

Lamium	orvala		A clump-forming perennial with deltoid green leaves, heavily veined, producing pinkish purple lipped flowers. Height 45cm. Moist well-drained soil in part shade. Apr.-Aug.
Lampranthus	brownii		Mats of short, narrow, succulent leaves, covered with pinky orange daisy flowers. Height 10cm. Well-drained soil in sun. Jun.-Jul.
Lamprocapnos	spectabilis	"Valentine"	Dark plum-green foliage and reddish stems, Arching sprays of red and white heart-shaped flowers from Apr.-Jul. Height 60cm. Moist well-drained soil in part shade.
Lathyrus	aureus		An herbaceous pea with brownish-orange flowers in May-Jul. Height 20-50cm. Sunny spot in well-drained soil.
Lathyrus	niger		A bushy perennial with purplish flowers that fade to mid-blue and is followed by black seed pods. Height 60-90cm. Moist well-drained soil in sun. May-Jul.
Lathyrus	vernus		A dense clump-forming perennial with upright stems of pinnate leaves.. Purplish blue flowers in spring. Height 20-45cm. well-drained soil in sun. Apr-May.
Lathyrus	vernus	"Alboreus"	A dense clump-forming perennial with upright stems. Pink and white pea-like flowers in spring. Height 20-45cm. Moist well-drained soil in sun. April to May.
Lathyrus	vernus	"Rainbow"	A dense clump-forming perennial with upright stems of pinnate leaves. Pea-like flowers in a mixture of reds, pinks, lilac and white. Height 20-45cm. Well-drained soil in sun. Apr-May.
Lavandula	angustifolia	"Arctic Snow"	A compact evergreen shrub with aromatic greyish foliage and clear white flowers. Height 50cm. Well-drained soil in sun. Jun.-Sept. Trim after flowering.
Lavandula	angustifolia	"Elizabeth"	Good greyish-green foliage and large pointed dark purple flowers on strong stems. Slightly taller than "Hidcote", but better? Height

			60-70cm. Well-drained soil in sun. Jun.-Jul.
Lavandula	angustifolia	"Hidcote"	A compact bushy shrub with narrow silvery grey leaves and spikes of dark purple flowers. Height 60cm. Well-drained soil in sun. Jul.-Aug.
Lavandula	angustifolia	"Imperial Gem"	A compact form of "Hidcote" with narrow silvery grey leaves and spikes of dark purple flowers. Height 40cm. Well-drained soil in sun. Jul.-Aug.
Lavandula	angustifolia	"Laventite Petite"	An early flowering form of English lavender with dark blue flowers on a compact plant. Height 35cm. Well-drained soil in sun. Jun.-Jul.
Lavandula	angustifolia	"Miss Muffet"	A compact plant with grey foliage and neat lilac-blue flowers. Height 30cm. Well-drained soil in sun. Jun.-Jul.
Lavandula	angustifolia	"Munstead"	A compact bushy shrub with narrow grey-green leaves and spikes of purple-blue flowers. Height 45cm. Well-drained soil in sun. Jul.-Aug.
Lavandula	angustifolia	"Thumbelina Leigh"	A dwarf selection with grey-green foliage and short stems of dark violet-purple flowers. Height 15-20cm. Well-drained soil in sun. Flowers in June.
Lavandula	stoechas	"Fathead"	Free-flowering plum-purple sterile bracts on large rounded flowerheads over aromatic grey-green leaves. Height 40cm. Well-drained soil in sun.
Lavandula	stoechas	"Helmsdale"	A compact evergreen bushy shrub with narrow grey-green leaves and striking spikes of deep mauve-purple flowers topped with mauve-purple bracts. Height 90cm. Sheltered well-drained site in sun. Jun.-Aug.
Lavandula	stoechas	"Lilac Wings"	A compact variety with small needle-like grey leaves and masses of lilac flowers. Height 40cm. Well-drained soil in sun. May-Jul. Trim after flowering.
Lavandula	stoechas	"Purple Wings"	A compact selection with grey-green foliage and abundant small

			purple-mauve flowers topped with purple bracts. Height 40cm. Well-drained soil in sun. May-Jul. Trim after flowering.
Lavandula	stoechas	"Regal Splendour"	Highly aromatic green foliage and purple-violet flags with royal purple flowers. Height 70cm. Well-drained soil in sun. May-Jul. Trim after flowering.
Lavandula	stoechas	"Snowman"	A compact selection with grey-green foliage and pure white flowers and ears. Height 40cm. Well-drained soil in sun. May-Jul. Trim after flowering.
Lavandula	stoechas	"Tiara"	Aromatic green foliage with purple-blue flowerheads and creamy-white flags. Height 70cm. Well-drained soil in sun. May-Jul. Trim after flowering.
Lavatera	maritima		A medium sized semi-evergreen shrub with lilac saucer-shaped flowers with a plum eye. Height 1.5m. Spread 1m. Well-drained soil in sun. July-Oct. Shelter from cold drying winds.
Leptospermum	scoparium	"Nicholsii Nanum"	Tiny bronzey-red foliage with deep red "hawthorn" flowers up the stems. Height 15cm. May-Jun. Moist peaty soil in sheltered sunny site.. Do not let it dry out!
Lespedeza	thunbergii	"Albiflora"	A woody-based subshrub with light green leaves and racemes of pea-like pure white flowers. Height 2m. Spread 2m. Well-drained soil in sun. September to October. Protect with a winter mulch.
Leucanthemum		"Angel"	A dwarf variety with thick dark green foliage and short stems topped with clear white daisy flowers with yellow centres. Height 35cm. Moist well-drained soil in sun. Jun.-Sep.
Leucanthemum		"Snowcap"	A clump-forming perennial with glossy, dark green leaves and freely produced single white flowers with a yellow centre. Height 45cm. Moist soil in sun or part shade. Jun.-Sept.

Leucanthemum	x superbum	"Aglaia"	A clump-forming perennial with glossy, dark green leaves and fringed, semi-double white flowers with yellow centres. Height 60cm. Moist soil in sun or part shade. Jun.-Sept..
Leucanthemum	x superbum	"Becky"	A clump-forming perennial with glossy, dark green leaves and large, single white flowers. Height 100cm. Moist soil in sun or part shade. Jun.-Sep.
Leucanthemum	x superbum	"Bishopstone"	A clump-forming perennial with glossy, dark green leaves and shaggy petalled, double white flowers. Height 90cm. Moist soil in sun or part shade. Jun.-Sep.
Leucanthemum	x superbum	"Christine Hagemann"	A clump-forming perennial with glossy, dark green leaves and white flowers with spidery outer petals and an anemone centre. Height 75cm. Moist soil in sun or part shade. Jun.-Sep.
Leucanthemum	x superbum	"Droitwich Beauty"	A clump-forming perennial with glossy, dark green leaves and ragged white flowers. Height 75cm. Moist soil in sun or part shade. Jun.-Sep
Leucanthemum	x superbum	"Esther Read"	A clump-forming herbaceous perennial with glossy, dark green leaves and double pure white flowers. Height 60cm. Moist soil in sun or part shade. Jun.-Sept.
Leucanthemum	x superbum	"Everest"	A clump-forming perennial with glossy, dark green leaves and freely produced large single white flowers with a yellow centre. Height 50cm. Moist soil in sun or part shade. Jun.-Sept..
Leucanthemum	x superbum	"Fiona Coghill"	A clump-forming herbaceous perennial with glossy, dark green leaves and double creamy white flowers from yellowish buds. Height 70cm. Moist soil in sun or part shade. Jun.-Sept.
Leucanthemum	x superbum	"Goldrausch"	A clump-forming herbaceous perennial with glossy, dark green leaves and semi-double flowers with longer narrow white and shaggy, shorter yellow petals. Height 40cm. Moist soil in sun or

part shade. Jun.-Sept.

Leucanthemum	x superbum	"Little Miss Muffet"	A dwarf clump-forming herbaceous perennial with glossy, dark green leaves and semi-double pure white flowers. Height 30cm. Moist soil in sun or part shade. Jun.-Sept.
Leucanthemum	x superbum	"Schneehurken"	A clump-forming perennial with glossy, dark green leaves and double white lacinate flowers. Height 45-55cm. Moist soil in sun or part shade. Jun.-Sep.
Leucanthemum	x superbum	"Silver Spoon"	A clump-forming perennial with feathery, dark green leaves and pure white flowers with spoon-shaped petals and yellow the centre. Height 1.2m. Moist soil in sun or part shade. Jun.-Sep.
Leucanthemum	x superbum	"Sonnenschein"	A clump-forming perennial with glossy, dark green leaves and large creamy-yellow flowers. Height 60cm. Moist soil in sun or shade. Jun.-Sep.
Leucanthemum	x superbum	"T. E. Killin"	A clump-forming perennial with glossy, dark green leaves and large, flat, open, single flowered white daisies. Height 60cm. Moist soil in sun or shade. Jun.-Sep.
Leucanthemum	x superbum	"Wirral Pride"	A clump-forming perennial with glossy, dark green leaves and short white petals around the yellow centre and longer haphazardly cascading outer petals. Height 75cm. Moist soil in sun or part shade. Jun.-Sep.
Leucanthemum	x superbum	"Wirral Supreme"	A clump-forming perennial with glossy, dark green leaves and dense white flowers with shorter petals in the centre. Height 90cm. Moist soil in sun or part shade. Jun.-Sep.
Leucorum	aestivum		A robust, bulbous perennial with narrow dark green leaves, and chocolate-scented, bell-shaped white flowers with green tips. Height 45-60cm. Moist soil in sun. Apr.-May.

Leucojum	aestivum	"Gravetye Giant"	A very robust, bulbous perennial with narrow dark green leaves, chocolate-scented, bell-shaped white flowers with green tips. Height 90cm. Moist soil in sun. Apr.-May.
Leucojum	autumnale		A slender, bulbous perennial with narrow, grass-like leaves and bell-shaped white flowers with red-tinged bases. Height 10-15cm. Moist soil in full sun. Aug.-Sep.
Leucojum	autumnale	"September Snow"	A slender, bulbous perennial with narrow, grass-like leaves and bell-shaped white flowers without any pink in the colour. Height 10-15cm. Moist soil in full sun. Aug.-Sep.
Leucojum	vernum		A bulbous perennial with erect, narrow dark green leaves and pretty bell-shaped white flowers with green tips. Height 20-30cm. Moist soil in sun. March to April.
Lewisia		"George Henley"	Fleshy rosettes of dark green leaves and purplish pink flowers with magenta veining. Height 10cm. Gritty soil in sun or part shade. May-Aug.
Lewisia		"Little Plum"	Fleshy rosettes of narrow dark green leaves and large pink flushed flowers on a white background with plum veining. Height 10cm. Gritty soil in sun or part shade. May-Aug.
Lewisia		"Rawreth"	Small hybrid lewisia with fleshy leaves and apricot pink flowers on short stems. Height 8cm. Gritty soil in full sun. May-Aug.
Lewisia	brachycalyx		A choice dwarf alpine forming a rosette of fleshy, dark green leaves and funnel-shaped white or pale pink flowers. Height 8cm. Well-drained soil in sun. May-Jun. Dislikes winter wet.
Lewisia	columbiana	var. rupicola	Evergreen rosettes of narrow green leaves with umbels of small reddish purple flowers on 15cm. stems. Well-drained soil in sun.
Lewisia	cotyledon	"Snowstorm"	An evergreen with radiating fleshy rosettes and large white

			flowers. Height 30cm. Gritty well-drained soil in sun or part shade. Protect from winter wet.
Lewisia	cotyledon	"Sunset Strain"	A choice alpine forming a flat rosette of fleshy, dark green leaves and clusters of flowers in various shades of orange. Height 30cm. Gritty well-drained soil in sun or part shade. Protect from winter wet
Lewisia	cotyledon	hybrids	An evergreen with flowers in shades of pink, white, yellow and orange. Height 30cm. Gritty well-drained soil in sun or part shade. Protect from winter wet.
Lewisia	cotyledon var. heckneri		An evergreen with radiating dark green leaves and pink flowers with a white edge. Height 20cm. Gritty well-drained soil in sun or part shade. Protect from winter wet.
Lewisia	cotyledon var. howellii		A smaller version of the species with crimped, undulating leaves. Collected Siskiyou Co. California, not seen in flower. Gritty well-drained soil in sun or part shade.
Lewisia	cotyledon var. purdyi		An evergreen with tight rosettes of dark green leaves and pink or yellow flowers with a paler edge. Height 20cm. Gritty well-drained soil in sun or part shade. Protect from winter wet.
Lewisia	longipetala		A choice dwarf alpine forming a tuft of narrow, dark green leaves and star-shaped pink flowers with white edges. Height 10cm. Well-drained soil in sun. May-Jun. Needs winter protection from the wet.
Lewisia	nevadensis		A deciduous species with rosettes of narrow, dark green leaves and open, star-shaped white flowers. Height 10cm. Well-drained soil in sun. Apr.-Aug.
Lewisia	nevadensis	"Rosea"	A deciduous species with rosettes of narrow, dark green leaves and open, star-shaped shell-pink flowers. Height 10cm. Well-drained soil in sun. Apr.-Aug.

Lewisia	pygmaea		A deciduous species with small very narrow succulent leaves and small mauve-pink flowers with white lines. Height 10cm. Well-drained soil in sun. Apr.-Jun.
Lewisia	rediviva		A deciduous <i>Lewisia</i> where the leaves appear during winter and wither away in late spring. Large pink or white flowers then appear after the leaves have died. Height 5cm. Alpine house or gritty soil in sun. May.-Jun. Withhold water after flowering.
Lewisia	rediviva	"Alba"	A deciduous <i>Lewisia</i> with large white flowers before the leaves. Height 5cm. Alpine house or gritty soil in sun. Mar.-Jun.
Lewisia	rediviva x pygmaea		An herbaceous perennial with narrow succulent leaves and relatively large white flowers heavily veined and flushed pink. Height 8cm. Well-drained soil in sun. Apr.-May.
Lewisia	tweedyi		Flat rosettes of fleshy, mid-green leaves and large white to peach-pink flowers. Height 20cm. Well-drained soil. Alpine house. Mar.-Jun.
Lewisia	tweedyi	"Rosea"	Flat rosettes of fleshy, mid-green leaves and large rose-pink flowers paling towards the centre. Height 20cm. Well-drained soil. Alpine house. Mar.-Jun.
Leycesteria	formosa		An upright deciduous shrub with blue-green young stems and pendent white flowers surrounded by purple-red bracts, followed by purple-red berries. Height 2m. Spread 2m. Well-drained soil in sun or part shade. Flowers from July to September. Prune out old f
Libertia	peregrinans		A clump-forming evergreen perennial with narrow orange/green leaves with conspicuous veins and with white flowers on stems shorter than the leaves. Height 50cm. Moist well-drained soil in sun . Jun.-Jul.

Ligularia		"Osiris Fantaisie"	A shorter Ligularia with dark, toothed purple-backed foliage and stems of bright yellow daisy flowers. Height 50cm. Moist soil in sun or part shade. Jul.-Sep.
Ligularia		"The Rocket"	A large clump-forming perennial with boldly toothed leaves, and long black stems bearing slender racemes of yellow flowers with orange-yellow centres. Height 1.8m. Moist soil in sun or part shade. Jul.-Aug.
Ligularia	dentata	"Britt-Marie Crawford"	Glossy dark chocolate leaves with purple backs and large deep orange flowers. Height 1m. Moist soil in sun or part shade. Jul.-Sep.
Ligularia	dentata	"Desdemona"	A large clump-forming herbaceous perennial with brownish green, rounded leaves, maroon beneath and tall red stems of deep orange flowers with brown centres. Height 1m. Moist soil in sun or part shade. Jul.-Sept.
Ligularia	dentata	"Othello"	A large clump-forming perennial with deep purplish green leaves, and red stems of deep orange flowers. Height 1m. Moist soil in sun or part shade. Jul.-Sep.
Ligularia	przewalskii		A clump-forming perennial with deeply cut leaves. Purple-green stems bear racemes of yellow flowers. Height 90cm. Moist fertile soil in sun or part shade. Jul.-Aug.
Lilium	formosanum var. pricei		Trumpet-shaped fragrant white flowers strongly flushed purple on the outside. Height 10-30cm. Well-drained soil in sun. Jun.-Jul.
Lilium	martagon		A beautiful lily with nodding turkscap flowers of pink to purplish red with darker spotting. Height 1-2m. Well-drained soil in sun. Jun.-Jul.
Lilium	martagon var. cattaniae		A beautiful lily with nodding turkscap flowers of dark purple atop dark hairy stems. Height 80cm. Well-drained soil in sun. Jun.-Jul.

Lilium	nepalense		A beautiful lily with funnel-shaped flowers of greenish yellow with maroon in the centre. Height 60-100cm. Well-drained acid soil in part shade. Jun.-Jul.
Linaria		"Pink Budgies"	An erect perennial with narrow grey-green leaves and whirls of pink and white flowers. Height 60cm. Well-drained soil in sun. Jul.-Aug.
Linaria	purpurea	"Brown's White"	An erect perennial with greyish leaves and slender spikes of bright white flowers. Height 55cm. Well-drained soil in sun. May-Oct.
Linum	dolomiticum		A tufted alpine with dull green leaves and bright yellow flowers. Height 10-15cm. Well-drained soil in sun. Jun.-Aug. Protect from winter wet.
Liquidambar	acalycina		A Chinese species with three-lobed leaves maroon tinted when young maturing to deep green. Autumn colour is a mixture of mauve and purple. Height after 10yrs., 5m. Moist well-drained soil in sun. Shelter from cold drying winds.
Liquidambar	formosana		A broadly conical deciduous tree with deeply divided leaves, purple when young, turning brilliant orange, red and purple in autumn. Height 12m. Spread 10m. Moist well-drained soil in sun. Shelter from cold drying winds.
Liquidambar	orientalis		A slow growing small tree with small, glossy multi-lobed leaves that turn an orange colour in autumn. Height after 10 years, 5m. Moist, well-drained soil in sun.
Liquidambar	styraciflua	"Anja"	An form of sweet gum with branches being more horizontal than most varieties. Deeply divided, glossy leaves, turning dark red and orange in autumn. Height after 10yrs. 5m. Spread 1.5m. Eventual height 15m. Spread 8m. Moist well-

			drained soil in sun. Shelt
Liquidambar	styraciflua	"Aurea"	A broadly conical deciduous tree with palmate green leaves with irregular yellow markings. The leaves turn a variety of colours in the autumn from pure gold to deep burgundy. Height after 10yrs. 5m. Moist well-drained soil in sun. Shelter from cold dryin
Liquidambar	styraciflua	"Burgundy"	A broadly conical deciduous tree with deeply divided, glossy leaves, turning dark maroon in autumn. Height after 10yrs., 5m. Moist well-drained soil in sun. Shelter from cold drying winds.
Liquidambar	styraciflua	"Festeri"	A broadly conical deciduous tree with deeply divided, glossy leaves, turning dark blackish red in autumn. Height after 10 yrs., 5m. Moist well-drained soil in sun. Shelter from cold drying winds.
Liquidambar	styraciflua	"Gumball"	A shrubby form of Liquidambar with deeply divided, glossy leaves, turning shades of deep red in autumn. Height 2-3m. Spread 2m. Moist well-drained soil in sun. Shelter from cold drying winds.
Liquidambar	styraciflua	"Happidaze"	A broadly conical upright deciduous tree with corky bark and deeply divided, glossy leaves, turning dark maroon in autumn. Height after 10yrs. 4.5m. Moist well-drained soil in sun. Shelter from cold drying winds. Retains its leaves for a long time.
Liquidambar	styraciflua	"Kia"	A broadly conical upright deciduous tree with deeply divided, glossy leaves, turning red in autumn. Height after 10yrs. 4.5m. Moist well-drained soil in sun. Shelter from cold drying winds.
Liquidambar	styraciflua	"Lane Roberts"	A broadly conical deciduous tree with deeply divided, glossy leaves, turning dark blackish red

in autumn. Height after 10 yrs. 5m. Moist well-drained soil in sun. Shelter from cold drying winds.

Liquidambar	styraciflua	"Midwest Sunset"	A broadly conical deciduous tree with deeply divided, glossy leaves, turning shades of red in autumn. Height after 10 yrs., 5m. Moist well-drained soil in sun. Shelter from cold drying winds.
Liquidambar	styraciflua	"Moonbeam"	A small upright deciduous tree with deeply divided, glossy yellow green leaves, turning red in autumn. Height after 10yrs. 5m. Moist well-drained soil in sun. Shelter from cold drying winds.
Liquidambar	styraciflua	"Oconee"	A broadly conical upright compact deciduous tree with deeply divided, glossy leaves, smaller than type. turning deep maroon in autumn. Height after 10yrs. 4.5m. Moist well-drained soil in sun. Shelter from cold drying winds.
Liquidambar	styraciflua	"Palo Alto"	An upright growing deciduous tree with deeply divided, glossy leaves, turning shades of red and gold in autumn. Height after 10yrs. 5m. Moist well-drained soil in sun. Shelter from cold drying winds.
Liquidambar	styraciflua	"Parasol"	An upright, spreading, slightly pendulous, growing deciduous tree with deeply divided, glossy leaves, turning shades of red and in autumn. Height after 10yrs. 5m. Moist well-drained soil in sun. Shelter from cold drying winds.
Liquidambar	styraciflua	"Rotundiloba"	A new variety of this broadly conical deciduous tree with unusual rounded fig-like, glossy leaves, turning a good red in autumn. Height after 10yrs. 5m. Moist well-drained soil in sun. Shelter from cold drying winds.

Liquidambar	styraciflua	"Silver King"	A broadly conical tree with deeply divided, glossy green leaves with cream edges, turning brilliant orange, red and purple in autumn. Height after 10yrs. 5m. Moist well-drained soil in sun. Protect from cold winds.
Liquidambar	styraciflua	"Slender Silhouette"	An interesting form of sweet gum that stays narrow to maturity. Deeply divided, glossy leaves, turning orange-yellow in autumn. Height after 10yrs. 5m. Spread 1m. eventual height 15m. Spread 2m. Moist well-drained soil in sun. Shelter from cold drying wi
Liquidambar	styraciflua	"Stared"	A broadly conical deciduous tree with narrow lobed, deeply divided, glossy leaves, turning red-orange and yellow in autumn. Height after 10yrs. 5m. Moist well-drained soil in sun. Shelter from cold drying winds.
Liquidambar	styraciflua	"Stella"	A broadly conical deciduous tree with narrow lobed, deeply divided, glossy leaves, turning red-orange and yellow in autumn. Height after 10yrs. 5m. Moist well-drained soil in sun. Shelter from cold drying winds.
Liquidambar	styraciflua	"Worplesdon"	A broadly conical deciduous tree with deeply divided, glossy leaves, turning purple then orange-yellow in autumn. Height after 10yrs. 5m. Moist well-drained soil in sun. Shelter from cold drying winds.
Liriodendron	tulipifera		Tulip Tree. A vigorous tree with saddle-shaped, dark green leaves, turning yellow in autumn. Cup-shaped pale green flowers with orange bands at the bases. Height 30m. Spread 15m. Moist well-drained soil in sun or part shade. July to August.
Liriodendron	tulipifera	"Aureomarginatum"	A vigorous tree with saddle-shaped, dark green leaves, with broad yellow margins. Cup-shaped pale green flowers with orange bands at the bases eventually. Height 20m. Spread

			10m. Moist well-drained peaty soil in sun or part shade. July to August.
Liriodendron	tulipifera	"Fastigiatum"	A narrowly conical tree with upright branches and saddle-shaped, dark green leaves, turning yellow in autumn. Cup-shaped pale green flowers with orange bands at the bases. Eventual height 20m. Spread 8m. Moist well-drained soil in sun or part shade. Flowe
Liriope	muscari		An evergreen perennial with narrow dark green leaves, and dense spikes of bright violet-mauve flowers. Height 30cm. moist well-drained soil in part shade. Sep.-Nov.
Liriope	muscari	"Okina"	An evergreen perennial with the new foliage white with a thin green edge, turning green with age. Produces spikes of purple flowers. Height 30cm. Moist well-drained soil in sun or part shade. Sep.-Nov
Lithodora	diffusa	"Grace Ward"	A trailing evergreen shrub with narrow, dark green leaves and clusters of long-lasting rich azure-blue flowers. Height 15cm. Spread 60cm. Well-drained acid soil in sun. May-Aug.
Lithodora	diffusa	"Heavenly Blue"	A prostrate evergreen shrub with narrow dark green leaves and clusters of azure-blue starry flowers. Height 15cm. Spread 60cm. Moist acid soil in sun. May-Aug.
Lithodora	diffusa	"Inverleith"	A deep blue flowered variety perhaps not as spreading as the type species. A prostrate evergreen shrub with narrow dark green leaves. Height 15cm. Moist acid soil in sun. May-Aug.
Lithodora	diffusa	"Picos"	A compact growing, deep blue flowered variety. A prostrate evergreen shrub with narrow dark green leaves. Height 15cm. Moist soil in sun. May-Aug. Will grow in more alkaline soil.

Lithodora	oleifolia		A semi-upright evergreen shrub with dark green leaves and clusters of sky-blue starry flowers opening from pink-tinted buds. Height 20cm. Well-drained peaty soil in sun. May-Jun.
Lithodora	zahnii		A much branched shrublet with narrow linear deep green leaves and terminal clusters of blue/white flowers. Height 30cm. Well-drained soil in sun or Alpine house. Mar.-Apr.
Lobelia		"Bee's Flame"	Spikes of large bright scarlet flowers up to 80cm. Jul.-Oct. Full sun in moist well-drained soil. Needs protection from winter wet.
Lobelia		"Cherry Ripe"	Clumps of mid-green leaves often suffused maroon with stems topped with lipped tubular flowers of bright cherry-red. Height 90cm. Moist soil in sun or part shade. Jul.-Aug.
Lobelia		"Cinnabar Rose"	A clump forming perennial with light green leaves and spikes of deep cerise-pink flowers. Height 1.2m. Moist soil in sun or part shade. Jul.-Aug.
Lobelia		"Compliment Scarlet"	Bright green basal leaves and spikes of large bright scarlet-red flowers. Height 75cm. Full sun in moist well-drained soil. Needs protection from winter wet. Jul.-Oct.
Lobelia		"Dark Crusader"	A hybrid with maroon stems and leaves and velvety deep red flowers. Height 80cm. Moist soil in sun or part shade. Jul.-Aug.
Lobelia		"Grape Knee High"	Clumps of glossy green leaves and spikes of lilac-purple flowers. Height 40cm. Full sun in moist well-drained soil. Aug.-Sept. Needs winter protection.
Lobelia		"Monet Moment"	Clumps of glossy green leaves and spikes of rosy violet-pink flowers with white throats. Height 1m. Full sun in moist well-drained soil. Aug.-Sept. Needs winter protection.

Lobelia		"Rosenkavalier"	Clumps of glossy light green leaves and spikes of pink flowers. Height 75cm. Full sun in moist well-drained soil. Aug.-Sept. Probably needs winter protection.
Lobelia		"Ruby Slipper"	Clumps of glossy green leaves and spikes of ruby-red flowers. Height 75cm. Full sun in moist well-drained soil. Aug.-Sept. Needs winter protection.
Lobelia		"Russian Princess"	Spikes of deep magenta red flowers over dark crimson leaves. Height 75-90cm. Full sun in moist well-drained soil. Aug.-Sept. Needs winter protection.
Lobelia		"Sparkling Ruby"	Clumps of glossy green leaves and spikes of ruby-red flowers. Height 1m. Full sun in moist well-drained soil. Aug.-Sept. Needs winter protection.
Lobelia		"Tania"	A hybrid with mid-green leaves and spikes of crimson-purple flowers. Height 1m. Moist soil in sun or part shade. Jul.-Aug.
Lobelia	cardinalis	"Queen Victoria"	A short-lived perennial with deep purple-red stems and leaves, and spikes of scarlet flowers. Height 90cm. Moist soil in sun or part shade. Aug.-Oct.
Lobelia	siphilitica		A clump-forming perennial with soft hairy light green leaves and bright blue flowers with leafy green bracts. Height 60-120cm. Moist soil in sun or part shade. Aug.-Oct.
Lobelia	siphilitica	"Alba"	A clump-forming perennial with soft hairy light green leaves and white flowers with leafy green bracts. Height 60-120cm. Moist soil in sun or part shade. Aug.-Oct.
Lobelia	x gerardii	"Hadspen Purple"	A clump-forming perennial with mid-green leaves. Stout stems with bright purple flowers. Height 60-120cm. Moist soil in sun or part shade. Jul.-Oct.
Lobelia	x gerardii	"Vedrariensis"	A clump-forming perennial with dark green leaves, often suffused red. Stout stems with violet-purple flowers. Height 60-120cm.

			Moist soil in sun or part shade. Jul.-Oct.
Lobelia	x speciosa	"Royal Velvet"	Clumps of glossy green leaves and loose spikes of dark velvety-red flowers. Height 60cm. Full sun in moist well-drained soil. Aug.-Sept. May need winter protection.
Lonicera		"Golden Trumpet"	A twining deciduous climber with oval lime-green leaves and golden orange trumpet flowers. Height 5m. Well-drained soil in sun or part shade. Flowers from June to August.
Lonicera		"Honey Baby"	Of compact habit, this honeysuckle has cream, highly scented flowers. Height 3m. Well-drained soil in sun or part shade. May to June. Prune out flowering wood after flowering.
Lonicera		"Mandarin"	A twining, deciduous climber with oval, blue-green leaves. Very free flowering with large flowerheads of a vibrant mandarin-orange. Height 5m. Well-drained soil in sun or part shade.
Lonicera	fragrantissima		A bushy upright deciduous shrub with very fragrant creamy white flowers before the mid-green leaves. This is followed by dull red berries. Height 2m. Moist well-drained soil in sun or part shade. February to March.
Lonicera	giraldii		A short-growing evergreen climber with slender hairy stems carrying narrow oblong leaves. The flowers are purplish-red with yellow stamens, about 2cm. long. Height 2m. Moist well-drained soil in sun or part shade. Flowers during June and July.
Lonicera	glaucescens		A bushy plant with twining stems with narrow elliptic leaves green above and glaucous below. Orange-yellow flowers in terminal clusters followed by dense clusters of orange-red berries. Height 1-2m. Well-drained soil in sun or part shade.

Flowers from Jun

Lonicera	henryii		A twining, semi-evergreen climber with glossy dark green leaves and fragrant yellow throated purplish red flowers followed by purple-black berries. Height 10m. Well-drained soil in sun or part shade. June to July.
Lonicera	infundibulum var. rockii		A deciduous shrub with white scented flowers before the leaves. The emerging leaves have a purple tinge. Height and spread 1.5m. Well-drained soil in sun or part shade. Flowers from February to March.
Lonicera	involucrata		A bushy shrub with bright mid-green leaves and dark yellow flowers surrounded by large green bracts that turn red in late spring, followed by glossy black berries. Height 2m. Spread 3m. Well-drained soil in sun. Flowers from May to June.
Lonicera	involucrata var. ledebourii		A bushy shrub with bright mid-green, hairy leaves and dark orange-yellow flowers surrounded by large green bracts that turn red in late spring, followed by glossy black berries. Height 2m. Spread 3m. Well-drained soil in sun. Flowers from May to June.
Lonicera	japonica	"Mint Crisp"	An evergreen, twining plant with attractive green leaves with cream margins and fragrant cream and yellow flowers. Height 5m. Well-drained soil in sun. June to July.
Lonicera	periclymenum	"Belgica"	A twining, deciduous climber with mid-green, oval leaves and very fragrant white flowers that turn yellow. and are richly streaked red outside. Height 7m. Well-drained soil in sun or part shade. May to June. Red fruit in autumn.
Lonicera	periclymenum	"Graham Thomas"	A twining deciduous climber with oval lime-green leaves and very fragrant white flowers that turn

			yellow. Height 7m. Well-drained soil in sun or part shade. Flowers from June to August.
Lonicera	periclymenum	"Red Gables"	A twining, deciduous climber with mid-green, oval leaves and very fragrant creamy-white flowers that are richly streaked red outside. Height 7m. Well-drained soil in sun or part shade. May to June. Red fruit in autumn. Thin out old wood in March.
Lonicera	periclymenum	"Serotina"	A twining deciduous climber with mid-green leaves and very fragrant creamy white flowers streaked dark purple-red. Height 7m. Well-drained soil in sun or part shade. Flowers from May to June.
Lonicera	rupicola var. syringantha		A graceful, deciduous, rounded shrub with grey-green leaves, and very fragrant lilac-pink flowers, followed by red berries. Height 2-3m. Spread 2m. Well-drained soil in sun or part shade. Flowers from May to June.
Lonicera	standishii		An upright shrub with bristly congested stems and dark green leaves. Very fragrant creamy white flowers before the leaves, followed by red berries. Height 2m. Well-drained soil in sun or part shade. November to March.
Lonicera	standishii	"Budapest"	An upright shrub with bristly congested stems and dark green leaves. Very fragrant light pink flowers before the leaves, followed by red berries. Height and spread 1.5m. Well-drained soil in sun or part shade. Flowers from November to March.
Lonicera	tartarica	"Hack's Red"	A large, dense, twiggy bush with oval sea-green leaves and fragrant deep rose-pink flowers. Height 3m. Spread 2m. Moist well-drained soil in sun or part shade. Flowers from March to May.
Lonicera	x brownii	"Dropmore Scarlet"	A twining, deciduous climber with blue-green leaves. Clusters of rich bright scarlet trumpet-shaped flowers, orange inside.

			Height 4m. Moist well-drained soil in sun or part shade. Flowers from June to August.
Lonicera	x purpusii	"Winter Beauty"	A rounded semi-evergreen, hardy shrub with purple-red stems and dark green leaves. Very fragrant white flowers from November to March. Height 2m. Well-drained soil in sun or part shade. Cut out old flowering stems in April.
Lonicera	x xylosteoides	"Clavey's Dwarf"	A small shrub with greyish-green elliptic leaves and small creamy yellow flowers followed by relatively large red berries. Height 2m. Spread 1.5m. Moist well-drained soil in sun. Flowers from May to June.
Lupinus		"Beefeater"	A clump-forming perennial with attractive foliage and spikes of pure red flowers with slight yellow flecking. Height 75cm. Well-drained soil in sun or part shade. Jun.-Jul.
Lupinus		"Blossom"	A clump-forming perennial with attractive foliage and spikes of pink flowers with a white flush. Height 75cm. Well-drained soil in sun or part shade. Jun.-Jul.
Lupinus		"Chandelier"	A clump-forming perennial with attractive foliage and spikes of bright yellow flowers. Height 90cm. Well-drained soil in sun or part shade. Jun.-Jul.
Lupinus		"Garden Gnome"	A dwarf selection of "Russell" lupins with a good range of colours including bi colours. Height 60cm. Well-drained soil in sun or part shade. Jun.-Jul.
Lupinus		"Gladiator"	A clump-forming perennial with attractive foliage and spikes of orange and yellow flowers. Height 75cm. Well-drained soil in sun or part shade. Jun.-Jul.
Lupinus		"Manhattan Lights"	A clump-forming perennial with attractive foliage and spikes of bicoloured flowers, purple with yellow standards. Height 90cm. Well-drained soil in sun or part shade. Jun.-Jul.

Lupinus	"Masterpiece"	A clump-forming perennial with attractive foliage and spikes of rich purple flowers, with orange flecks in the standards. Height 75cm. Well-drained soil in sun or part shade. Jun.-Jul.
Lupinus	"My Castle"	A clump-forming perennial with attractive foliage and spikes of deep rose-pink flowers. Height 90cm. Well-drained soil in sun or part shade. Jun.-Jul.
Lupinus	"Noble Maiden"	A clump-forming perennial with attractive foliage and spikes of creamy white flowers. Height 90cm. Well-drained soil in sun or part shade. Jun.-Jul.
Lupinus	"Persian Slipper"	A clump-forming perennial with attractive foliage and spikes of lagoon blue flowers, with white flecks. Height 90cm. Well-drained soil in sun or part shade. Jun.-Jul.
Lupinus	"Red Rum"	A clump-forming perennial with attractive foliage and spikes of red flowers with a white fleck. Height 90cm. Well-drained soil in sun or part shade. Jun.-Jul.
Lupinus	"Russell Strain Reselected"	A mixture of this well-known strain with a better colour range of blues, pinks, reds, yellows whites and bicolours. Height 90cm. Well-drained soil in sun or part shade. Jun.-Jul.
Lupinus	"Salmon Star"	A clump-forming perennial with attractive foliage and spikes of coppery orange flowers. Height 90cm. Well-drained soil in sun or part shade. Jun.-Jul.
Lupinus	"Tequila Flame"	A clump-forming perennial with attractive foliage and spikes of bicoloured flowers, red and yellow. Height 90cm. Well-drained soil in sun or part shade. Jun.-Jul.
Lupinus	"Terracotta"	A clump-forming perennial with attractive foliage and spikes of rusty coloured flowers. Height 90cm. Well-drained soil in sun or part shade. Jun.-Jul.

Lupinus		"The Chatelaine"	A clump-forming perennial with attractive foliage and spikes of bicoloured pink and white flowers. Height 90cm. Well-drained soil in sun or part shade. Jun.-Jul.
Lupinus		"The Governor"	A clump-forming perennial with attractive foliage and spikes of bicoloured deep blue and white flowers. Height 90cm. Well-drained soil in sun or part shade. Jun.-Jul.
Lupinus		"The Pages"	A clump-forming perennial with attractive foliage and spikes in shades of rich carmine-red flowers. Height 90cm. Well-drained soil in sun or part shade. Jun.-Jul.
Lupinus		"Towering Inferno"	A clump-forming perennial with attractive foliage and spikes of orange flowers with pink tips. Height 90cm. Well-drained soil in sun or part shade. Jun.-Jul.
Lupinus		"Tutti Frutti"	A seed raised strain, forming clumps of digitate leaves with impressive spikes of bicoloured flowers in a wide array of colours. height 1m. moist well-drained soil in sun. Jul.-Aug.
Lupinus	arboreus		A bushy evergreen shrub with grey-green foliage and fragrant spikes of generally yellow flowers, but could be blue. Height 2m. Spread 2m. Well-drained soil in sun or part shade. May-Aug..
Lupinus	arboreus	"Blue"	A bushy evergreen shrub with grey-green foliage and fragrant spikes of blue and white flowers. Height 2m. Spread 2m. Well-drained soil in sun or part shade. May-Aug..
Lychnis	coronaria	"Alba"	An erect perennial with woolly silver-grey leaves and open pure white flowers. Height 90cm. Well-drained soil in sun. Jun.-Sep.
Lychnis	coronaria	"Atrosanguinea Group"	An erect perennial with woolly silver-grey leaves and open blood red flowers. Height 75cm. Well-drained soil in sun or part shade.

Jun.-Aug.

Lychnis	coronaria	"Gardener's World"	A double-flowered form of this erect perennial with woolly silver-grey leaves and double deep-crimson flowers. Height 55cm. Well-drained soil in sun or part shade. Jun.-Aug.
Lychnis	coronaria	"Hutchinson's Cream"	An erect perennial with woolly silver-grey leaves with irregular creamy stripes and open pure white flowers. Height 90cm. Well-drained soil in sun. Jun.-Sep.
Lychnis	coronaria	"Oculata Group"	An erect perennial with woolly silver-grey leaves and open white flowers with a pink eye. Height 90cm. Well-drained soil in sun or part shade. Jun.-Aug.
Lychnis	flos-cuculi		"Ragged Robin". A British native wild flower with bluish green leaves and star-shaped pale to bright purplish pink, sometimes white flowers. Height 75cm. Moist well-drained soil in sun or part shade. May-Jun.
Lychnis	flos-cuculi	"Jenny"	Large rosettes of deep green lanceolate leaves and branched stems of ragged double candy pink flowers. Height 75cm. Moist well-drained soil in sun or part shade. May-Jun.
Lychnis	flos-cuculi	"Nana"	A dwarf perennial with star-shaped white or pink flowers. Height 15cm. Moist well-drained soil in sun or part shade. May-Jun.
Lychnis	flos-jovis		A perennial with grey hairy leaves and pink, white or scarlet flowers from early to late summer. Height 20-60cm. Well-drained soil in sun. Jun.-Aug.
Lysimachia	ephemerum		A clump-forming perennial with narrow grey-green leaves and attractive spikes of white flowers. Height 1m. Moist well-drained soil in sun or shade. Jun.-Jul.
Lythrum	salicaria	"Blush"	A clump-forming erect perennial with tall spikes of soft light pink flowers. Height 1.2m. Moist soil

			in sun. Jul.-Sep.
Lythrum	salicaria	"Firecandle"	A clump-forming erect perennial with narrow leaves and tall spikes of rose-red flowers. Height 90cm. Moist soil in sun. Jul.-Sep.
Lythrum	salicaria	"Robert"	A clump-forming erect perennial with tall spikes of bright pink flowers. Height 90cm. Moist soil in sun. Jul.-Sep.
Lythrum	salicaria	"Robin"	A dwarfed form of our native purple loosestrife. It is a clump-forming erect perennial with spikes of bright pink flowers. Height 40-50cm. Moist soil in sun. Jul.-Sep.
Lythrum	salicaria	"Swirl"	A clump-forming erect perennial with narrow leaves and spikes of dark pink flowers. Height 70cm. Moist soil in sun. Jul.-Sep.
Lythrum	virgatum	"Dropmore Purple"	A clump forming perennial with narrow leaves and erect spikes of clear purple star-shaped flowers. Height 80-100cm. Moist soil in sun. Jul.-Sep.
