b>Hydrangea</b>	aspera	"Anthony Bullivant"	A villosa type with sky-blue lacecap flowers turning a deep plum colour. Lovely green felty leaves and tan coloured peeling bark. Height 3m. Needs a semi-shaded site with moist soil. Aug.-Sep.
<b>Hydrangea</b>	aspera	"Kawakamii"	A medium sized shrub with velvety, dark green, serrated leaves flushed bronze when young. Flattened flowerheads of violet central flowers surrounded by white florets. Height and spread 2-3m. Moist well-drained soil in part shade. Flowers from August to Se
<b>Hydrangea</b>	aspera	"Villosa Group"	An upright spreading shrub with narrow, velvety, dark green leaves. Flattened flowerheads of purple-blue in the centre surrounded by white or lilac-rose flowers. Height 1-4m. Spread 1-4m. Moist well-drained soil in sun or part shade. Flowers from August t
<b>Hydrangea</b>	aspera ssp. sargentiana		An upright shrub with very bristly, dark green leaves , Flattened flowerheads of blue to purple in the centre surrounded by white flowers. Height 3m. Spread 2.5m. Moist well-drained soil in sun or part shade. Flowers from August to September.

<b>Hydrangea</b>	aspera ssp. strigosa		A slow-growing deciduous shrub with attractive willow-like felty green leaves and flat violet flowerheads edged with white florets. Height and spread 2.5m. Moist well-drained soil in sun or part shade. Flowers from August to September.
<b>Hydrangea</b>	heteromalla	"Snowcap"	A large, upright, deciduous shrub with felted, green, heart-shaped, veined leaves and large white lacecap flowers that fade to pink. Height 5m. Spread 3m. Moist well-drained soil in sun or part shade. Flowers from June to July.
<b>Hydrangea</b>	involucrata	"Plena"	A small spreading shrub with felted leaves. Flattish flowerheads with fertile outer double white florets and smaller central pink-flushed flowers. Height and spread 60cm. moist well-drained soil in sun or part shade. Aug.-Oct.
<b>Hydrangea</b>	involucrata	"Viridescens"	A small deciduous shrub with bristly heart-shaped leaves and rounded heads of lime-green flowers. Height and spread up to 1m. Flowers from July-September. Well-drained soil in part shade.
<b>Hydrangea</b>	macrophylla	"Alpengluhen"	A rounded shrub with glossy, dark green leaves and attractive large domed heads of crimson flowers. Height and spread 1.2m. Moist well-drained soil in sun or part shade. Flowers from July to August.
<b>Hydrangea</b>	macrophylla	"Ami Pasquier"	A rounded shrub with glossy, dark green leaves and mophead flowers of dark crimson to purple-blue. Height 1.5m. Spread 2m. Moist well-drained soil in sun or part shade. Flowers from July to August.
<b>Hydrangea</b>	macrophylla	"Ayesha"	A rounded shrub with glossy, dark green leaves and unusual flattened mophead flowers of thick petalled, cup-shaped florets resembling a lilac. The colour is greyish lilac to pink. Height 2.5m. Spread 2m. Moist well-drained soil in sun or part shade. Flowe

<b>Hydrangea</b>	macrophylla	"Blaumeise"	A strong growing shrub with glossy, green leaves and lacecap heads of blue fertile flowers surrounded by long lasting ray florets of blue. Height 2.5m, spread 1.5m. Moist soil in sun or best in part shade. Flowers from July to August.
<b>Hydrangea</b>	macrophylla	"Blue Wave"	A strong growing shrub with glossy, green leaves and lacecap heads of blue fertile flowers surrounded by ray florets varying from pink to blue, depending on the soil. Height and spread 2.5m. Moist soil in sun or best in part shade. Flowers from July to Au
<b>Hydrangea</b>	macrophylla	"Bodensee"	A rounded shrub with glossy, dark green leaves and large mophead flowers, pink or blue depending on soil. Height 2m. Spread 2.5m. Moist soil in sun or part shade. Flowers from July to August.
<b>Hydrangea</b>	macrophylla	"Bouquet Rose"	A rounded, deciduous shrub with mid-green leaves and mophead flowerheads of pink. Height and spread 1.5m. Moist well-drained soil in part shade. Flowers from July to August.
<b>Hydrangea</b>	macrophylla	"Early Sensation"	A compact, deciduous shrub with lustrous deep green leaves and intense pink or blue mophead flowers. Height and spread 1.2m. Moist well-drained soil in sun or part shade. Flowers from July to August and beyond if dead-headed.
<b>Hydrangea</b>	macrophylla	"Geoffrey Chabund"	A rounded, deciduous shrub with glossy, dark green leaves and lacecap flowerheads of dark brick red. Height 2m. Spread 2.5m. Moist well-drained soil in sun or part shade. Flowers from July to August.
<b>Hydrangea</b>	macrophylla	"Goldrush"	A rounded, deciduous shrub with glossy, dark green leaves, broadly margined gold and lacecap flowerheads of lilac-pink. Height 2m. Spread 2m. Moist well-drained soil in sun or part shade. Flowers from July to August.

<b>Hydrangea</b>	macrophylla	"Izu-no-hana"	A small deciduous shrub with double lacecap flowers from mauve to pink depending on the soil acidity. Height 1.5m. Moist well-drained soil in sun or part shade. Jul.-Aug.
<b>Hydrangea</b>	macrophylla	"King George"	A rounded shrub with glossy, dark green leaves and large mophead flowers of rose-pink with serrated edges. Height 2m. Spread 2.5m. Moist well-drained soil in sun or part shade. Flowers from July to August.
<b>Hydrangea</b>	macrophylla	"Lanarth White"	A rounded shrub with glossy, dark green leaves and lacecap flowerheads of pure white. Height 1.5m. Spread 1.5m. Moist well-drained soil in sun or part shade. July to August.
<b>Hydrangea</b>	macrophylla	"Libelle"	A rounded shrub with glossy, dark green leaves and large lacecap flowers, which change colour from pink to green to cherry-red. Height and spread 1.5m. Moist soil in sun or part shade. Flowers from July to August.
<b>Hydrangea</b>	macrophylla	"Madame Emile Mouillere"	A rounded shrub with glossy, dark green leaves and large mophead flowers, white with a pink or blue eye and serrated edges. Height 2m. Spread 2.5m. Moist soil in sun or part shade. Flowers from July to August.
<b>Hydrangea</b>	macrophylla	"Mariesii"	A rounded shrub with glossy, dark green leaves and domed lacecap flowerheads of pale pink to pale blue. Height 1.2m. Spread 1.2m. Moist well-drained soil in sun or part shade. Flowers from July to August.
<b>Hydrangea</b>	macrophylla	"Merveille Sanguin"	A rounded shrub with glossy, dark green leaves that turn a rich purple and mophead flowers, deep cerise. Height 2m. Spread 2.5m. Moist soil in sun or part shade. Flowers from July to August.
<b>Hydrangea</b>	macrophylla	"Mirai"	A rounded shrub with glossy, dark green leaves with purple tints and white mophead flowers with a red edge. Height and spread

1.2m. Moist soil in sun or part shade. Flowers from June to September. Flowers on new and old wood.

<b>Hydrangea</b>	macrophylla	"Nigra"	A rounded shrub with glossy, dark green leaves on black stems and large mophead flowers of rose-pink. Height 2m. Moist soil in sun or part shade. Jul.-Aug. Shelter from cold drying winds
<b>Hydrangea</b>	macrophylla	"Pia"	A compact rounded shrub with glossy, dark green leaves and mophead flowers of bright red with white centres. Height 60cm. Moist well-drained soil in sun or part shade. Jul.-Aug.
<b>Hydrangea</b>	macrophylla	"Rotschwanz"	A deciduous shrub with glossy green leaves and large rosy-red lacecap flowers from July to August. Height 1.5m. Moist well-drained soil in sun or part shade.
<b>Hydrangea</b>	macrophylla	"Sabrina"	A deciduous shrub with deep green leaves and large mophead flowers of white with a strong red edge. Height and spread 1.2m. Moist well-drained soil in sun or part shade. Flowers from July to August.
<b>Hydrangea</b>	macrophylla	"Seagull"	A deciduous shrub with glossy green leaves and large red lacecap flowers from July to August. Height 1.5m. Moist well-drained soil in sun or part shade.
<b>Hydrangea</b>	macrophylla	"Selina"	A deciduous shrub with deep green leaves flushed purple and purple-pink lacecap flowers. Height and spread 1.2m. Moist well-drained soil in sun or part shade. Flowers from July to August.
<b>Hydrangea</b>	macrophylla	"Sinderella"	A deciduous shrub with deep green leaves and large mophead flowers of a soft pink colour. Height and spread 1.2m. Moist well-drained soil in sun or part shade. Flowers from July to August.
<b>Hydrangea</b>	macrophylla	"Veitchii"	A rounded shrub with glossy, dark green leaves and large lacecap flowerheads of white turning pink

to red with age. Height 2m. Spread 2.5m. Moist well-drained soil in sun or part shade. Flowers from July to August

<b>Hydrangea</b>	macrophylla	"Wagtail"	A deciduous shrub with glossy green leaves and large heads of pale blue/pink lacecap flowers from July to August. Height 1.5m. Moist well-drained soil in sun or part shade.
<b>Hydrangea</b>	macrophylla	"Zorro"	A deciduous shrub with glossy green leaves and large heads of rose-pink lacecap flowers held on dark stems. Flowers turn blue on acid soils. Height 1.5m. Moist well-drained soil in sun or part shade. Flowers from July to August.
<b>Hydrangea</b>	paniculata	"Ammarin"	An upright to spreading shrub with mid to dark green leaves and large creamy white flowerheads which become deep pink-red as they age. Height 2m. Spread 2m. Moist well-drained soil in sun or part shade. Protect from cold winds. August to September.
<b>Hydrangea</b>	paniculata	"Brussels Lace"	An upright to spreading shrub with mid to dark green leaves and extra-large creamy white flowerheads. Height 3m. Spread 2.5m. Moist well-drained soil in sun or part shade. Protect from cold winds. August to September.
<b>Hydrangea</b>	paniculata	"Dart's Little Dot"	An upright to spreading deciduous shrub with mid to dark green leaves and numerous white sterile florets surrounding smaller fertile florets in a pyramidal flowerhead. Height 1.5m. Spread 1m. Moist well-drained soil in sun or part shade. Flowers from August
<b>Hydrangea</b>	paniculata	"Dharuma"	An upright to spreading shrub with mid to dark green leaves and slightly flattened panicles of creamy white flowers which become pink-red as they age. Height 1.2m. Spread 1m. Moist well-drained soil in sun or part shade. Protect from cold winds. July to S

<b>Hydrangea</b>	paniculata	"Dolly"	An upright to spreading shrub with mid to dark green leaves and creamy white panicles of flowers that age to pink. Height and spread 2m. Moist well-drained soil in sun or part shade. Flowers from August to September.
<b>Hydrangea</b>	paniculata	"Everest"	An upright shrub with glossy mid to dark green leaves and long creamy white flowerheads turning pinkish white with age. Height 3m. Spread 2.5m. Moist well-drained soil in sun or part shade. Flowers from August to September. Hard prune in spring.
<b>Hydrangea</b>	paniculata	"Grandiflora"	An upright to spreading deciduous shrub with mid to dark green leaves and large white flowerheads turning pinkish white with age. Height 3-7m. Spread 2.5m. Flowers from August to September. Prune hard in spring.
<b>Hydrangea</b>	paniculata	"Great Star"	An upright to spreading deciduous shrub with mid to dark green leaves and large white flowerheads turning pinkish white with age. Height 3m. Spread 2.5m. Flowers from August to September. Prune hard in spring.
<b>Hydrangea</b>	paniculata	"Greenspire"	An upright to spreading shrub with mid to dark green leaves and lime-green flowerheads turning white. Height 3m. Spread 2m. Moist well-drained soil in sun or part shade. Flowers from August to September. Hard prune in spring.
<b>Hydrangea</b>	paniculata	"Kyushu"	An upright shrub with glossy mid to dark green leaves and large creamy white flowerheads turning pinkish white with age. Height 3m. Spread 2.5m. Moist well-drained soil in sun or part shade. Flowers from August to September. Hard prune in spring.
<b>Hydrangea</b>	paniculata	"Limelight"	An upright to spreading shrub with mid to dark green leaves and huge lime-green flowerheads that fade to pink. Height 3-7m. Spread 2.5m. Moist well-drained soil in sun or part shade. Flowers from

			August to September. Hard prune in spring.
<b>Hydrangea</b>	paniculata	"Papillon"	An upright to spreading shrub with mid to dark green small, leaves and elongated white flowerheads with the sterile flowers opening randomly about the head. Height 2.5m. Spread 2.5m. Moist well-drained soil in sun or part shade. Protect from cold winds. A
<b>Hydrangea</b>	paniculata	"Pee Wee"	A shorter version of this upright shrub with glossy mid to dark green leaves and large creamy white flowerheads. Height 1.2m. Spread 1m. Moist well-drained soil in sun or part shade. Flowers from August to September. Hard prune in spring.
<b>Hydrangea</b>	paniculata	"Phantom"	A new variety with glossy mid to dark green leaves and large creamy white flowerheads turning pinkish white with age. Height 3m. Spread 2.5m. Moist well-drained soil in sun or part shade. Flowers from August to September. Hard prune in spring.
<b>Hydrangea</b>	paniculata	"Pink Diamond"	An upright to spreading shrub with mid to dark green leaves and large creamy white flowerheads which become deep pink-red as they age. Height 3m. Spread 2.5m. Moist well-drained soil in sun or part shade. Protect from cold winds. August to September.
<b>Hydrangea</b>	paniculata	"Pink Jewel"	An upright shrub with glossy mid to dark green leaves and large creamy white flowerheads turning pink with age. Height 2m. Spread 1.5m. Moist well-drained soil in sun or part shade. Flowers from August to September. Hard prune in spring.
<b>Hydrangea</b>	paniculata	"Pinky Winky"	An upright to spreading shrub with mid to dark green leaves and large creamy white flowerheads which age to deep pink-red, giving a bicoloured effect. Height 3m. Spread 2.5m. Moist well-drained soil in sun or part shade. Protect

			from cold winds. August to
<b>Hydrangea</b>	paniculata	"Tardiva"	An upright to spreading shrub with mid to dark green leaves and large creamy white panicles of flowers. Height 3m. Spread 2.5m. Moist well-drained soil in sun or part shade. August to September.
<b>Hydrangea</b>	paniculata	"Unique"	An upright to spreading shrub with mid to dark green leaves and huge white flowerheads. Height 3-7m. Spread 2.5m. Moist well-drained soil in sun or part shade. Flowers from August to September. Hard prune in spring.
<b>Hydrangea</b>	paniculata	"Vanilla Fraise"	An upright to spreading shrub with mid to dark green leaves and large creamy white flowerheads which become deep pink-red as they age. Height 3m. Spread 2.5m. Moist well-drained soil in sun or part shade. Protect from cold winds. August to September.
<b>Hydrangea</b>	paniculata	"White Moth"	An upright to spreading shrub with mid to dark green leaves and creamy white panicles of flowers that age to pale green. Height and spread 2m. Moist well-drained soil in sun or part shade. Flowers from August to September.
<b>Hydrangea</b>	quercifolia		An upright to spreading shrub with lobed mid green leaves. Conical white flowerheads becoming pink-tinged with age. Height 2m. Spread 2.5m. Moist well-drained soil in part shade. Flowers from July to September.
<b>Hydrangea</b>	quercifolia	"Harmony"	An unusual form of this upright to spreading shrub with lobed mid green leaves but large rounded double white flowerheads. Height 2m. Spread 2.5m. Moist well-drained soil in part shade. Flowers from July to September.
<b>Hydrangea</b>	quercifolia	"Pee Wee"	A compact form of the species with smaller leaves than the type and smaller panicles of white flowers, held more upright. Height and spread 1m. Moist well-drained

soil in sun or part shade. Flowers from July to September. Good autumn colour.

<b>Hydrangea</b>	quercifolia	"Snow Queen"	An upright to spreading shrub with lobed mid green leaves and conical white flowerheads becoming pink with age. Height 2m. Spread 2.5m. Moist well-drained soil in part shade. Flowers from July to September.
<b>Hydrangea</b>	quercifolia	"Snowflake"	An upright to spreading shrub with lobed mid green leaves and conical double white flowerheads becoming pink with age. Height 2m. Spread 2.5m. Moist well-drained soil in sun or part shade. Flowers from July to September.
<b>Hydrangea</b>	quercifolia	"Syke's Dwarf"	A compact form of the species with smaller leaves than the type and relatively large panicles of white flowers, held more upright. Height and spread 1.5-2m. Moist well-drained soil in sun or part shade. Flowers from July to September. Good autumn colour.
<b>Hydrangea</b>	seemannii		A woody, evergreen climber. with greenish white domed flowerheads surrounded by white flowers. Height 10m. Sun or part shade in sheltered spot. Jun.-Aug.
<b>Hydrangea</b>	serrata	"Beni Gaku"	An erect shrub with deep green leaves turning red in autumn. White lacecap flowerheads take on a red blush as they age. Height 1.2m. Spread 1.2m. Moist well-drained soil in sun or part shade. Flowers from July to September.
<b>Hydrangea</b>	serrata	"Bluebird"	An erect shrub with mid green leaves turning red in autumn. Lacecap flowerheads of rich blue, surrounded by pale blue flowers. Height 1.2m. Spread 1.2m. Moist well-drained soil in sun or part shade. Flowers from July to September.
<b>Hydrangea</b>	serrata	"Diadem"	A compact shrub with mid-green leaves turning red in autumn. Lacecap flowerheads of pink flowers. Height 1.2m. Spread 1.2m. Moist well-drained soil in

			sun or part shade. Flowers from July to August. Just dead-head in spring.
<b>Hydrangea</b>	serrata	"Graciosa"	An erect shrub with mid green leaves heavily suffused burgundy. Lacecap flowerheads of pink, surrounded by pinkish-white sterile florets. Height 1.2m. Spread 1.2m. Moist well-drained soil in sun or part shade. Flowers from July to September.
<b>Hydrangea</b>	serrata	"Kiyosumi"	An erect shrub with mid green leaves heavily suffused burgundy. Lacecap flowerheads of pink, surrounded by pinkish-white sterile florets edged rose red. Height 1.2m. Spread 1.2m. Moist well-drained soil in sun or part shade. Flowers from July to September.
<b>Hydrangea</b>	serrata	"Prolifera"	An erect shrub with small, mid green leaves turning red in autumn. Lacecap flowerheads of pink, surrounded by double pale pink sterile florets. Height 1m. Spread 1m. Moist well-drained soil in sun or part shade. Flowers from July to September.
<b>Hydrangea</b>	serrata	"Pulchra"	An erect shrub with new leaves a rich coppery-purple. Lacecap flowerheads of white with a pink edge. Height 2.5m. Spread 2m. Moist well-drained soil in sun or part shade. Flowers from July to September.
<b>Hydrangea</b>	serrata	"Shichidanka"	An erect shrub with mid green leaves turning red in autumn. Lacecap flowerheads of dark blue, surrounded by double pale blue sterile florets. Height 1.2m. Spread 1.2m. Moist well-drained soil in sun or part shade. Flowers from July to September.
<b>Hydrangea</b>	serrata	"Shirofuji"	An erect shrub with mid green leaves turning red in autumn. Lacecap flowerheads of white, surrounded by double white sterile florets. Height 1.2m. Spread 1.2m. Moist well-drained soil in sun or part shade. Flowers from July to

September.

<b>Hydrangea</b>	serrata	"Tiara"	An erect shrub with bronzey-green leaves turning flame in autumn. Lacecap flowerheads of blue, turning to a lilac or rose-pink. Height 2m. Spread 1.5m. Moist well-drained soil in sun or part shade. Flowers from July to September.
<b>Hydrangea</b>	x semiola		A cross between <i>H. petiolaris</i> and <i>H. seemannii</i> . A self-clinging semi-evergreen climber, with striking white lacecap flowerheads. Height after 10 yrs., about 3m. Moist well-drained soil in sun or part shade.
<b>Hypericum</b>	aegypticum		An evergreen low-spreading shrub with grey-green leaves. Star-shaped pale yellow flowers. Height 50cm. Well-drained soil in sun. May- Aug.
