

Paeonia	anomala		A clump forming perennial, this variable species has varying degrees of cut foliage and single flowers generally rosy-pink. Height 40-50cm. Moist well-drained sheltered site in sun or part shade. May-Jun.
Paeonia	cambessedesii		Biternate leaves, greyish with purple undersides, the flowers are single, pink with yellow stamens. Height 25-35cm. Well-drained sheltered site in sun.
Paeonia	delavayi		A species tree peony with upright growth and deeply cut dark green leaves, produces single, cup-shaped, rich dark red flowers. Height 2m. Moist well-drained soil in sun. Apr.-May.
Paeonia	delavayii var. ludlowii		An upright shrub with deeply cut leaves, and large single, cup-shaped, yellow flowers. Height 2.5m. Moist well-drained soil in sun or part shade. Apr.-May.
Paeonia	lactiflora	"Blaze"	A clump-forming perennial with mid-green foliage and pretty, single rich carmine-red flowers with a central boss of yellow stamens. Height 75cm. Moist well-drained soil in sun or part shade. May-Jun.
Paeonia	lactiflora	"Bowl of Beauty"	A clump-forming perennial with mid-green foliage and pretty, single large, bowl-shaped rose-pink flowers with a central boss of creamy yellow stamens. Height 90cm. Moist well-drained soil in sun or part shade. Apr.-May.
Paeonia	lactiflora	"Sarah Bernhardt"	A clump-forming perennial with mid-green, deeply cut foliage and pretty, very large double, apple blossom pink flowers tinted and shaded with silver. Height 90cm. Moist well-drained soil in sun or part shade. May-Jun.

Paeonia	<i>lactiflora</i>	"Sword Dance"	A clump-forming perennial with mid-green foliage and pretty, single rich red flowers with a central boss of yellow stamens. Height 60cm. Moist well-drained soil in sun or part shade. May-Jun.
Paeonia	<i>mascula</i>		A clump-forming perennial with deep grey-green divided foliage and pretty, single, cup-shaped pink through to magenta flowers. Height 35cm. Probably best in a well-drained sunny spot. Apr.-May.
Paeonia	<i>mascula</i> ssp. <i>arietina</i>		A clump-forming perennial with deep green divided foliage, hairy beneath and pretty, single, cup-shaped pink-purple flowers with yellow stamens. Height 35cm. Probably best in a well-drained sunny spot. Apr.-May.
Paeonia	<i>mlokosewitschii</i>		A clump-forming perennial with large bright green foliage, producing single bowl-shaped, pale lemon-yellow flowers with a conspicuous mass of golden yellow stamens. Height 1m. Moist well-drained soil in sun or part shade. Apr.-May.
Paeonia	<i>obovata</i> var. <i>alba</i>		Leaves in double whorls of three with ovate leaflets. Single globose flowers, pure white, with dark blue seed pods and scarlet seeds. Height 40-50cm. Well-drained soil in sun or part shade. May-Jun.
Paeonia	<i>peregrina</i>		A clump-forming perennial with deep green, glossy divided foliage and pretty, single, cup-shaped ruby-red flowers with pink filaments. Height 35cm. Probably best in a well-drained sunny spot. Apr.-May.
Paeonia	<i>tenuifolia</i>		Finely divided dark green foliage emerges in early spring followed by cup-shaped deep crimson flowers. Height 35cm. Well-drained soil in sun. Apr.-May.

Paeonia	veitchii		A clump-forming perennial with deep green foliage and pretty, single, cup-shaped, white to pale magenta flowers with a central boss of stamens. Height 30-40cm. Moist well-drained sheltered site in sun or part shade. May-Jun.
Paeonia	veitchii var woodwardii		A clump-forming perennial with deep green foliage and pretty, single, cup-shaped, rose-pink flowers with a central boss of stamens. Height 30-40cm. Moist well-drained sheltered site in sun or part shade. May-Jun.
Panicum	virgatum	"Shenandoah"	A clump-forming grass with arching narrow leaves tipped deep purple in summer turning burgundy red in the autumn. Heads of reddish-pink flowers. Height 1.2m. Moist well-drained soil in sun. Jul.-Sept.
Papaver	alboroseum		Rosettes of lobed, lanceolate leaves and short stems of soft rose-pink or white flowers. Height 10cm. Well-drained soil in sun. Jun.-Aug.
Papaver	microcarpum		Rosettes of dissected blue-grey leaves and small peachy-pink flowers with a lighter centre. Height 8cm. Well-drained soil in sun. Jun.-Jul.
Papaver	miyabeianum		Blue-green cleft leaves and soft yellow saucer-shaped flowers. Height 15cm. Well-drained soil in sun or part shade. May-Aug.
Papaver	orientale	"Black and White"	A spreading perennial with bristly, green leaves and single white flowers with a bold, crimson-black basal blotch on each petal. Height 45-70cm. Well-drained soil in sun or part shade. Jun.-Aug.
Papaver	orientale	"Central Park"	A spreading perennial with bristly, green leaves and dark wine-red full flowers with a bold, black basal blotch. Height 85cm. Well-drained soil in sun or part shade. May.-Jul.

Papaver	orientale	"Lauren's Lilac"	A spreading perennial with bristly, green leaves and single soft lilac flowers.. Height 75cm. Well-drained soil in sun or part shade. Jun.-Aug.
Papaver	orientale	"Lilac Girl"	A spreading perennial with bristly, green leaves and large dark plummy red flowers, on stems of 90cm. Flowers May-Jun. Well-drained soil in sun.
Papaver	orientale	"Manhattan"	A spreading perennial with bristly, green leaves and dark lavender-rose flowers with a bold, black basal blotch. Height 85cm. Well-drained soil in sun or part shade. May.-Jul.
Papaver	orientale	"May Queen"	A spreading perennial with bristly, green leaves and double orange-red flowers with quilled petals. Height75cm. Well-drained soil in sun or part shade. May-Jul.
Papaver	orientale	"Miss Piggy"	A spreading perennial with bristly, green leaves. This new variety has large pale lavender-pink frilly flowers and dark purple stamens. Height 75cm. Well-drained soil in sun or part shade. May-Jun.
Papaver	orientale	"Patty's Plum"	A spreading perennial with bristly, green leaves and large single plum coloured flowers. Height 75cm. Well-drained soil in sun or part shade.
Papaver	orientale	"Place Pigalle"	A spreading perennial with bristly, green leaves and flowers ruffled white petalled flowers, with a strong pinkish-red picotee edge. Height 50cm. Moist well-drained soil in sun or shade.
Papaver	orientale	"Scarlet O' Hara"	A shorter variety of this spreading perennial with bristly, green leaves and semi-double scarlet-red flowers, with a black blotch at the base of each petal. Height 50cm. Well-drained soil in sun or part shade. May-Jul.

Papaver	orientale	"Snow Goose"	A spreading perennial with bristly, green leaves and medium-large semi-double, crinkley edged ivory white flowers flushed pale pink with black middles. Height 60cm. Well-drained soil in sun or part shade. May-Jun. and Jul.-Sep.
----------------	-----------	--------------	---

Papaver	orientale	"Tiffany"	A spreading perennial with bristly, green leaves and medium-large soft-greyed maroon-pink flowers with white picotee edges and black middles on strong straight stems Height 85cm. Well-drained soil in sun or part shade. May-Jun,
----------------	-----------	-----------	---

Parrotia	persica		Deciduous tree with flaking grey and fawn bark. Small red flowers produced in Spring before the leaves. The leaves turn yellow, orange and red-purple in Autumn. Grows on any moist, fertile but well-drained soil in full sun.
-----------------	---------	--	---

Parrotia	persica	"Vanessa"	A selection of this deciduous tree that is more upright than the species. Small red flowers are produced in Spring before the leaves. The lush green leaves turn yellow, orange and red-purple in Autumn. Flaking grey and fawn bark appears on mature specimen
-----------------	---------	-----------	---

Paulownia	catapifolia		A broadly columnar deciduous tree with hairy bright heart-shaped green leaves and pretty light purple flowers with darker spots inside. Height 12m. Spread 10m. Well drained soil in sun. May to June. Annual hard prune for a shrubby effect with huge leaves.
------------------	-------------	--	---

Paulownia	fortunei	"Fast Blue"	A large deciduous shrub or small tree with large felty heart-shaped leaves and fragrant pale purple/lilac-blue "foxglove" flowers. Height after 10 years 8m. Spread after 10 years 4m. Well drained soil in sun.
------------------	----------	-------------	--

			Flowers from May to June.
Paulownia	tomentosa		A broadly columnar deciduous tree with hairy bright green leaves and pretty pinkish lilac flowers marked yellow inside. Height 12m. Spread 10m. Well drained soil in sun. May to June. Annual hard prune for a shrubby effect with huge leaves.
Pennisetum	alopecuroides	"Hameln"	A clump-forming evergreen grass with narrow dark green leaves, turning gold in autumn. Attractive greenish white flowers, grey-brown when mature in summer. Height 60-150cm. Well-drained soil in a sheltered sunny spot. July to August.
Pennisetum	alopecuroides	"Little Bunny"	A dwarf, clump-forming evergreen grass with narrow dark green leaves, turning gold in autumn. Attractive greenish white flowers, grey-brown when mature in summer. Height 30cm. Well-drained soil in a sheltered sunny spot. Aug.-Sep.
Penstemon		"Abbotsmerry"	A large-leaved bushy perennial with large, tubular-shaped, deep carmine-red flowers with a dark burgundy-red throat. Height 75cm. Well-drained soil in sun or part shade. Jul.-Sept.
Penstemon		"Alice Hindley"	A large-leaved bushy perennial with large, pretty tubular-shaped, pale lilac-blue flowers with a white throat. Height 90cm. Well-drained soil in sun or part shade. Jul.-Sept.
Penstemon		"Alison's Red"	A small leaved variety with stems of medium-sized pinky-red flowers with dark throat markings. Height 60cm. Well-drained soil in sun or part shade. Jul.-Sep.
Penstemon		"Amelia Jayne"	A large-leaved perennial with large tubular-shaped, deep cerise flowers with a large white throat. Height 80cm. Well-

		drained soil in sun or part shade. Jul.-Sep..
Penstemon	"Andenken an Friedrich Hahn"	A narrow-leaved bushy perennial with large, pretty tubular-shaped, deep wine-red flowers. Height 75cm. Well-drained soil in sun or part shade. Jul.-Sep..
Penstemon	"Apple Blossom"	A narrow-leaved bushy perennial with small, pretty tubular-shaped, pale pink flowers with white throat. Height 45-70cm. Well-drained soil in sun or part shade. Jul.-Sept.
Penstemon	"Beckford"	A large-leaved bushy perennial with large, pretty tubular-shaped, white flowers with a feint mauve blush. Height 60cm. Well-drained soil in sun or part shade. Jul.-Sep..
Penstemon	"Blackbird"	A large-leaved bushy perennial with large, pretty tubular-shaped, deepest purple-red flowers. Height 60cm. Well-drained soil in sun or part shade. Jul.-Sep..
Penstemon	"Bodnant"	A narrow-leaved perennial with tubular-shaped, violet-purple flowers. Height 60cm. Well-drained soil in sun or shade. Jul.-Sep.
Penstemon	"Burgundy"	A large-leaved bushy perennial with large, pretty tubular-shaped, burgundy-pink flowers with a white throat. Height 60-70cm. Well-drained soil in sun or part shade. Jul.-Sept.
Penstemon	"Catherine de la Mare"	A large-leaved bushy perennial with large, pretty tubular-shaped, mid-blue flowers. Height 45cm. Well-drained soil in sun or part shade. Jul.-Sept.
Penstemon	"Charles Rudd"	A large-leaved clump forming perennial with large tubular-shaped, deep purple flowers with a white throat. Height 60cm. Well-drained soil in sun or part shade. Jul.-Sep.

Penstemon	"Czar"	A large-leaved perennial with large tubular-shaped, plum-purple flowers with a large white throat. Height 90cm. Well-drained soil in sun or part shade. Jul.-Sep..
Penstemon	"Eleanor Young"	A large-leaved perennial with large tubular-shaped, dark crimson flowers with a large white throat. Height 80cm. Well-drained soil in sun or part shade. Jul.-Sep..
Penstemon	"Evelyn"	A narrow-leaved bushy perennial with small, pretty tubular-shaped, rose-pink flowers paler pink inside with pink veins. Height 45-70cm. Well-drained soil in sun or part shade. Jul.-Sept.
Penstemon	"Flamingo"	A bushy perennial with small, pretty tubular-shaped, pink flowers with a white spotted throat. Height 90cm. Well-drained soil in sun or part shade. Jul.-Sep. Sheltered site.
Penstemon	"Freshwater Pearl"	A large-leaved bushy perennial with large, pretty tubular-shaped, light pink flowers with a white throat, marked pink. Height 90cm. Well-drained soil in sun or part shade. Jul.-Sept.
Penstemon	"George Elrick"	A large-leaved bushy perennial with large, pretty tubular-shaped, pink flowers with a white throat. Height 60-70cm. Well-drained soil in sun or part shade. Jul.-Sept.
Penstemon	"Hewell's Pink"	A large-leaved perennial with large tubular-shaped, pretty pink flowers with a cream throat. Height 60cm. Well-drained soil in sun or part shade. Jul.-Sep.
Penstemon	"Hidcote Pink"	A narrow-leaved bushy perennial with small, pretty tubular-shaped, pale pink flowers with crimson veins inside. Height 75cm. Well-drained soil in sun or part shade. Jul.-Sep.

Penstemon	"Laura"	A large-leaved perennial with large tubular-shaped, mauve-pink flowers with a large white throat. Height 90cm. Well-drained soil in sun or part shade. Jul.-Sep.
Penstemon	"Lilac Frost"	Rather like <i>P. leonensis</i> with thin stems of toothed lanceolate leaves carry white flowers tinged with purple. Height 60cm. Well-drained soil in sun or part shade. Jul.-Sep.
Penstemon	"Lilliput"	A compact perennial with narrow green leaves with the stems covered with tubular red flowers. Height 40cm. Well-drained soil in sun or part shade. Jun.-Aug.
Penstemon	"Maurice Gibb"	A large-leaved perennial with large tubular-shaped, pretty cerise flowers with a white throat. Height 60cm. Well-drained soil in sun or part shade. Jul.-Sep.
Penstemon	"Midnight"	A large-leaved bushy perennial with large, pretty tubular-shaped, dark indigo-blue flowers with a white throat heavily streaked reddish-purple. Height 90cm. Well-drained soil in sun or part shade. Jul.-Sep. Sheltered site.
Penstemon	"Osprey"	A large-leaved bushy perennial with exquisite, tubular-shaped, green flowers with a soft pink mouth. Height 50cm. Well-drained soil in sun or part shade. Jul.-Sep. Sheltered site.
Penstemon	"Pink Endurance"	An upright perennial with tubular-shaped, pretty rose-pink flowers with a white throat. Height 40cm. Well-drained soil in sun or part shade. Jul.-Sep.
Penstemon	"Plum Jerkum"	A large-leaved perennial with large tubular-shaped, deep purple flowers with white streaks in the throat. Height 90cm. Well-drained soil in sun or part shade. Jul.-Sep.

Penstemon	"Port Wine"	A large-leaved perennial with large tubular-shaped, pretty claret-red flowers with a claret veined white throat. Height 60cm. Well-drained soil in sun or part shade. Jul.-Sept.
Penstemon	"Purple Bedder"	A large-leaved perennial with large tubular-shaped, purple-maroon flowers. Height 45cm. Well-drained soil in sun or part shade. Jul.-Sep.
Penstemon	"Purple Passion"	A large-leaved perennial with large tubular-shaped, purple flowers with a white throat. Height 45cm. Well-drained soil in sun or part shade. Jul.-Sep.
Penstemon	"Raven"	A large-leaved perennial with large tubular-shaped, pretty black-maroon flowers with a purple veined white throat. Height 60cm. Well-drained soil in sun or part shade. Jul.-Sept.
Penstemon	"Rich Ruby"	A large-leaved perennial with large tubular-shaped, pretty wine-red flowers with a darker throat. Height 60cm. Well-drained soil in sun or part shade. Jun.-Aug. Sheltered site.
Penstemon	"Rubicundus"	A large-leaved perennial with large tubular-shaped, pretty scarlet flowers with a white throat and red streaks. Height 60cm. Well-drained soil in sun or part shade. Jul.-Sep. Sheltered site.
Penstemon	"Schoenholzeri"	A narrow-leaved bushy perennial with large, tubular-shaped, scarlet flowers with a streaked magenta throat. Height 75cm. Well-drained soil in sun or part shade. Jul.-Sept.
Penstemon	"Six Hills"	An evergreen subshrub with small, tubular-shaped, pretty lavender-blue flowers. Height 15cm. May-Jun. Sheltered sunny site in well-drained soil.
Penstemon	"Snowstorm"	A large-leaved perennial with large tubular-shaped, pretty pure white flowers. Height 60cm. Well-drained soil in sun

		or part shade. Jul.-Sep.
Penstemon	"Sour Grapes"	A large-leaved perennial with large tubular-shaped, pretty greyish blue flowers, suffused purple and green. Height 60cm. Well-drained soil in sun or part shade. Jul.-Sept.
Penstemon	"Stapleford Gem"	A large-leaved perennial with large tubular-shaped, pretty lilac flowers, suffused purple. Height 90cm. Well-drained soil in sun or part shade. Jul.-Sept.
Penstemon	"Victoria Plum"	A large-leaved perennial with large tubular-shaped, pretty purple-pink flowers, with a heavily marked crimson throat. Height 90cm. Well-drained soil in sun or part shade. Jul.-Sept.
Penstemon	"Violet Dusk"	Bushy clumps of dark green ovate leaves topped with loose spikes of tubular mauve-lavender flowers with a lighter throat. Height 45-60cm. Well-drained soil in sun or part shade. Jul.-Sep.
Penstemon	"White Bedder"	A large-leaved perennial with large tubular-shaped, pure white flowers becoming pink tinged. Height 60cm. Well-drained soil in sun or part shade. Jul.-Sep.
Penstemon	cardwellii	An evergreen subshrub with short elliptic mid-green leaves and purple tubular flowers. Height 20-30cm. Well-drained soil in sun or part shade. May-Jun. may need winter protection.
Penstemon	fruticosus var. scouleri	A shrubby evergreen perennial with narrow leaves and dense clusters of tubular-shaped, pretty rose-violet flowers. Height 35cm. Well-drained soil in sun or part shade. Jun.-Aug.
Penstemon	hirsutus var. albiflorus	Basal clumps of mid-green leaves and slender stems of slim white flowers with creamy throats. Height 40cm. Well-drained soil in sun or part shade. Jun.-Aug.

Penstemon	<i>hirsutus</i> var. <i>pygmaeus</i>		A dwarf, compact, evergreen perennial, with small purple flushed lanceolate leaves and tubular blue flushed flowers. Full sun, well-drained. Height 10cm.
Penstemon	<i>pinifolius</i>		An evergreen subshrub with narrow, needle-like leaves and narrow tubular-shaped, pretty bright scarlet flowers. Height and spread 25cm. Well-drained soil in sun. Jun.-Aug.
Penstemon	<i>pinifolius</i>	"Mersea Yellow"	An evergreen subshrub with narrow, needle-like leaves and narrow tubular-shaped, pretty deep yellow flowers. Height and spread 25cm. Well-drained soil in sun. Jun.-Aug.
Penstemon	<i>procerus</i>	"Roy Davidson"	A spreading semi-evergreen with fresh green elliptic leaves and terminal clusters of small, pink shaded white, tubular flowers. Height 15-20cm. Well-drained soil in sun or part shade. Jun.-Jul.
Penstemon	<i>rupicola</i>		A subshrub with rounded evergreen pale grey-green leaves and tubular bright pink flowers. Height 10cm. Moist well-drained soil in sun or part shade. May-Jun.
Penstemon	<i>rupicola</i>	"Albus"	A subshrub with pretty white flowers and rounded evergreen pale grey-green leaves. Height 10cm. Moist well-drained soil in sun or part shade. May-Jun.
Perovskia		"Filigran"	A small deciduous shrub with finely cut silver-grey leaves and long spikes of lavender-blue flowers. Height 1m. Well-drained soil in sun. August to September. Prune hard in Spring.
Perovskia	<i>atriplicifolia</i>	"Blue Spire"	An upright deciduous shrub with deeply cut silver-grey leaves and spikes of violet-blue flowers. Height 1.2m. Spread 1m. Well-drained soil in sun. August to September. prune hard in spring.

Persicaria	affinis	"Donald Lowndes"	A mat-forming, evergreen perennial with dark green leaves turning red in autumn and spikes of pale pink flowers becoming darker with maturity. Height 20cm. Moist soil in sun or part shade. Jul.-Oct.
Persicaria	affinis	"Superba"	A mat-forming, evergreen perennial with dark green leaves turning brown in autumn and spikes of pale pink flowers becoming deep pinkish red. Height 25cm. Moist soil in sun or part shade. Jul.-Oct.
Persicaria	amplexicaulis	"Blackfield"	Dark green sagittate leaves and spikes of deep red flowers, opening from darker buds. Height 70cm. Moist well-drained soil in sun or part shade. Jul.-Oct.
Persicaria	bistorta	"Superba"	A clump-forming, semi-evergreen perennial with handsome mid-green leaves and short dense spikes of soft pink flowers. Height 80cm. Moist soil in sun or part shade. May-Jul.
Persicaria	tenuicaulis		A slow, mat-forming perennial with short spikes of fragrant white flowers. Height 5cm. Apr-May. Semi-Evergreen. Moist soil in sun or part shade.
Petrocoptis	pyrenaica ssp. glaucifolia		A tiny, semi-evergreen alpine with tufts of narrow blue-grey leaves and white-eyed carmine-pink flowers on short stems in summer. Height 5cm. Well-drained soil in sun. Jun.-Aug.
Philadelphus		"Beauclerk"	An arching shrub with clusters of large cup-shaped, white flowers with a slightly pink-flushed centre. Height 2.5m. Spread 2.5m. Well-drained soil in sun or part shade. June to July.
Philadelphus		"Belle Etoile"	Mock Orange. A deciduous arching shrub with fragrant, single cup-shaped, white flowers with a purple-flushed centre. Height 2.5m. Spread 2m.

		Well-drained soil in sun or part shade. Flowers from May to June. Prune out flowering stems.
Philadelphus	"Bouquet Blanc"	An upright shrub with clusters of double, very fragrant, pure white flowers. Height and spread 2m. Well-drained soil in sun or part shade. Flowers from June to July
Philadelphus	"Erectus"	A small deciduous, upright shrub with very fragrant white star-shaped flowers. Height 1.5m. Well-drained soil in sun. June to July. Prune out flowering wood after flowering.
Philadelphus	"Frosty Morn"	A dwarf deciduous shrub with highly scented double white flowers. Height and spread 1-1.5m. Well-drained soil in sun. Flowers from June to July. Prune out the flowering stems after flowering to keep the plant compact.
Philadelphus	"Manteau d'Hermine"	An arching, compact, deciduous shrub with clusters of double, very fragrant, creamy white flowers. Height 75cm. Spread 1.5m. Well-drained soil in sun or part shade. June to July.
Philadelphus	"Miniature Snowflake"	A compact, deciduous shrub with clusters of fully double, fragrant, white flowers. Height and spread 1m. Well-drained soil in sun or part shade. Flowers from June until July.
Philadelphus	"Minnesota Snowflake"	An upright shrub with clusters of double, very fragrant, pure white flowers. Height 2-2.5m. Spread 2m. Well-drained soil in sun or part shade. Flowers from June to July
Philadelphus	"Mrs. E. L. Robinson"	An upright shrub with clusters of single to semi-double very fragrant, pure white flowers. Height and spread 1.5m. Well-drained soil in sun or part shade. Flowers from June to July
Philadelphus	"Natchez"	An upright shrub with clusters of loose, double, very fragrant,

		pure white flowers. Height 2-2.5m. Spread 2m. Well-drained soil in sun or part shade. Flowers from June to July
Philadelphus	"Silver Showers"	A rounded deciduous shrub with arching stems and clusters of fragrant, single cup-shaped, pure white flowers. Height 1.2m. Spread 1.5m. Well-drained soil in sun or part shade. May to June. Prune after flowering.
Philadelphus	"Sybille"	An arching deciduous shrub with clusters of single, cup-shaped, very fragrant, white flowers with a purple centre. Height 1.2m. Well-drained soil in sun or part shade. Flowers from June to July.
Philadelphus	"Virginal"	An upright shrub with clusters of double, very fragrant, pure white flowers. Height 3m. Spread 2.5m. Well-drained soil in sun or part shade. Flowers from June to July
Philadelphus	"White Rock"	Erect branches when young becoming pendulous with age. Large white double/semi-double flowers with a mass of stamens. Height 2m. Well-drained soil in sun or part shade. May-Jun.
Philadelphus	microphyllus	A compact deciduous upright shrub with peeling dark chestnut-brown bark and single, very fragrant, pure white flowers. Height 1m. Spread 1m. Well-drained soil in sun or part shade. June to July. Prune after flowering.
Philadelphus	purpurascens	A small leaved plant with arching stems of fragrant white flowers with purple calyces. Height and spread 2m. Well-drained soil in sun or part shade. June to July. Prune after flowering.
Philadelphus	x purpureo-maculatus	A smallish deciduous shrub with arching stems of fragrant white flowers stained purple. Height and spread 2m. Well-

			drained soil in sun or part shade. June to July. Prune after flowering.
Phlox		"Kelly's Eye"	A mound-forming alpine with narrow dark green leaves and very pale pink flowers with a purple-red eye. Height 10cm. Well-drained soil in sun. May-Jun.
Phlox		"Millstream Daphne"	A mat-forming evergreen alpine with narrow deep green leaves and strong pink flowers with a darker eye on slightly upright stems. Height 10cm. Well-drained soil in sun. May to June.
Phlox	adsurgens	"Wagon Wheel"	A prostrate semi-evergreen perennial with salmon pink flowers with very narrow petals. Height and spread 30cm. Moist well-drained, slightly acid soil in part shade. May to June.
Phlox	bifida	"Alba"	Tufted perennial with semi-trailing stems of linear bright green leaves and flat white flowers. Height 15cm. Well-drained soil in sun. Apr.-Jun.
Phlox	carolina	"Bill Baker"	An upright to spreading perennial with bright green leaves and soft pink flowers with a white eye. Height 45cm. Spread 30cm. Moist soil in sun or part shade. Jun.-Jul.
Phlox	carolina	"Magnificence"	An upright herbaceous perennial with bright green leaves and large cylindrical heads of scented pink-mauve flowers. Height 1m. Moist well-drained soil probably in part shade. Jun.-Oct.
Phlox	carolina	"Miss Lingard"	An upright herbaceous perennial with bright green leaves and scented white flowers. Height 90cm. Moist soil in sun or part shade. Jun.-Jul.
Phlox	divaricata	"Blue Dreams"	A spreading, semi-evergreen alpine with bright green leaves and blue flowers. Height 35cm. Moist well-drained soil in

part shade. Jun.-Jul.

Phlox	divaricata	"Blue Perfume"	A semi-evergreen alpine with upright stems of dark green lanceolate leaves and fragrant mid-blue flowers. Height 25cm. Moist well-drained soil in part shade. Apr.-Jun.
Phlox	divaricata	"Clouds of Perfume"	A semi-evergreen alpine with upright stems of dark green lanceolate leaves and fragrant white flowers flushed blue. Height 25cm. Moist well-drained soil in part shade. Apr.-Jun.
Phlox	divaricata	"Dirigo Ice"	A semi-evergreen alpine with upright stems of dark green lanceolate leaves and fragrant pale blue flowers. Height 20-30cm. Moist well-drained soil in part shade. Apr.-Jun.
Phlox	divaricata	"May Breeze"	A semi-evergreen alpine with upright stems of dark green lanceolate leaves and fragrant light blue flowers. Height 35cm. Moist well-drained soil in part shade. Apr.-Jun.
Phlox	divaricata	"White Perfume"	A semi-evergreen alpine with upright stems of dark green lanceolate leaves and fragrant white flowers. Height 25cm. Moist well-drained soil in part shade. Apr.-Jun.
Phlox	divaricata ssp. laphamii	"Chatterhoochee"	Lavender-blue flowers with a purple-red eye in summer and early autumn. Height 35cm. Moist well-drained soil in part shade. Apr.-Jul.
Phlox	douglasii	"Apollo"	A mound-forming alpine with narrow dark green leaves and rich violet flowers. Height 10cm. Well-drained soil in sun. May-Jun.
Phlox	douglasii	"Boothmans' Var."	An evergreen mound-forming alpine with violet-pink flowers with a dark eye. Height 10cm. Well-drained soil in sun. May-Jun.
Phlox	douglasii	"Crackerjack"	A mound-forming alpine with narrow dark green leaves and

			reddish magenta-pink flowers with a dark eye. Height 5cm. Well-drained soil in sun. May-Jun.
Phlox	douglasii	"Eva"	A mound-forming evergreen alpine with mauve-blue flowers and a dark eye. Height 10cm. Well-drained soil in sun. May-Jun.
Phlox	douglasii	"Ice Mountain"	A mound-forming alpine with narrow dark green leaves and small white flowers. Height 10cm. Well-drained soil in sun. May-Jun.
Phlox	douglasii	"Lilac Cloud"	An evergreen mound-forming alpine with small violet-pink flowers. Height 10cm. Well-drained soil in sun. May-Jun. Trim after flowering.
Phlox	douglasii	"Napoleon"	A mound-forming alpine with narrow dark green leaves and shell pink flowers. Height 10cm. Well-drained soil in sun. May-Jun.
Phlox	douglasii	"Red Admiral"	A mound-forming alpine with narrow dark green leaves and crimson-red flowers. Height 10cm. Well-drained soil in sun. May-June.
Phlox	douglasii	"Rose Cushion"	A mound-forming alpine with narrow dark green leaves and rose-pink flowers. Height 10cm. Well-drained soil in sun. May-Jun.
Phlox	douglasii	"Rosea"	A mound-forming alpine with narrow dark green leaves and soft pink flowers with a dark eye. Height 10cm. Well-drained soil in sun. May-Jun.
Phlox	douglasii	"Sarah"	A mound-forming alpine with narrow dark green leaves and white flowers. Height 10cm. Well-drained soil in sun. May-Jun.
Phlox	douglasii	"Waterloo"	A mound-forming alpine with narrow dark green leaves and intense crimson-red flowers. Height 5cm. Well-drained soil in sun. May-June.

Phlox	douglasii	"White Admiral"	A mound-forming alpine with narrow dark green leaves and white flowers. Height 10cm. Well-drained soil in sun. May-June.
Phlox	maculata	"Alpha"	An erect herbaceous perennial with narrow green leaves and fragrant, lilac-pink flowers with a darker eye. Height 90cm. Moist soil in sun. Jun.-Jul.
Phlox	maculata	"Natascha"	An erect perennial with narrow green leaves and cylindrical heads of fragrant, white flowers with a pink stripe, giving a star-like appearance. Height 80cm. Moist soil in sun. June-July.
Phlox	maculata	"Omega"	An erect herbaceous perennial with narrow green leaves and fragrant, white flowers with a red eye. Height 90cm. Moist soil in sun. Jun.-Jul.
Phlox	maculata	"Rosalinde"	An erect perennial with narrow green leaves and cylindrical heads of fragrant, purple-pink flowers. Height 80cm. Moist soil in sun. June-July.
Phlox	paniculata	"Blue Boy"	An erect herbaceous perennial with narrow deep green leaves and fragrant clusters of bluish-mauve flowers with a starry white centre. Height 90cm. Moist soil in sun or part shade. Jul.-Sept.
Phlox	paniculata	"Border Gem"	An erect herbaceous perennial with narrow deep green leaves flushed purple and clusters of violet purple flowers. Height 90cm. Moist soil in sun or part shade. Jul.-Sept.
Phlox	paniculata	"Brigadier"	An erect herbaceous perennial with narrow deep green leaves and fragrant clusters of orange-tinged, pinkish red flowers with a red centre. Height 90cm. Moist soil in sun or part shade. Jul.-Sept.
Phlox	paniculata	"Bright Eyes"	An erect herbaceous perennial with narrow green leaves and fragrant clusters of pale pink flowers with a red centre.

			Height 90cm. Moist soil in sun or part shade. Jul.-Sept.
Phlox	paniculata	"Coral Flame"	A new variety of dwarf Phlox with dense clusters of scented, coral-pink flowers. Height 40cm. Moist soil in sun or part shade. Jul.-Sep.
Phlox	paniculata	"David"	A vigorous clump-forming perennial with light green leaves and heads of clear white scented flowers. Height 90cm. Moist soil in sun or part shade. Jul.-Aug.
Phlox	paniculata	"Eva Cullum"	An erect herbaceous perennial with narrow green leaves and fragrant clusters of pink flowers with a darker eye. Height 90cm. Moist soil in sun or part shade. Jul.-Aug.
Phlox	paniculata	"Eventide"	An erect herbaceous perennial with narrow green leaves and fragrant clusters of lavender-blue flowers. Height 90cm. Moist soil in sun or part shade. Jul.-Sept.
Phlox	paniculata	"Franz Schubert"	An erect perennial with narrow green leaves and fragrant clusters of lilac-blue on white flowers. Height 90cm. Moist soil in sun or shade. Jul.-Sep.
Phlox	paniculata	"Harlequin"	Rich purple flowers on this variegated border phlox. Height 75cm. Moist, fertile well-drained soil in sun or part shade. Jul.-Oct.
Phlox	paniculata	"Jade"	An erect herbaceous perennial with narrow green leaves and fragrant clusters of white flowers edged green. Height 40-50m. Moist soil in sun or part shade. Jul.-Sept. Mildew resistant.
Phlox	paniculata	"Monica Lyndon-Bell"	An erect perennial with narrow green leaves and fragrant clusters of pale pink and white flowers opening from dark buds. Height 75cm. Moist well-drained soil in sun or part shade. Jul.-Oct.

Phlox	paniculata	"Mother of Pearl"	An erect herbaceous perennial with narrow green leaves and fragrant clusters of pink-tinged, white flowers. Height 75cm. Moist soil in sun or part shade. July-Sept.
Phlox	paniculata	"Mount Fuji"	An erect perennial with narrow pale green leaves and fragrant clusters of white flowers. Height 75cm. Moist well-drained soil in sun or part shade. Jul.-Sept.
Phlox	paniculata	"Nora Leigh"	An erect perennial with green and white variegated leaves. Fragrant pale lilac flowers with a deeper lilac-pink centre. Height 90cm. Moist soil in sun or part shade. Jul.-Sep..
Phlox	paniculata	"Othello"	An erect perennial with narrow green leaves, purple flushed shoots and claret red flowers. Height 75cm. Moist soil in sun or part shade. Jul.-Sep.
Phlox	paniculata	"Otley Choice"	Heads of deep rose flowers on 60cm. stems. Jul.-Sep. Moist, fertile well-drained soil in sun or part shade.
Phlox	paniculata	"Peppermint Twist"	An erect herbaceous perennial with narrow green leaves and clusters of deep pink flowers with a central white stripe. Height 75cm. Moist soil in sun or part shade. Jul.-Sept.
Phlox	paniculata	"Pink Flame"	A new variety of dwarf Phlox with dense clusters of scented, pink flowers. Height 40cm. Moist soil in sun or part shade. Jul.-Sep.
Phlox	paniculata	"Pitstone Pink"	An erect herbaceous perennial with narrow green leaves and fragrant clusters of bright pink flowers. Height 90cm. Moist soil in sun or part shade. Jul.-Sept. Shows reasonable mildew resistance.
Phlox	paniculata	"Prince of Orange"	An erect herbaceous perennial with narrow green leaves and fragrant clusters of orange-red flowers. Height 80cm. Moist soil in sun or part shade. Jul.-

Sept.

Phlox	paniculata	"Prospero"	An erect herbaceous perennial with narrow green leaves and clusters of pale lilac flowers. Height 90cm. Moist soil in sun or part shade. Jul.-Sept.
Phlox	paniculata	"Purple Eye Flame"	A new variety of dwarf Phlox with dense clusters of scented, white-eyed purple flowers. Height 40cm. Moist soil in sun or part shade. Jul.-Sep.
Phlox	paniculata	"Rosa Pastell"	An erect herbaceous perennial with narrow, dark green leaves and clusters of scented pale salmon-pink flowers. Height 90cm. Moist soil in sun or part shade. Jul.-Sept.
Phlox	paniculata	"Sandringham"	An erect herbaceous perennial with narrow green leaves and clusters of cyclamen pink flowers with a darker eye. Height 75cm. Moist soil in sun or part shade. Jul.-Sept.
Phlox	paniculata	"Skylight"	An erect perennial with narrow, dark green leaves and fragrant clusters of lavender-blue flowers. Height 90cm. Moist soil in sun or part shade. Jul.-Sep.
Phlox	paniculata	"Starfire"	An erect perennial with narrow green leaves and fragrant clusters of crimson-red flowers. Height 90cm. Moist soil in sun or part shade. Jul.-Sep.
Phlox	paniculata	"Tenor"	An erect herbaceous perennial with narrow green leaves and clusters of red flowers with a scarlet glow. Height 75cm. Moist soil in sun or part shade. Jul.-Sept.
Phlox	paniculata	"Tiara"	An erect perennial with narrow pale green leaves and fragrant clusters of double white flowers. Height 55cm. Moist well-drained soil in sun or part shade. Jul.-Sept.
Phlox	paniculata	"Uspekhh"	An erect clump forming herbaceous perennial with narrow green leaves and clusters of purple flowers with a

			prominent white eye..Height 90cm. Moist soil in sun or part shade. Jul.-Sep.
Phlox	paniculata	"Velvet Flame"	A new variety of dwarf Phlox with dark flushed foliage and dense clusters of scented, purple cerise flowers. Height 40cm. Moist soil in sun or part shade. Jul.-Sep.
Phlox	paniculata	"White Admiral"	An erect herbaceous perennial with narrow pale green leaves and fragrant clusters of clear white flowers. Height 90cm. Moist soil in sun or part shade. Jul.-Sept.
Phlox	paniculata	"White Flame"	A new variety of dwarf border Phlox with dense clusters of scented, white flowers. Height 40cm. Moist soil in sun or part shade. Jul.-Sep.
Phlox	paniculata	"White-eye Flame"	A new variety of dwarf border Phlox with dense clusters of scented, white flowers with a small red eye. Height 40cm. Moist soil in sun or part shade. Jul.-Sep.
Phlox	paniculata	"William Kesselring"	An erect perennial with narrow green leaves and fragrant clusters of violet flowers with a white eye..Height 90cm. Moist soil in sun or part shade. Jul.-Sep.
Phlox	paniculata	"Windsor"	An erect herbaceous perennial with narrow green leaves and clusters of carmine-rose flowers with a magenta eye. Height75cm. Moist soil in sun or part shade. Jul.-Sept.
Phlox	subulata	"Alexanders Surprise"	A mat-forming alpine with narrow bright green leaves and salmon-pink flowers. Height 10cm. Well-drained soil in sun. Apr.-Jun.
Phlox	subulata	"Amazing Grace"	A mat-forming, evergreen alpine with narrow bright green leaves and pale pink flowers with a deep pinkish purple eye. Height 10cm. Well-drained soil in sun. May-Jun.

Phlox	subulata	"Bavaria"	A new variety of this mat-forming alpine. Bright green leaves and white flowers with a strong dark blue-purple eye. Height 10cm. Well-drained soil in sun. Apr.-Jun.
Phlox	subulata	"Bonita"	A mat-forming alpine with narrow bright green leaves and pale lilac-mauve flowers with a dark eye. Height 10cm. Well-drained soil in sun. Apr.-Jun.
Phlox	subulata	"Emerald Cushion Blue"	A mat-forming alpine with narrow bright green leaves and silvery blue flowers with a dark eye. Height 10cm. Well-drained soil in sun. Apr.-Jun.
Phlox	subulata	"G. F. Wilson"	A cushion-forming alpine with narrow bright green leaves and starry pale blue flowers. Height 10cm. Well-drained soil in sun. May-June.
Phlox	subulata	"Kimono"	A mat-forming alpine with narrow bright green leaves and pink flowers with white edges. Height 15cm. Well-drained soil in sun. Apr.-Jun.
Phlox	subulata	"MacDaniel's Cushion"	A cushion-forming, evergreen alpine with narrow bright green leaves and large deep pink flowers. Height 10cm. Well-drained soil in sun. May-Jun.
Phlox	subulata	"Marjorie"	A trailing alpine with stems of narrow dark green leaves and pink flowers with a dark eye. Height 10cm. Well-drained soil in sun. May-Jun.
Phlox	subulata	"Nettleton Variation"	A mat-forming evergreen alpine with narrow bright green leaves edged cream and pink. Clear pink flowers. Height 10cm. Well-drained soil in sun. May to June.
Phlox	subulata	"Purple Beauty"	A mat-forming evergreen alpine with narrow bright green leaves and light purple flowers with a darker eye. Height 10cm. Well-drained soil in sun. May to June.
Phlox	subulata	"Samson"	A mat-forming, evergreen alpine with narrow bright green

			leaves and bright red flowers. Height 10cm. Well-drained soil in sun. May-Jun.
Phlox	subulata	"Scarlet Flame"	A mat-forming evergreen alpine with narrow bright green leaves and deep scarlet flowers. Height 10cm. Well-drained soil in sun. May to June.
Phlox	subulata	"Snowflake"	A mat-forming alpine with narrow yellowish-green leaves and white flowers. Height 10cm. Well-drained soil in sun. Apr.-Jun.
Phlox	subulata	"White Delight"	A mat-forming alpine with narrow yellowish-green leaves and white, starry flowers. Height 10cm. Well-drained soil in sun. Apr.-Jun.
Phlox	x procumbens	"Variegata"	A mat-forming perennial with glossy green and cream variegated leaves and bright purple flowers. Height 10cm. Moist well-drained soil in part shade. Jun.-Jul.
Photinia	x fraseri	"Little Red Robin"	An upright, evergreen shrub with dark green leaves, bright red when young. Small white flowers are sometimes followed by bright red fruit. Height and spread 3m. Moist well-drained soil in sun or part shade. April to May.
Photinia	x fraseri	"Pink Marble"	An evergreen shrub with creamy, marbled green leaves, and pink new growth. Large clusters of small white flowers produced. Height 4m. Spread 2.5m. Moist well-drained soil in sun or part shade. Flowers from April to May.
Photinia	x fraseri	"Red Robin"	An upright, evergreen shrub with dark green leaves, bright red when young. Small white flowers are sometimes followed by bright red fruit. Height 5m. Spread 5m. Moist well-drained soil in sun or part shade. April to May.

Photinia	x fraseri	"Rubens"	An upright, evergreen shrub with dark green leaves, bright red when young. Small white flowers are sometimes followed by bright red fruit. Height 3m. Spread 3m. Moist well-drained soil in sun or part shade. Flowers from June to July. More compact than oth
Photinia	x fraseri	"Super Red"	A superior variety of Photinia with more intense red new growth than "Red Robin". Small white flowers are sometimes followed by bright red fruit. Height 5m. Spread 5m. Moist well-drained soil in sun or part shade. Flowers from April to May.
Physocarpus	opulifolius	"Diabolo"	A deciduous shrub with beautiful three-lobed rich purple leaves and flat heads of pink tinged white flowers. Height 2m. Spread 2m. Moist well-drained soil in sun.
Physocarpus	opulifolius	"Lady in Red"	A deciduous shrub with new growth being a vibrant red, maturing to dark purple. Flat heads of pink flowers that fade to white. Height 1.5m. Spread 1.5m. Moist well-drained soil in sun.
Physoplexis	comosa		An unusual alpine with rounded dentate leaves and clusters of spiky flowerheads in purple shades. Height 10cm. Well-drained gritty soil in sun. Protect from winter wet. Good in Tufa.
Physostegia	virginiana	"Alba"	An erect perennial with toothed mid-green leaves and spikes of white flowers. Height 60cm. Moist soil in sun or part shade. Jul.-Aug.
Physostegia	virginiana	"Vivid"	An erect, compact perennial with toothed mid-green leaves and spikes of vivid magenta-pink flowers. Height 45-70cm. Moist soil in sun or part shade. Jun.-Aug.

Physostegia	virginiana ssp. speciosa	"Variegata"	Loose basal rosettes of white-edged green leaves and spikes of tubular purplish-pink flowers. Height 90cm. Moist well-drained soil in sun. Aug.-Sep.
Phyteuma	nigrum		A rosette-forming alpine with narrow, hairy leaves and clusters of black-violet flowers. Height 20-30cm. well-drained soil in sun. Jun.-Jul.
Phyteuma	scheuzeri		A tufted alpine with narrow leaves and rounded clusters of violet-blue flowers. Height 40cm. Well-drained soil in sun. Jun.-Jul..
Pieris		"Forest Flame"	An upright, evergreen shrub with glossy dark green leaves, red when young, turning pink, white and finally green. Clusters of pendent white flowers. Height 4m. Spread 2m. Moist well-drained acid soil in sun or part shade. April to May.
Pieris	japonica	"Bonfire"	An upright, evergreen shrub with glossy dark green leaves, bronze-red when young. Clusters of pendent white flowers from deep pink buds. Height 3m. Spread 2m. Moist well-drained acid soil in sun or part shade. April to May.
Pieris	japonica	"Carnival"	A compact shrub with mid green leaves edged white. New growth is a vivid red. Trusses of hanging white bell-shaped flowers, that may be produced on older plants. Height and spread 50cm. Moist well-drained acid soil in sun or part shade.
Pieris	japonica	"Debutante"	A compact, rounded, evergreen shrub with clusters of white flowers. New leaf colour not particularly good, but flowering always reliable. Height & spread 1m. Moist well-drained acid soil in sun or part shade. Flowers from February to April.

Pieris	japonica	"Flaming Silver"	An evergreen shrub with bright red leaves when young, which turn pink and then green, with a conspicuous creamy white edge. Clusters of white bell-shaped flowers . Height 2m. Moist well-drained soil in sun or part shade. Feb.-Apr.
Pieris	japonica	"Katsura"	A new variety with beautiful new foliage of plum-purple and bunches of bell-shaped white flowers flushed purple. Height 1.5m. Spread 1.5m. Moist well-drained acid soil in sun or part shade. February to April.
Pieris	japonica	"Little Heath"	A neat, rounded evergreen shrub with glossy, variegated green leaves, pink-flushed with white margins. White flowers from pink buds.(but not on young plants). Height 60cm. Moist well-drained acid soil in sun or part shade.
Pieris	japonica	"Mountain Fire"	Evergreen shrub with neat rounded growth. New, young foliage is a brilliant red, lasting over a long period. Needs a semi-shaded sheltered site in moist acid soil.
Pieris	japonica	"Pink Delight"	A rounded, evergreen shrub with glossy mid-green leaves. From red winter buds arise clusters of fragrant rose-pink flowers. Height 1.2m. Spread 1.2m. Moist well-drained acid soil in sun or part shade. February to April.
Pieris	japonica	"Sarabande"	Dwarf evergreen shrub up to 60cm. high. White flowers in spring. moist well-drained acid soil in sun or part shade.
Pieris	japonica	"Taiwanensis Group"	A rounded, evergreen shrub with matt green, leathery leaves, bronze or bronze-red when young. Long erect or spreading clusters of white flowers. Height 1.4m. Spread 1.2m. Moist well-drained acidic soil in sun or part shade. February to April.

Pieris	japonica	"Valley Rose"	A rounded, evergreen shrub with glossy green leaves, bright red when young. Clusters of pendent pale rose-pink flowers. Height 1.5m. Spread 1.5m. Moist well-drained acid soil in sun or part shade. Flowers from February to April.
Pieris	japonica	"White Pearl"	A rounded, evergreen shrub with matt green, leathery leaves, bronze or bronze-red when young. Erect clusters of pure white flowers. Height and spread 1.2m. Moist well-drained acidic soil in sun or part shade. February to April.
Pileostegia	viburnoides		An evergreen climber with leathery dark green leaves and creamy white starry flowers with conspicuous stamens. Height 6m. Well-drained soil in sun or part shade. Flowers from August to November.
Pittosporum		"Garnettii"	A large bushy evergreen shrub with greyish green, pink-spotted leaves margined white. Bell-shaped dark purple flowers. Height 3-5m. Spread 2-4m. Well-drained soil in sun. May-Jun. May need protection in a bad winter.
Pittosporum		"Limelight"	An evergreen shrub with lance-shaped glossy green leaves with a central gold splash. Small star-shaped maroon flowers. Height 3m. Spread 2m. Well-drained soil in sheltered sunny spot. Flowers from April to May.
Pittosporum	eugenoides	"Variegatum"	An evergreen shrub with glossy undulated leaves with creamy white margins. Height up to 3m. Sheltered well-drained site in sun.
Pittosporum	tenuifolium	"Tom Thumb"	A low bushy shrub with bronze-purple flushed leaves. Bell-shaped, black-red flowers. Height 1m. Spread 60cm. Moist well-drained soil in sun. May to June. Evergreen.

Pittosporum	tobira	"Variegatum"	A large bushy shrub with lustrous deep green leaves, margined white. Clusters of sweetly scented, creamy white flowers. Height 4m. Spread 1.5-3m. Well-drained sheltered site in sun. May-Jun. May need protection in a bad winter.
Platycodon		"Perlmutterschale"	A compact, tuberous, clump-forming perennial with bluish green leaves and clusters of pale pink flowers. Height 45cm. Moist well-drained soil in sun or part shade. Jul.-Aug.
Platycodon	grandiflorus		A compact clump-forming perennial with bluish green leaves and clusters of purple-blue flowers. Height 60cm. Moist well-drained soil in sun or part shade. Jul.-Aug.
Platycodon	grandiflorus	"Astra Blue"	A dwarf seed raised clump-forming perennial with bluish green leaves and clusters of balloon-shaped buds opening to cupped blue flowers. Height 10-15cm. Moist well-drained soil in sun or part shade. Jul.-Aug.
Platycodon	grandiflorus	"Blue Pearl"	A compact clump-forming perennial with whorls of bluish green leaves and clusters of balloon-shaped buds opening to white veined flowers with a lilac reverse. Height 60cm. Moist well-drained soil in sun or part shade. Jul.-Aug.
Platycodon	grandiflorus	"Fairy Snow"	A dwarf compact clump-forming perennial with bluish green leaves and clusters of white flowers with delicate blue veining. Height 30cm. Moist well-drained soil in sun or part shade. Jul.-Aug.
Platycodon	grandiflorus	"Fuji Pink"	Upright stems with whorls of rounded green leaves topped with balloon-like flower buds that open into wide pink cups with darker veining. Height 50cm. Well-drained soil in sun. Jun.-Aug.

Platycodon	grandiflorus	"Hakone Blue"	A compact clump-forming perennial with bluish green leaves and clusters of balloon-shaped buds opening to cupped blue flowers sometimes with extra rows of petals. Height 60cm. Moist well-drained soil in sun or part shade. Jul.-Aug.
Platycodon	grandiflorus	"Hakone White"	A compact clump-forming perennial with bluish green leaves and clusters of balloon-shaped buds opening to cupped white flowers sometimes with extra rows of petals. Height 60cm. Moist well-drained soil in sun or part shade. Jul.-Aug.
Platycodon	grandiflorus	"Sentimental Blue"	A dwarf, compact clump-forming perennial with bluish green leaves and clusters of purple-blue flowers from inflated buds. Height 15cm. Moist well-drained soil in sun or part shade. Jul.-Aug.
Pleione		"Shantung"	A small orchid with relatively large yellow and white flushed pink flowers and a red marked lip. Height 10cm. Apr.-May. Not hardy. Well-drained soil in shade.
Pleione		"Tongariro"	A small orchid with relatively large dark violet-rose flowers and red and yellow lip markings. Height 10cm. Apr.-May. Not hardy. Well-drained soil in shade.
Pleione	formosana		Pale rose-lilac flowers with white lips and red and yellow markings. Height 10cm. Apr.-May. Not hardy. Well-drained soil in shade.
Pleione	formosana	"Snowcap"	Green pseudo bulbs flatter than the type species. Lovely white flowers with pale yellow markings on the lip. Height 10cm. Apr.-May. Not hardy. Well-drained soil in shade.
Podophyllum		"Spotty Dotty"	A hybrid variety with lobed umbrella-shaped, chartreuse green leaves that have chocolate brown spotting during spring.

			Large garnet coloured flowers hang under the leaves. Height 45cm. Moist well-drained sheltered site in part shade. Jun.-Aug.
Podophyllum	hexandrum		An attractive perennial with large green leaves beautifully marked purple-brown. Open cup-shaped white or pale pink flowers followed by fleshy red fruit. Height 45cm. Moist soil in part shade. May-July.
Polemonium		"Bressingham Purple"	A clump-forming perennial with pinnate dark purple foliage contrasting with light violet-blue flowers and bright yellow stamens. Height 75cm. Moist well-drained soil in sun. May-Jul.
Polemonium		"Lambrook Mauve"	A clump-forming perennial with pinnate green foliage and slender stems carrying large soft mauve flowers. Height 30cm. Moist well-drained soil in sun. Apr.-Aug.
Polemonium		"Northern Lights"	A clump-forming perennial with divided green foliage and large palish-blue, scented, sterile flowers. Height 25-40cm. moist well-drained soil in sun or part shade. May-Aug.
Polemonium		"Snow and Sapphires"	Creamy white-edged pinnate foliage. Spires of blue flowers. Height 60cm. Moist well-drained soil in sun or part shade. Jun.-Aug. Supposedly more vigorous than "Brise d'Anjou"
Polemonium	caeruleum	"Album"	A clump-forming perennial with divided green foliage and white flowers. Height 30-90cm. Moist well-drained soil in sun. Jun.-Jul.
Polemonium	caeruleum	"Brise d'Anjou"	Creamy white-edged pinnate foliage. Spires of blue flowers. Height 60cm. Moist well-drained soil in sun or part shade. Jun.-Aug.
Polemonium	chartaceum		Tufts of dissected leaves with tiny three-lobed leaflets in whorls. Funnel-shaped dark

			blue flowers with yellow throats arranged in balls just above the foliage. Height 15cm. Well-drained soil in sun, maybe best in Alpine House. Apr.-May
Polemonium	confertum		Tufts of pinnate leaves with funnel-shaped bright blue flowers with orange anthers in spikes up to 10cm. long. Height 15-30cm. Well-drained soil in sun. Apr.-May. Will probably need winter protection.
Polemonium	eximium		An alpine species with tufts of greyish-green pinnate leaves and relatively large heads of deep blue-violet flowers. Height 10-25cm. well-drained soil in su. Jul.-Aug.
Polemonium	pulcherrimum var. pulcherrimum		Congested tufts of mid-green pinnate leaves with short spires of blue flowers. Height 10cm. Gritty soil in sun. Jun.-Jul.
Polemonium	reptans	"Stairway to Heaven"	A creeping "Jacob's Ladder" with white variegated foliage that goes pink in the sun and spikes of blue flowers. Height 25cm. Spread 50cm. Moist well-drained soil in sun or part shade. Jun.-Aug.
Polemonium	viscosum		Basal leaves consist of many whorled leaflets with stems carrying loose heads of relatively large white to deep blue flowers. Height 20-30cm. Well-drained soil in sun. Jul.-Aug.
Polemonium	yezoense	"Purple Rain"	A clump-forming perennial with divided dark purple leaves contrasting with the sapphire-blue flowers. Height 60cm. Moist well-drained soil in sun. Jun.-Jul.
Polygala	calcareo		Slightly spreading hummocks of oval leaves with short stems of deep blue flowers, Apr.-Jul. Height 10cm. Humus-rich soil in full sun.
Polygala	calcareo	"Lillet"	Tight hummocks of oval leaves with short stems of deep blue flowers, Apr.-Jul. Height 10cm.

			Humus-rich soil in full sun.
Polygala	chamaebuxus		A small, evergreen shrub with dark green, leathery leaves and pretty pea-like white/yellowish flowers. Height 10-15cm. Spread 30cm. Well-drained acid soil in part shade. May to June.
Polygala	chamaebuxus	"Grandiflora"	Evergreen perennial with purple and yellow pea-like flowers over a long period. Height 15cm. Well-drained peaty soil in part shade.
Polygonatum	biflorum		A perennial with arching stems of lance-shaped leaves and tubular greenish white flowers followed by black fruit. Height 1m. Moist soil in sun or part shade. May-Jul.
Polygonatum	cirrhifolium		Erect stems with leaves in whorls and pale purple flowers from the leaf axils. Reddish berries produced in autumn. Height 30-90cm. Moist well-drained soil in part shade. May-Jul.
Polygonatum	falcatum		A perennial with red tinted upright stems of narrow leaves. Small tubular creamy white flowers. Height 1m. Moist well-drained soil in sun or part shade. May to June.
Polygonatum	hookeri		Dwarf Solomon's Seal with tubular pale to deep pink flowers. Height 10cm. Moist well-drained soil in sun or part shade. May-Jul.
Polygonatum	humile		A dwarf Solomon's seal with upright stems with lanceolate leaves and small creamy-white bells hanging from the leaf axils. Height 15-25cm. Moist well-drained soil in shade. May-Jun.
Polygonatum	odoratum var. pluriflorum	"Variegatum"	Arching stems carry alternate lance-shaped green leaves with a creamy white margin. delicate white, scented bells hang from the stems. Height 60cm. Moist well-drained soil in part shade.

			May-Jun.
Polygonatum	roseum		Arching slender stems with narrow leaves, below which hang small pale pink flowers. Height 40-50cm. Moist well-drained soil in part shade. Jun.-Jul.
Polygonatum	verticillatum		A perennial with erect stems of narrow, bright green leaves. Tubular greenish white flowers are followed by red fruit. Height 20-90cm. Moist well-drained soil in sun or part shade. May-Jul. Fruits from August
Polygonatum	x hybridum		A perennial with arching stems of bright green leaves. Tubular green tipped creamy white flowers followed by blue-black fruit. Height 1.5m. Moist well-drained soil in sun or part shade. May-Jun..
Polygonatum	x hybridum	"Grace Barker"	An herbaceous perennial with arching stems of blue-green leaves with a cream edge. Small cream flowers hang down along the stems. Height 30-40cm. Moist well-drained soil in sun. Apr.-May.
Polygonatum	x hybridum	"Striatum"	A perennial with arching stems of bright green leaves, with a thin creamy white stripe. Tubular green tipped creamy white flowers followed by blue-black fruit. Height 1m. Moist well-drained soil in part shade. May-Jun..
Polypodium	interjectum		An evergreen fern with deeply cut leathery fronds, differing from the common form by its more oval frond outline and its more grey-green colour. Height 30-40cm. Grows in most soils even on chalk.
Polypodium	vulgare		Common Polypody. An attractive evergreen fern with deep cut leathery dark green fronds. Height 30cm. Will grow in virtually any soil even tolerating dry shade.

Polypodium	vulgare	"Bifido-Multifidum"	A form of the "Common Polypody" with the fronds divided 2 or 3 times at the apex giving a "snakes tongue" appearance. The ends of each leaf are crested. Height 30cm. Any soil.
Polystichum	acrostichoides		"Christmas Fern". Long fronds of deeply cut leathery pinnae with an unusual uneven appearance. Narrow fertile, less dense fronds grow upright. Fronds often cut for winter decoration. Moist soil in shade.
Polystichum	aculeatum		The native hard shield fern with stiff leathery fronds, unfurling backwards. Each pinnae ends in a stiff bristle. Height 60cm. Evergreen. Well-drained soil in part shade.
Polystichum	braunii		An evergreen fern with narrow, lance-shaped, deeply divided, glossy, bright green fronds. The midribs are well covered in brown scales. Height 60-90cm. Moist well-drained soil in part shade.
Polystichum	makinoi		An evergreen fern with arching olive-green bipinnate fronds, with a satin sheen. Height 60-80cm. Moist well-drained soil in part shade.
Polystichum	munitum		"Sword Fern". An attractive fern with divided, leathery fronds, tapering at the ends, forming neat shuttlecocks. Height 1m. Evergreen. Well-drained soil in sun or shade. Protect crowns in winter.
Polystichum	rigens		A hardy japanese fern. The fronds have sharply pointed pinnae and emerge soft yellow in the spring turning matt green as the season progresses. Height 40cm. Moist soil in part shade.
Polystichum	setiferum		An attractive evergreen fern with shuttlecocks of soft, dark green fronds. Height 1.2m. Spread 90cm. Moist soil in sun or part shade. Will tolerate dry

shade.

Polystichum	setiferum	"Acutilobum"	An evergreen fern with near erect lance-shaped, bipinnate, dark green, leathery fronds. Height 90cm. Moist well drained soil in part shade. Will take a sunny spot if kept moist.
Polystichum	setiferum	"Congestum"	An attractive dwarf fern with divided, green fronds with the lower leaves overlapping. Height 15-20cm. Evergreen. Adaptable to most conditions.
Polystichum	setiferum	"Divisilobum Dahlem"	An evergreen fern with stiff triangular fronds of deep green. Height 80cm. Amenable to most soils and conditions, even sun if given sufficient moisture.
Polystichum	setiferum	"Divisilobum Herrenhausen"	An attractive fern with shuttlecocks of soft, broad dark green fronds. Height 50cm. Evergreen. Hardy. Protect crowns from winter wet. Most soils and conditions.
Polystichum	setiferum	"Divisilobum Wollaston"	An attractive evergreen fern with shuttlecocks of soft, broad dark bronzey-green fronds. Height 90cm. Tolerates a wide range of conditions.
Polystichum	setiferum	"Plumosomultilobum"	"Mossy Soft Shield Fern". An evergreen fern with finely divided and heavily congested overlapping pinnae. Eventually forms a "Trunk". Height 45cm. Well-drained soils in sun or part shade.
Polystichum	setiferum	"Plumosum Bevis"	An evergreen fern with lance-shaped dark green, finely divided, arching fronds. Height 1m. Well-drained soils in sun or part shade.
Polystichum	setiferum	"Proliferum"	A hardy evergreen fern with dark green pointed fronds arranged in a spiral pattern around the crown. Height 60cm. Tolerates most soil conditions even in sun if kept moist.
Polystichum	setiferum	"Smith's Cruciate"	A native evergreen fern with narrow, tripinnate cross-shaped fronds. Height 45-60cm.

			Tolerates most soil conditions even in sun if kept moist.
Polystichum	tsus-simense		An oriental fern that has dark green fronds with holly-like tips that are covered in silvery-white scales. Height 45cm. Evergreen. Moist sheltered site in part shade.
Potentilla	atrosanguinea		A clump-forming, hairy perennial with silvery leaves. Clusters of saucer-shaped deep red flowers on erect branching stems. Height 45-60cm. Well-drained soil in sun. Jun.-Oct.
Potentilla	atrosanguinea	"Fireball"	A clump-forming, hairy perennial with silvery leaves. Clusters of saucer-shaped deep red double flowers on erect branching stems. Height 45-60cm. Well-drained soil in sun. Jun.-Oct.
Potentilla	atrosanguinea	"Sundermannii"	A clump-forming, hairy perennial with silvery leaves. Clusters of saucer-shaped bright orange flowers on erect branching stems. Height 45-60cm. Well-drained soil in sun. Jun.-Oct.
Potentilla	eriocarpa		A mat-forming perennial with bright green leaves and cup-shaped, deep yellow flowers. Height 8cm. Moist well-drained soil in sun. Jun.-Jul.
Potentilla	fruticosa	"Abbotswood"	A bushy deciduous shrub with dark blue-green leaves. Pretty cup-shaped, white flowers from May to July. Height 75cm. Spread 1.2m. Well-drained soil in full sun. Trim back after flowering.
Potentilla	fruticosa	"Baby Bethan"	A bushy, deciduous, rounded shrub with bright green leaves. Delicate rose-pink semi-double flowers from May to July. Height and spread 60cm. Well-drained soil in full sun. Trim back after flowering.
Potentilla	fruticosa	"Daydawn"	A bushy shrub with dark green leaves. Pretty cup-shaped, creamy yellow flowers flushed

			orange-pink. Height 60cm. Well-drained soil in sun. Flowers from May-Jul.
Potentilla	fruticosa	"Elizabeth"	A bushy deciduous shrub with dark green leaves. Pretty cup-shaped large yellow flowers. Height 1m. Spread 1.5m. Well-drained soil in sun. Flowers from May to July.
Potentilla	fruticosa	"Goldfinger"	A bushy deciduous shrub with dark green leaves. Pretty cup-shaped large rich yellow flowers. Height 1m. Spread 1.5m. Well-drained soil in sun. Flowers from May to July.
Potentilla	fruticosa	"Limelight"	A bushy shrub with neatly divided green leaves. Pretty cup-shaped, pale primrose flowers with a golden eye over a long period. Height 1m. Spread 1.5m. Well-drained soil in sun. May to July.
Potentilla	fruticosa	"Lovely Pink"	A bushy deciduous shrub with bright green leaves. Pink flowers are produced throughout the season from May to the frosts. Height and spread 80-120cm. Well-drained soil in full sun. Trim back after flowering.
Potentilla	fruticosa	"Mango Tango"	A bushy deciduous shrub with bright green leaves. Masses of yellow flowers with a variable orange eye, giving a bi-colour effect. Height and spread 75cm. Well-drained soil in sun or part shade. Flowers from may to August. Trim back after flowering.
Potentilla	fruticosa	"Pink Beauty"	A bushy deciduous shrub with bright green small compound leaves and rosy-pink flowers. Height 75cm. Spread 1.2m. Well-drained soil in full sun. Flowers from May to July. Trim back after flowering.
Potentilla	fruticosa	"Primrose Beauty"	A bushy shrub with grey-green leaves. Pretty cup-shaped, pale primrose yellow flowers over a long period. Height 1m. Spread

			1.5m. Well-drained soil in sun. May to July.
Potentilla	fruticosa	"Red Ace"	A bushy deciduous shrub with bright green leaves. Masses of pillar-box red flowers from May to July. Height 75cm. Spread 1.2m. Well-drained soil in part shade (to prevent flower colour fading). Trim back after flowering.
Potentilla	fruticosa	"Tangerine"	A bushy shrub with small dark green leaves and pretty cup-shaped, yellow flowers flushed pale orange-red. Height 1m. Spread 1m. Best in well-drained soil in sun. Flowers from May to July.
Potentilla	fruticosa	"Vilmoriniana"	An upright deciduous shrub with silvery grey leaves and pretty cup-shaped, creamy white flowers. Height 1.2m. Spread 1m. Well-drained soil in sun. Flowers from May to July.
Potentilla	hyarctica	"Nana"	Densely tufted alpine with hairy leaves giving a grey appearance. Stems carry yellow flowers 1-3 per stem. Well-drained soil in sun. May-Jun.
Potentilla	neumanniana	"Nana"	A compact, mat-forming perennial with loose clusters of saucer-shaped, yellow flowers. Height 8cm. Well-drained soil in sun. May-Aug.
Potentilla	ovina var. ovina		Tight white-edged pinnate leaf clusters are surrounded by multiple stems of little yellow flowers. Height 10cm. Well-drained soil in sun, or possibly the Alpine House.
Pratia	angulata	"Treadwellii"	An evergreen mat-forming alpine with pretty, white, star-shaped flowers. Height 5-8cm. Moist soil in sun. May-Jun.
Pratia	pedunculata		Small light blue flowers over spreading evergreen mats of small rounded leaves. Height 5cm. Prefers moist soil in some shade. May-Jul.
Pratia	pedunculata	"County Park"	Small dark blue flowers over spreading evergreen mat,

		During summer. Height 5cm. Prefers moist soil in Some shade.
Primula	"Arduaine"	Fat resting buds break into rosettes of toothed, heavily farinose, ovate leaves with ice-blue primrose flowers. Height 10cm. Moist well-drained soil in part shade. Feb.-Mar.
Primula	"Barbara Midwinter"	Rosettes of evergreen leaves with elongated petioles. Stems of purple-pink flowers, with well separated petals. Height 15cm. Moist well-drained soil in part shade. Feb.-Apr.
Primula	"Belarina Cobalt Blue"	A perennial with rosettes of veined bright green leaves and large double deep blue flowers on short stems. Height 20cm. Moist soil in part shade. Mar.-May.
Primula	"Belarina Cream"	A perennial with rosettes of veined bright green leaves and large double cream flowers on short stems. Height 20cm. Moist soil in part shade. Mar.-May.
Primula	"Belarina Nectarine"	A perennial with rosettes of veined bright green leaves and large double yellow flowers with a pink blush at the edges on short stems. Height 20cm. Moist soil in part shade. Mar.-May.
Primula	"Blue Riband"	Small leaved primrose of garden origin. Mauve-blue flowers with a yellow eye and red ring. Height 15cm. Moist well-drained soil in sun or part shade. Feb.-May.
Primula	"Blue Velvet"	A primrose type with many mid sky-blue flowers. Height 20cm. Moist soil in part shade. Mar.-May.
Primula	"Butter Yellow"	A perennial with rosettes of veined bright green leaves and large, scented double yellow flowers. Height 20cm. Moist soil in part shade. Mar.-May

Primula	"Captain Blood"	A rosette of deep green leaves with beetroot ribs and double deep red flowers on short stems. Height 20cm. Moist soil in part shade. Mar.-May.
Primula	"Corporal Baxter"	A perennial with rosettes of veined bright green leaves and double scarlet red flowers on short stems. Height 20cm. Moist soil in part shade. Mar.-May.
Primula	"Dark Rosaleen"	A rosette of evergreen deep bronze leaves and clusters of crimson flowers with a whitish edge. Height 10-15cm. Moist well-drained soil in sun or shade. March to May.
Primula	"Dawn Ansell"	Double pure white flowers with a green ruff. Height 20cm. Moist well-drained soil in sun or shade. Mar.-Jun.
Primula	"Don Keefe"	A polyanthus type with dusky orange-red flowers with a small yellow eye. Height 25cm. Moist soil in sun or part shade. Apr.-Jun.
Primula	"Drumcliffe"	A rosette of evergreen deep bronze leaves and clusters of lilac blushed white flowers with a yellow eye. Height 15cm. Moist well-drained soil in sun or shade. March to May.
Primula	"Duchess of York"	Rosettes of evergreen deep green leaves and clusters of rose-purple flowers on polyanthus heads. Height 15-20cm. Moist well-drained soil in part shade. Mar.-May.
Primula	"Elizabeth Killelay"	Unusual double flowered gold-laced primula. Height 20cm. Moist well-drained soil in part shade. Mar.-May. Divide regularly.
Primula	"Francisca"	Beautiful, long-lasting green flowers with a pale yellow eye. Height 20cm. Moist well-drained soil in sun or part shade. Mar.-Jul.
Primula	"Garryarde Crimson"	A rosette of evergreen deep purple-green leaves and clusters

		of crimson flowers with a yellow eye. Height 10-15cm. Moist well-drained soil in sun or shade. Mar.-May.
Primula	"Gold Lace Group"	A rosette of evergreen red-tinted mid-green leaves and clusters of very dark red almost black flowers edged gold. Height 25cm. Best in moist soil in part shade. March to May.
Primula	"Guinevere"	A rosette of evergreen deep bronze leaves and clusters of purplish pink flowers with a yellow eye. Height 10-15cm. Moist well-drained soil in sun or shade. March to May.
Primula	"Hemswell Blush"	Dull green, spatulate leaves with short stems of dusky pink flowers with a yellow eye. Gritty well-drained soil. Keep moist in summer. Alpine house. Mar.-Apr.
Primula	"Hyacinthia"	Neat hybrid with hyacinth-blue flowers with a white eye in spring. Height 15-20cm. Moist well-drained soil in sun or part shade.
Primula	"Iris Mainwaring"	A primrose type with deep green leaves and light pink flowers with a yellow eye. Height 15cm. Best in moist soil in part shade. Mar.-Apr.
Primula	"Jack in the Green" group	Similar to a normal hybrid primrose with the normal range of colours. However the flowers have a ruff of small green leaves behind them. Height 20cm. Moist soil in part shade. Mar.-May.
Primula	"Jan's Blush"	A primrose type with dark green leaves and pinky-purple stems with purple flushed buds opening to mid-primrose yellow, slightly scented flowers. Height 20cm. Moist soil in part shade. Mar.-May.
Primula	"Ken Dearman"	A perennial with rosettes of veined bright green leaves and double coppery orange flowers on short stems. Height 20cm.

		Moist soil in part shade. Mar.-May.
Primula	"Kinlough Beauty"	A neat primrose with good sized red-violet flowers and a white central stripe. Height 10cm. Moist well-drained soil in sun or shade.
Primula	"Lady Greer"	A rosette of evergreen bright green leaves, bronze in early spring, and pale yellow flowers. Height 10-15cm. Most soils in part shade. Mar.-May.
Primula	"Lingwood Beauty"	A primrose type with mid-green leaves and rose pink flowers, with a yellow eye. Height 20cm. Moist soil in part shade. Mar.-May.
Primula	"Maisie Michael"	Deep bronze-plum rosettes, with short stems of soft creamy yellow yellows. Height 10-15cm. Moist soil in part shade. Feb.-Apr.
Primula	"Matt's Mauve"	A primrose type with mid-green leaves and greyish-mauve flowers, with each petal having a light spot. Height 20cm. Moist soil in part shade. Mar.-May.
Primula	"McWatt's Cream"	A rosette of evergreen deep green leaves and clusters of cream flowers. Height 10-15cm. Moist well-drained soil in part shade. Mar.-May.
Primula	"Miss Indigo"	A perennial with rosettes of veined bright green leaves and double deep purple flowers with creamy white margins on short stems. Height 20cm. Moist soil in part shade. Mar.-May.
Primula	"Old Port"	A perennial with rosettes of veined deep green leaves and maroon-red flowers on short stems. Height 20cm. Moist soil in part shade. Mar.-May.
Primula	"Pink Ice"	A perennial with rosettes of veined bright green leaves and large double white flowers that fade to a pale pink. Height 20cm. Moist soil in part shade. Mar.-May.

Primula	"Romeo"	A primrose type with mid-green leaves and lilac flowers. Height 15cm. Best in moist soil in part shade. Mar.-Apr.
Primula	"Rowena"	A primrose type with mid-green leaves and magenta flowers with a yellow eye. Height 15cm. Best in moist soil in part shade. Mar.-Apr.
Primula	"Silver Lace Group"	A rosette of evergreen red-tinted mid-green leaves and clusters of very dark red almost black flowers edged silver. Height 25cm. Best in moist soil in part shade. March to May.
Primula	"Silver Lace Purple"	A rosette of evergreen red-tinted mid-green leaves and clusters of bright purple flowers edged silver. Height 25cm. Best in moist soil in part shade. March to May.
Primula	"Snowcushion"	Early flowering small leaved garden primrose with white flowers. Height 10cm. Moist well-drained soil in sun or shade.
Primula	"Strong Beer"	A perennial with rosettes of deep green, dark flushed leaves and double violet-purple flowers on polyanthus like stems. Height 20cm. Moist soil in part shade. Mar.-May.
Primula	"Tantallon"	An asiatic hybrid forming rosettes of toothed green leaves overlaid with greyish farina and short stems of purplish blue flowers with a yellow eye. Height 10-15cm. Moist soil in part shade. Mar.-Apr.
Primula	"Tie Dye"	A lovely primrose with fragrant sky-blue flowers heavily streaked white. Height 10-15cm. Moist well-drained soil in part shade.
Primula	"Tomato Red"	A "Wanda" hybrid forming small mats of fresh green leaves and tomato-red flowers with a small yellow eye. Height 10-15cm. Best in moist well-drained soil in part shade. Mar.-

			May.
Primula		"Wanda Hybrids"	A dwarf primula with rosettes of evergreen dark, purple tinged green leaves and flowers in a variety of colours. Height 10-15cm. Best in moist well-drained soil in part shade. Mar.-May.
Primula		"Wanda"	A dwarf primula with rosettes of evergreen dark green leaves and clusters of royal purple flowers. Height 10-15cm. Best in moist well-drained soil in part shade. Mar.-May.
Primula		"William Genders"	A primrose type with mid-green leaves and deep plum coloured flowers. Height 15cm. Best in moist soil in part shade. Mar.-Apr.
Primula	allionii	"Anna Griffith"	A tight cushion with evergreen rosettes of bright green leaves and clusters of very pale pink flowers with notched petals. Height 10cm. Well-drained soil in part shade. Mar.-May.
Primula	alpicola		A perennial with small rounded bright green leaves. Pendent bell-shaped, scented pale yellow, white or violet flowers on slender stems. Height 15-60cm. Moist soil in shade. Jun.-Jul.
Primula	alpicola var. alpicola		A perennial with small rounded bright green leaves. Pendent bell-shaped, scented white flowers on slender stems. Height 15-60cm. Moist soil in shade. Jun.-Jul. Seed raised so colour may vary.
Primula	alpicola var. violacea		A perennial with small rounded bright green leaves. Pendent bell-shaped, scented violet flowers on slender stems. Height 15-60cm. Moist soil in shade. Jun.-Jul.
Primula	auricula	"Alice Haysom"	A plum red "show-self". Height 15cm. Moist well-drained soil. To enjoy at its best, give protection from rain. Apr.-May.

Primula	auricula	"Cheops"	A light centred alpine with dark reddish mauve flowers shading lighter towards the outside of the petals. Height 15cm. Moist well-drained soil in sun or part shade.
Primula	auricula	"Cherry"	A red self with cherry-red flowers. Height 10cm. Best in Alpine House or outside protected from rain, in well drained soil, shaded through summer. Apr-May.
Primula	auricula	"Cortina"	A clear dark red self. Height 10cm. Best in Alpine House or outside protected from rain, in well drained soil, shaded through summer. Apr-May.
Primula	auricula	"Crackley Tagetes"	Double orange-buff flowers. Height 15cm. Moist well-drained fertile soil in part shade. Apr.-May. Best grown outdoors.
Primula	auricula	"Doublet"	A purple double with cream in the centre. Well suited to outdoor culture. Height 15cm. Moist well-drained soil in part shade. Apr.-May.
Primula	auricula	"Douglas Green"	A green-edge fancy. Best in Alpine house. Height 10cm. Well drained soil. Apr-May. Shade during the summer months.
Primula	auricula	"Gleam"	Yellow show self. A mustard yellow. Apr-May. Best in Alpine House. Height 10cm. Well drained soil.
Primula	auricula	"Hinton Admiral"	A green edged fancy with a red body. The leaves show some farina, giving them a grey-green colour. Best in Alpine House. Height 10cm. Well drained soil. Apr-May. Shade during the summer months.
Primula	auricula	"Holyrood"	A green edged variety with a wide black ring.
Primula	auricula	"Jenny"	Gold centred "Alpine" with burgundy flowers shading to beige. Height 15cm. Moist well-drained soil in sun or part shade.

Primula	auricula	"Joel"	A blue self with violet-blue flowers. Height 10cm. Best in Alpine House in well drained soil, shaded through summer. Apr-May
Primula	auricula	"Joy"	A red light centred "Alpine" form. Height 15cm. Moist well-drained soil in sun or part shade. Apr.-May.
Primula	auricula	"Karen Cordrey"	A green-edge fancy with dark red colour. Best in Alpine house. Height 10cm. Well drained soil. Apr-May. Shade during the summer months.
Primula	auricula	"Late Romantic"	A pale peach double. Well suited to outdoor culture. Height 15cm. Moist well-drained soil in part shade. Apr.-May. Can repeat flower.
Primula	auricula	"Lechistan"	A red self. Height 10cm. Best in Alpine House or outside protected from rain, in well drained soil, shaded through summer. Apr-May.
Primula	auricula	"Lindley"	A dark red self. Height 10cm. Best in Alpine House or outside protected from rain, in well drained soil, shaded through summer. Apr-May.
Primula	auricula	"Lisa's Red"	A red self. Height 10cm. Best in Alpine House or outside protected from rain, in well drained soil, shaded through summer. Apr-May.
Primula	auricula	"Old Red Dusty Miller"	Evergreen rosettes of leaves dusted with farina and clusters of red flowers with a white centre in spring. Height 10cm. Moist well-drained soil in sun or shade.
Primula	auricula	"Old Yellow Dusty Miller"	Evergreen rosettes with clusters of bright yellow flowers with a white centre in spring. Height 10cm. Moist well-drained soil in sun or shade.
Primula	auricula	"Pale Buff Double"	A double with cream flowers overlaid with pinky-brown. Well suited to outdoor culture. Height 15cm. Moist well-drained soil in part shade. Apr.-

			May.
Primula	auricula	"Pale Cream Double"	Flower colour and form is self-explanatory. Can be grown outside in part shade. Height 15cm. Moist well-drained soil in part shade.
Primula	auricula	"Piers Telford"	A gold centred alpine auricula with orange-brown shading to the flowers. Well suited to outdoor culture. Height 15cm. Moist well-drained soil in part shade. Apr.-May.
Primula	auricula	"Sandra"	A light centred "Alpine" with mauve-blue flowers shading lighter. Height 15cm. Moist well-drained soil in sun or part shade.
Primula	auricula	"Shaun"	A golden yellow double with darker shading to the centre and greyish green leaves. Well suited to outdoor culture. Height 15cm. Moist well-drained soil in part shade. Apr.-May.
Primula	auricula	"Star Wars"	A grey edged fancy. Best in Alpine house. Height 10cm. Well drained soil. Apr-May. Shade during the summer months.
Primula	auricula	"Sweet Pastures"	A grey edged fancy. The colour of the body is yellow. Height 10cm. Best in Alpine house. Well drained soil. Apr-May. Shade during the summer months.
Primula	auricula	"Sword"	An unusual double having dark flowers with a substantial green edge. Height 10cm. Well drained soil. Apr-May. Shade during the summer months.
Primula	auricula	"Ted Roberts"	A gold centred alpine auricula with burgundy shading to the flowers. Well suited to outdoor culture. Height 15cm. Moist well-drained soil in part shade. Apr.-May.
Primula	auricula	"Wincha"	A red self with dark red almost black slightly fragrant flowers. Height 10cm. Best in Alpine House in well drained soil,

			shaded through summer. Apr-May
Primula	beesiana		A perennial with tiers of reddish to lilac pink flowers with a yellow eye in early summer. Height 60cm. Moist fertile soil in sun or part shade.
Primula	blinii		Rosettes of petiolate, incised leaves, with short stems carrying umbels of purple-pink flowers. Height 10-20cm. Moist soil in part shade. Jun.-Jul.
Primula	bulleyana		A perennial with large mid-green leaves. Stout stems with tiers of deep orange flowers in early summer. Height 60-90cm. Moist soil in sun or part shade. Jun.-Jul.
Primula	burmanica	hybrids	A perennial with large green leaves. Stout stems with tiers of reddish purple flowers with a yellow eye in the type species. However hybrids can be orange, mauve etc. Height 60cm. Moist soil in part shade. Jun.-Jul.
Primula	capitata		Small rosettes of green leaves covered in white farinose. Small deep violet bell-shaped flowers in rounded flattened heads. Height 20-30cm. Moist soil in part shade. Jul.-Aug.
Primula	chionantha		A perennial with green leaves covered in yellow farina. Clusters of bell-shaped ivory-white flowers. Height 45-75cm. Moist soil in shade. Apr.-May.
Primula	chionantha ssp. melanops		Strap-like farinose leaves with stems of violet-purple flowers with a darker eye. Height 20-35cm. Moist soil in part shade. Apr-Jun.
Primula	chionantha ssp. sinopurpurea		A perennial with green leaves covered in yellow farina. Clusters of bell-shaped lavender pink to rose-violet flowers with a paler eye. Height 40-60cm. Moist soil in shade. May-Jun.
Primula	chungensis		A candelabra type with stems carrying whorls of bright yellow to pale orange flowers opening

			from orange buds. Height 60cm. Moist soil in sun or part shade.
Primula	cockburniana		A short-lived perennial with rosettes of green leaves and wiry stems of vivid orange-red flowers. Height 20-30cm. Moist soil in part shade. May-Jul.
Primula	cortusoides		Umbels of rich pink flowers are carried above hairy, crinkled pale green leaves. Height 15cm. Moist soil in part shade. Mar.-Apr. Dies back by mid-summer.
Primula	darialica		Rosettes of toothed lanceolate leaves heavily farinose, with short stems carrying several bright pink flowers with a small yellow eye. Height 15cm. Moist soil in part shade. Apr.-May.
Primula	denticulata		A perennial with rosettes of mid-green leaves. Stout stems of rounded, lilac, purple, crimson or white flowers in spring. Height 45cm. Moist soil in sun or part shade. Apr.-May.
Primula	denticulata	"Glenroy Crimson"	A perennial with rosettes of mid-green leaves. Stout stems of rounded, crimson flowers. Height 30cm. Moist soil in sun or part shade. Apr.-May.
Primula	denticulata	"Ronsdorf Strain"	A shorter version of this perennial with rosettes of mid-green leaves. Stout stems of rounded, lilac, purple, crimson or white flowers. Height 15-25cm. Moist soil in sun or part shade. Apr.-May.
Primula	denticulata	"Rubin"	A perennial with rosettes of mid-green leaves. Stout stems of rounded, crimson flowers. Height 30cm. Moist soil in sun or part shade. Apr.-May.
Primula	denticulata var. alba		A perennial with rosettes of mid-green leaves. Stout stems of rounded, white flowers in spring. Height 45cm. Moist soil in sun or part shade. Apr.-May.
Primula	elatior		Our native Oxlip. Rosettes of soft green leaves and stems of sulphur-yellow flowers. Height 15-20cm. Moist soil in part

shade. Apr.-May.

Primula	elatior	"Hybrids"	Rosettes of soft green leaves and stems of deep to sulphur-yellow nodding flowers. Height 15-20cm. Moist soil in part shade. Apr.-May.
Primula	elatior	wild form	Seed raised, this form is smaller in all its parts than many "Oxlip"s. Stems of nodding one-sided primrose-yellow flowers. Height 10-15cm. Moist soil in part shade. Apr.-May.
Primula	elatior ssp. meyeri		A perennial with rosettes of soft green leaves. Stems carry one-sided umbels of violet flowers. Height 15-20cm. Moist soil in part shade. Apr.-May.
Primula	flaccida		A choice species with light green lanceolate leaves and short stems of hanging pale purple flowers. The stems and flowers have farina. Height 15-20cm. Moist well-drained soil in part shade. Apr.-May.
Primula	florindae		A perennial with large rosettes of mid-green leaves. Stout stems of pendent, fragrant sulphur-yellow flowers. Height 60-90cm. Moist soil in part shade. Jul.-Sept.
Primula	florindae	"Orange Hybrids"	A perennial with large rosettes of mid-green leaves. Stout stems of pendent, fragrant orange flowers with heavy farina. Height 60-90cm. Moist soil in part shade. Jul.-Sept.
Primula	florindae	hybrids	A perennial with large rosettes of mid-green leaves. Stout stems of pendent, fragrant sulphur-yellow flowers with shades of orange. Height 60-90cm. Moist soil in part shade. Jul.-Sept.
Primula	frondosa		Rosettes of mid-green leaves with greyish farina. Short stems of pinkish lilac flowers with a yellow eye. Height 5-15cm. Moist soil in part shade. Apr.-May.

Primula	gemmifera		Rosettes of slightly rounded mid-green leaves and tall stems carrying pink, white eyed flowers in small terminal clusters. Height 30cm. Moist soil in part shade. Mar.-Apr.
Primula	japonica	"Apple Blossom"	An herbaceous perennial with large coarse strap-like leaves and stout stems of white, rose flushed flowers arranged in tiered whorls. Height 45cm. Moist soil in part shade. May-Jun.
Primula	japonica	"Carminea"	A perennial with large green leaves and stout stems with tiers of carmine-red flowers. Height 45cm. Moist soil in part shade. May-Jun.
Primula	japonica	"Glowing Embers"	An herbaceous perennial with large coarse strap-like leaves and stout stems of rich mauve-pink flowers arranged in tiered whorls. Height 45cm. Moist soil in part shade. May-Jun.
Primula	japonica	"Miller's Crimson"	A perennial with large green leaves and stout stems with tiers of crimson flowers. Height 45-75cm. Moist soil in part shade. May-Jun.
Primula	japonica	"Oriental Sunrise"	An herbaceous perennial with large coarse strap-like leaves and stout stems of bright red flowers arranged in tiered whorls. Height 45cm. Moist soil in part shade. May-Jun.
Primula	japonica	"Postford White"	A perennial with large green leaves and stout stems with tiers of white flowers with a red eye. Height 45-75cm. Moist soil in part shade. May-Jun.
Primula	jesoana		Hairy lobed leaves and nodding purple-pink flowers. Height 15-25cm. moist well-drained soil in part shade. May-Jun.
Primula	kisoana		Rounded leaves on a rhizomatous plant. Short stems carry umbels of tubular purple-pink flowers. Height 15cm. Moist well-drained soil in part shade. Apr.-May

Primula	<i>luteola</i>		From rosettes of basal leaves, arise stems carrying globose heads of yellow flowers. Height 15-35cm. Moist soil in part shade. Apr.-May.
Primula	<i>marginata</i>		An alpine primula with evergreen rosettes of leathery green leaves, often with farina and clusters of lilac, blue, or mauve flowers. Height 15cm. Moist well-drained soil in sun or part shade. Mar.-May.
Primula	<i>marginata</i>	"Beverley Reid"	An alpine primula with evergreen rosettes of leathery grey-green leaves, often with farina and clusters of relatively large lavender flowers with a white eye. Height 15cm. Moist well-drained soil in sun or part shade. Mar.-May.
Primula	<i>marginata</i>	"Caerulea"	Good clear blue, small, slightly frilled flowers over serrated leaves, well dusted with farina. Height 15cm. Moist well-drained sunny spot. Mar.-Apr.
Primula	<i>marginata</i>	"Clear's Variety"	Largish rather coarsely toothed, leaves with good farina and heads of large light pinkish-mauve flowers. Height 15cm. Moist well-drained soil in sun or part shade. Mar.-May.
Primula	<i>marginata</i>	"Drake's Form"	A form with neatly serrated leaves and medium flowers of blue-mauve with a white eye. Height 15cm. Moist well-drained soil in sun or part shade. Mar.-May.
Primula	<i>marginata</i>	"Dwarf Form"	An alpine primula with tight, evergreen rosettes of toothed green leaves, and clusters of small lilac-blue flowers. Height 10cm. Moist well-drained soil in sun or part shade. Mar.-May.
Primula	<i>marginata</i>	"Janet"	A <i>marginata</i> hybrid with green leaves lightly coated in farina and heads of pale blue flowers with a white eye. Height 15cm. Moist well-drained sunny spot. Mar.-Apr.

Primula	marginata	"Jenkins' Variety"	A variety with narrow, toothed, greyish-green leaves and pale lilac-blue flowers. Height 15cm. Moist well-drained sunny spot. Mar.-Apr.
Primula	marginata	"Kesselrings Var."	A smallish plant with neatly serrated leaves and nearly flat rich mauve flowers with a well defined white eye. Height 15cm. Moist well-drained sunny spot. Mar.-Apr.
Primula	marginata	"Laciniata"	Evergreen rosettes of deeply incised, leathery green leaves and clusters of sky blue flowers with a white eye. Height 15cm. Moist well-drained soil in sun or part shade. Mar.-May.
Primula	marginata	"Linda Pope"	An alpine primula with evergreen rosettes of wide-toothed, leathery green leaves and clusters of large mauve-blue flowers with a white eye. Height 15cm. Moist well-drained soil in sun or part shade. Mar.-May.
Primula	marginata	"Prichard's Var"	Lilac purple flowers over serrated blue-green leaves. Height 15cm. Moist well-drained sunny spot. Mar.-Apr.
Primula	maximowiczii		Rosettes of broad to elliptic leaves, and stems with hanging flowers of intense crimson. Height 20-40cm. Moist soil in part shade. May-Jun.
Primula	minor		Rosettes of narrow toothed leaves, and short stems carrying small whorls of lilac pink flowers. Height 10-15cm. Moist well-drained soil in part shade.
Primula	moupinensis		A stoloniferous plant with serrated, obovate leaves and short stems bearing lilac pink flowers with a white eye. Height 15cm. Moist soil in part shade. Apr.-May
Primula	orbicularis		A perennial with narrow, green leaves covered in yellow farina. Clusters of fragrant bell-shaped pale yellow flowers. Height 20-25cm. Moist soil in shade. Apr.-

May.

Primula	poissonii		A perennial with large glaucous green leaves. Stout stems with tiers of deep purplish crimson flowers with a yellow eye. Height 40cm. Moist soil in part shade. Jun.-Jul.
Primula	polyneura		Tufts of rounded, hairy, scalloped leaves with stems carrying umbels of purple-red to lilac pink flowers with a yellow eye. Height 15-30cm. Moist soil in part shade. May-Jun.
Primula	prenantha		A small candelabra type whorls of nodding yellow flowers with dark maroon calyces. Height 15-20cm. Moist soil in part shade. Apr.-May
Primula	prolifera		A perennial with rosettes of deep green leaves. Stout stems with tiers of pale to deep yellow flowers occasionally light violet. Height 60cm. Moist soil in part shade. Jun.-Jul.
Primula	pulverulenta		A perennial with rosettes of deep green leaves. Stout, mealy, stems with tiers of deep red flowers with purple eyes. Height 60-90cm. Moist soil in sun or part shade. May-Jun.
Primula	pulverulenta	"Bartley's Strain"	A perennial with rosettes of deep green leaves. Stout, mealy, stems with tiers of pink flowers with a pale eye. Height 60-90cm. Moist soil in sun or part shade. May-Jun.
Primula	rosea	"Grandiflora"	An alpine with rosettes of mid-green leaves, often bronze-flushed and clusters of relatively large shocking pink flowers just as the leaves develop. Height 10-15cm. Moist soil in sun or part shade. Mar.-Apr.
Primula	ruprechtii		Seed obtained as such. Possibly a sub-species of P. veris. Rosettes of soft green leaves and stems of yellow, orange or

			red flowers. Height 15-20cm. Moist soil in part shade. Apr.-May.
Primula	secundiflora		A perennial with narrow green leaves. Slender stems with clusters of pendent reddish purple flowers. Height 30-45cm. Moist soil in part shade. Jun.-Jul.
Primula	sieboldii	"Alba"	From crinkled leaves, appear rounded clusters of white flowers from May-Jun. Height 15-20cm. Moist soil in part shade. Leaves disappear by Jul.
Primula	sieboldii	"Blue Shades"	Rounded clusters of laced flowers, white with pale lilac-blue on the reverse. May-Jun. Height 15-20cm. Moist soil in part shade. Leaves disappear by Jul.
Primula	sieboldii	"Carefree"	Rounded clusters of rich pink flowers with a white eye. Height 15-20cm. Moist soil in part shade. May-Jun. Leaves disappear by Jul.
Primula	sieboldii	"Hybrids"	From crinkled leaves, appear rounded clusters of flowers in shades of blue, pink or white. Height 15-20cm. Moist soil in part shade. May-Jun. Leaves disappear by Jul.
Primula	sieboldii	"Lilac Sunbonnet"	Clusters of large frilled pink-backed white flowers. May-Jun. Height 15-20cm. Moist soil in part shade. Leaves disappear by Jul.
Primula	sieboldii	"Mikado"	Rounded clusters of pink flowers, with white streaks. May-Jun. Height 15-20cm. Moist soil in part shade. Leaves disappear by Jul.
Primula	sieboldii	"Pink Delight"	A selected strain with clusters of large, rounded, deep clear pink flowers. May-Jun. Height 15-20cm. Moist soil in part shade. Leaves disappear by Jul.
Primula	sieboldii	"Pink Shades"	Rounded clusters of laced flowers, white with pale pink on the reverse. May-Jun. Height 15-20cm. Moist soil in part

			shade. Leaves disappear by Jul.
Primula	sieboldii	"Snowdrop"	From crinkled leaves, appear rounded clusters of large, white flowers with nearly entire petals. Height 15-20cm. Moist soil in part shade. Leaves disappear by the end of July.
Primula	sikkimensis		An herbaceous perennial with large rosettes of shiny green leaves. Stout stems of pendent soft yellow flowers in summer. Height 60cm. Moist soil in sun or part shade. Jun.-Aug.
Primula	veris		Cowslip. A native perennial with rosettes of mid-green leaves. Stout stems bear clusters of nodding pale to deep yellow, fragrant flowers. Height 10-20cm. Moist soil in sun or part shade. Apr.-May.
Primula	veris	"Hybrids"	Rosettes of mid-green leaves. Stout stems bear clusters of nodding pale to deep yellow, red or orange fragrant flowers. Height 10-20cm. Moist soil in sun or part shade. Apr.-May.
Primula	veris	"Katy McSparron"	A perennial with rosettes of mid-green leaves. Stout stems bear clusters of nodding deep yellow, double, fragrant flowers. Height 10-20cm. Moist soil in sun or part shade. Apr.-May.
Primula	veris	ssp. macrocalyx	Cowslip. Rosettes of mid-green leaves. Stout stems bear clusters of nodding pale to deep yellow, fragrant flowers with inflated calyces. Height 10-20cm. Moist soil in sun or part shade. Apr.-May.
Primula	viallii		A short-lived perennial with rosettes of soft downy leaves. From red buds arise dense heads of small tubular, lilac-blue flowers. Height 45cm. Moist soil in part shade. May-Jun.
Primula	vulgaris		The native Primrose, with evergreen rosettes of deeply veined green leaves and clusters

			of pale creamy yellow, fragrant flowers. Height 5-15cm. Moist soil in part shade. Mar.-May.
Primula	vulgaris	"Hybrids"	Evergreen rosettes of deeply veined green leaves and clusters of, fragrant flowers in shades of yellow and lilac. Height 5-15cm. Moist soil in part shade. Mar.-May.
Primula	vulgaris	"Lilacina Plena"	"Quakers Bonnet". A perennial with rosettes of deeply veined green leaves and clusters of pale pink double flowers. Height 5-15cm. Moist soil in part shade. Ap.-May.
Primula	vulgaris ssp. sibthorpii		A primrose with rosettes of deeply veined green leaves and clusters of dusky lilac flowers Height 5-15cm. Moist well-drained soil in sun or part shade. April to May.
Primula	waltonii		A perennial with rosettes of deep green leaves. Upright stems carry scented flowerheads of hanging funnel-shaped bells in wine-red or violet shades. Height 45cm. Moist well-drained soil in part shade. May-Jun.
Primula	wilsonii var. anisodora		A candelabra type with long, narrow and shiny leaves edged with small teeth and reputed to smell of aniseed. Whorls of small crimson to purple flowers. Height 60cm. Moist soil in sun or part shade.
Primula	x bullesiana		A hybrid candelabra primula giving whorls of flowers in a wide range of colours. Height 30-60cm. Moist soil in part shade. May-Jun.
Primula	x chunglenta		A candelabra type with stems carrying whorls of deep red buds opening to golden yellow flowers. Variations can occur. Height 60-70cm. Moist soil in part shade. May-Jun.
Primula	x forsteri	"Bileckii"	A dwarf primula with rosettes of evergreen shiny dark green toothed leaves and clusters of

			red-pink flowers on very short stems. Height 5-8cm. Moist soil in part shade. Mar.-May.
Primula	x forsteri	"Dianne"	A dwarf primula with rosettes of evergreen shiny dark green leaves and clusters of pink-mauve flowers on very short stems. Height 5-8cm. Moist soil in part shade. Mar.-May.
Primula	x pubescens	"Boothman's Var."	Clusters of crimson-purple flowers with a white eye in spring. Height 10-15cm. Moist well-drained soil in sun or part shade.
Primula	x pubescens	"Freedom"	Evergreen rosettes with clusters of deep lilac flowers in spring. Height 10-15cm. Moist well-drained soil in sun or part shade. Mar.-May.
Primula	x pubescens	"Mrs. J. H. Wilson"	Evergreen rosettes of pale green serrated leaves with clusters of deep purple flowers with a white eye. Height 10-15cm. Moist well-drained soil in sun or part shade. Mar.-May.
Prostanthera	cuneata		A bushy shrub with tiny dark green leaves, strongly scented when crushed. Broadly tubular white flowers with pretty purple and yellow markings inside. Height 30-90cm. Moist well-drained soil in sun. Jun.-Aug.
Prunus	incisa	"Kojo-no-mai"	A rounded shrub with yellow-green leaves when young on contorted stems. Pretty pale red flowers opening from light red buds flowers in spring. Height 2m. Spread 2m. Moist well-drained soil in sun. April to May.
Prunus	sargentii		A spreading tree with dark green leaves, red when young, turning orange-red in autumn. Pretty bowl-shaped pink flowers in mid-spring followed by glossy crimson fruit. Height 20m. Spread 15m. moist well-drained soil in sun.

Pterocarya	fraxinifolia		A large wide-spreading, fast growing tree with a short deeply furrowed trunk. Dark green pinnate leaves with toothed leaflets and greenish flowers in long pendulous catkins. Grows best in a moist soil. Eventual height 30m. (after 150 years).
Pterostylis	curta		A terrestrial orchid with ovate basal leaves and stems carrying strange greenish hooded flowers with a greyish sheen. Height 25cm. Moist well-drained soil in part shade. Apr.May. Needs winter protection
Ptilotrichum	spinosum	"Roseum"	Semi-evergreen shrublet with small grey leaves and racemes of tiny pink flowers in May-Jun. Height 15cm. Full sun in well-drained soil.
Pulmonaria		"Blue Ensign"	Deep azure blue flowers from March onwards. Plain dark leaves appear from below ground. Part shade. Keep moist in summer. Height 25cm.
Pulmonaria		"Bubble Gum"	A clump-forming perennial with good spotted mid-green leaves and prolific heads of good pink flowers. Height 30-40cm. Moist soil in part shade. Feb.-Mar.
Pulmonaria		"Cotton Cool"	Clumps of bristly, entirely silvered leaves and heads of blue flowers fading to pink. Height 25-30cm. Moist well-drained spot in part shade. Feb.-May
Pulmonaria		"Diana Clare"	Large violet-blue flowers with a purple stripe and long pointed silvered green leaves. Height 25cm. Moist well-drained spot in part shade. Feb.-May
Pulmonaria		"Ice Ballet"	A clump-forming perennial with good spotted mid-green leaves and many heads of pure white flowers. Height 25-30cm. Moist soil in part shade. Feb.-Mar.
Pulmonaria		"Lewis Palmer"	A clump-forming perennial with dark green leaves with large greenish white spots and pretty flowers opening pink then

			turning bright blue. Height 35cm. Moist soil in part shade. Apr.-May.
Pulmonaria		"Little Star"	Clumps of small bristly, deep green leaves heavily spotted light green. Stems of intense blue flowers. Height 15-20cm. Moist well-drained soil in part shade. Mar.-May.
Pulmonaria		"Majeste"	Silvered grey-green leaves with pink and violet flowers. Height 25cm. Moist well-drained soil in part shade. Mar.-May.
Pulmonaria		"Opal"	A clump-forming perennial with good spotted mid-green leaves and prolific heads of pretty pale blue flowers. Height 25-30cm. Moist soil in part shade. Feb.-Mar.
Pulmonaria		"Pink Haze"	A new variety with good silver markings on the leaves and stems of relatively large open pink flowers. Height 30cm. Moist soil in part shade. Feb.-Mar.
Pulmonaria		"Polar Splash"	A variety with good silver markings on the leaves and stems of blue/pink flowers. Height 25cm. Moist soil in part shade. Feb.-Mar.
Pulmonaria		"Raspberry Splash"	A clump-forming perennial with good spotted narrow, green leaves and prolific heads of pretty dusky raspberry-coral flowers maturing blue. Height 25-30cm. Moist soil in part shade. Feb.-Mar.
Pulmonaria		"Smokey Blue"	A clump-forming perennial with dark green blotched leaves and pretty pink flowers turning light blue. Height 30cm. Moist soil in part shade. Mar.-May.
Pulmonaria		"Stillingfleet Meg"	A clump-forming perennial with good spotted mid-green leaves and prolific heads of pretty clear pink flowers maturing blue. Height 25-30cm. Moist soil in part shade. Feb.-Mar.
Pulmonaria	longifolia	"Ankum"	A small clump-forming perennial with lance shaped,

bristly, heavily silvered leaves and pretty blue flowers with hints of purple. Height 25cm. Moist soil in part shade. March to May.

Pulmonaria	longifolia	"Dordogne"	A clump-forming perennial with lance shaped, bristly, heavily white spotted bright green leaves and pretty blue flowers. Height 40cm. Moist soil in part shade. March to May.
Pulmonaria	mollis	"Royal Blue"	A larger lung wort with hairy green leaves, with no spots and mid-blue flowers fading to pink. Height 35cm. Moist soil in part shade. March to May.
Pulmonaria	officinalis	"Blue Mist"	A clump-forming perennial with bristly, white spotted bright green leaves and pretty pale blue flowers. Height 25cm. Moist soil in part shade. March to May.
Pulmonaria	officinalis	"Sissinghurst White"	A clump-forming evergreen perennial with bristly, white spotted bright green leaves and pretty pure white flowers opening from pale pink buds. Height 30cm. Moist soil in part shade. Mar.-May.
Pulmonaria	officinalis	"White Wings"	A clump-forming perennial with bristly, white spotted bright green leaves and pretty pure white flowers. Height 25cm. Moist soil in part shade. March to May.
Pulmonaria	rubra		A clump-forming, evergreen perennial with velvety bright green leaves and pretty brick red to salmon-red flowers. Height 40cm. Moist well-drained soil in part shade. Feb.-Apr.
Pulmonaria	rubra	"Bowles Red"	A clump-forming perennial with velvety bright green leaves with faint spots and pretty coral-red flowers. Height 40cm. Moist soil in part shade. Feb.-Apr.
Pulmonaria	saccharata	"Dora Bielefeld"	A clump-forming perennial with faintly white spotted mid-green leaves and pretty dusky pink

			flowers. Height 25-30cm. Moist soil in part shade. Feb.-May.
Pulmonaria	saccharata	"Frühlingshimmel"	A clump-forming perennial with silver-spotted bright green leaves and short stems carrying pale blue flowers. Height 25cm. Moist well-drained soil in part shade. Mar.-May.
Pulmonaria	saccharata	"Leopard"	A clump-forming perennial with heavily spotted bright green leaves and short stems carrying pinkish-red flowers. Height 30cm. Moist well-drained soil in part shade. Mar.-May.
Pulmonaria	saccharata	"Mrs. Moon"	A clump-forming perennial with bright green leaves spotted pale green. Pink flowers age to violet. Height 30cm. Moist well-drained soil in part shade. Mar.-May.
Pulmonaria	saccharata	"Silverado"	A clump-forming perennial with heavily silvered leaves and pretty blue and pink flowers. Height 30cm. Moist soil in part shade. Mar.-May.
Pulsatilla	albana		An alpine with hairy, finely divided mid-green leaves and nodding violet flowers, followed by fluffy seedheads. Height 20-30cm. Well-drained soil in sun. Apr.-May.
Pulsatilla	albana	"Lutea"	An alpine with hairy, finely divided mid-green leaves and nodding yellow flowers, followed by fluffy seedheads. Height 20-30cm. Well-drained soil in sun. Apr.-May.
Pulsatilla	campanella		An herbaceous perennial with finely cut foliage and nodding cup-shaped light bluish violet to lilac flowers. Height 15-25cm. Well-drained soil in sun. Apr.-May.
Pulsatilla	georgica		An herbaceous perennial with finely cut foliage and plum coloured flowers backed with white hairs and having prominent yellow stamens, followed by fluffy seedheads. Height 20-30cm. Well-drained

soil in sun. Mar.-Apr.

Pulsatilla	halleri ssp. slavica		Densely hairy basal leaves. Flowers appear before the leaves, erect bell-shaped dark violet. Height 15-20cm. Well-drained soil in sun. Mar.-May.
Pulsatilla	halleri ssp. taurica		Multi-lobed, densely hairy basal leaves. Flowers appear before the leaves, erect bell-shaped dark violet. Height 15-20cm. Well-drained soil in sun. Mar.-May.
Pulsatilla	vulgaris		An alpine with finely divided light green leaves and pendent bell-shaped mauve to purple flowers in spring, followed by fluffy seedheads. Height 10-20cm. Well-drained soil in sun. Mar.-May.
Pulsatilla	vulgaris	"Alba"	An alpine with finely divided light green leaves and pendent bell-shaped white flowers, followed by fluffy seedheads. Height 10-20cm. Well-drained soil in sun. Mar.-May.
Pulsatilla	vulgaris	"Barton's Pink"	An alpine with finely divided light green leaves and pendent pinkish white flowers, followed by fluffy seedheads. Height 10-20cm. Well-drained soil in sun. Mar.-May.
Pulsatilla	vulgaris	"Deep Pink Form"	A selection of the common Pasque flower with finely divided green leaves and at its best, deep reddish pink flowers. Height 15-20cm. Well-drained soil in sun. Mar.-May.
Pulsatilla	vulgaris	"Eva Constance"	An alpine with finely divided light green leaves and bell-shaped bright red flowers, followed by fluffy seedheads. Height 10-20cm. Well-drained soil in sun. Mar.-May.
Pulsatilla	vulgaris	"Gotlandica"	An alpine with finely divided light green leaves and pendent bell-shaped mauve to purple flowers in spring, followed by fluffy seedheads. Height 10-

20cm. Well-drained soil in sun. Mar.-May. Varies from the species in having rounded petals.

Pulsatilla	vulgaris	"Papageno"	An alpine with finely divided light green leaves and fringed flowers, sometimes double, of pink, white or mauve. followed by fluffy seedheads. Height 10-20cm. Well-drained soil in sun. Mar.-May. Young plants may not show their true form.
Pulsatilla	vulgaris	"Perlen Glocke"	A perennial with finely divided light green leaves and outward facing bell-shaped pale pink flowers, followed by fluffy seedheads. Height 20cm. Well-drained soil in sun. Mar.-May.
Pulsatilla	vulgaris	"Rode Glokke"	Stronger growing than the normal form this alpine has finely divided light green leaves and bell-shaped red flowers, followed by fluffy seedheads. Height 30cm. Well-drained soil in sun. Mar.-May.
Pulsatilla	vulgaris	"Rubra"	An alpine with finely divided light green leaves and bell-shaped flowers in shades of velvety red, followed by fluffy seedheads. Height 10-20cm. Well-drained soil in sun. Mar.-May.
Pulsatilla	vulgaris ssp. grandis		An alpine with finely divided light green leaves and large bell-shaped pale rosy-lilac flowers before the leaves, followed by fluffy seedheads. Height 10-20cm. Well-drained soil in sun. Mar.-Apr.
Pulsatilla	vulgaris ssp.gotlandica		An alpine with finely divided light green leaves and pendent bell-shaped mauve to purple flowers, followed by fluffy seedheads. Height 10-20cm. Well-drained soil in sun. Mar.-May. Differs from species in having rounded petals.
Puschkinia	scilloides var. libanotica		A spring-flowering bulb with narrow green leaves and clusters of white starry flowers

		with a pale blue central bar. Height 20cm. Well-drained soil in sun or shade. Mar.-May.
Pyracantha	"Saphyr Jaune"	Evergreen shrub with glossy green leaves. Large heads of small white flowers in early summer, followed by yellow berries in the autumn. Best in sun in fertile well-drained soil. Can be trained as a wall shrub.
Pyracantha	"Saphyr Orange"	Evergreen shrub with glossy green leaves. Large heads of small white flowers in early summer, followed by orange berries in the autumn. Best in sun in fertile well-drained soil. Can be trained as a wall shrub.
Pyracantha	"Saphyr Rouge"	Large heads of small white flowers in early summer, followed by scarlet-orange berries in the autumn. Best in sun in fertile well-drained soil. Can be trained as a wall shrub.
Pyracantha	"Soleil d'Or"	An upright shrub with red tinged stems and glossy dark green leaves. Clusters of white flowers are followed by golden yellow berries. Height 3m. Spread 2.5m. Best in sun in fertile well-drained soil. Can be trained as a wall shrub. Flowers from June to Ju
