

<b>Raffenaldia</b>	primuloides		Rosettes of deep green lyrate leaves with short stemmed, four petalled yellow flowers. Height 10cm. Moist well-drained soil in part shade. Apr.-May. Needs winter protection.
<b>Ramonda</b>	myconi		Crinkled dark green, slightly hairy leaves and clusters of pretty deep violet-blue flowers with yellow anthers. Height 10cm. Moist well-drained soil in part shade. May.-Jun.
<b>Ramonda</b>	myconi	"Rosea"	Crinkled dark green, slightly hairy leaves and clusters of pretty rose-pink flowers with yellow anthers. Height 10cm. Moist well-drained soil in part shade. May.-Jun.
<b>Ranunculus</b>	ficaria	"Brambling"	Pointed maroon-brown leaves marked with pewter and small yellow flowers. Height 15cm. Moist soil in part shade. Feb-May. Summer dormant.
<b>Ranunculus</b>	ficaria	"Brazen Hussy"	Pretty brown leaved form of the native celandine. Yellow buttercup flowers in Mar-Apr. Height 10-15cm. Goes dormant by June. Most soils and conditions.
<b>Ranunculus</b>	ficaria	"Copper Nob"	Pretty brown leaved form of the native celandine. Orange buttercup flowers in Mar-Apr. Height 10-15cm. Goes dormant by June. Most soils and conditions.
<b>Ranunculus</b>	ficaria	"Flore-pleno"	A spreading perennial with heart-shaped glossy, dark green leaves. Short stems of fully double golden yellow flowers with bronzey backs. Height 5cm. Moist soil in part shade. Mar.-Apr.
<b>Ranunculus</b>	ficaria	"Green Petal"	A spreading perennial with heart-shaped glossy, dark green faintly marbled leaves. Short stems of double green-yellow flowers in early spring. Height 5cm. Moist soil in part shade.

<b>Ranunculus</b>	ficaria	"Salmon's White"	A spreading perennial with heart-shaped glossy, pale green leaves with bronze marks. Short stems of cream flowers tinted purple-blue on the reverse of the petals. Height 5cm. Moist soil in part shade. Mar.-Apr.
<b>Ranunculus</b>	gramineus		Narrow grey-green foliage with clear yellow buttercup flowers. Rich, moist soil in sun or part shade. Height 30cm. Mar.-Apr.
<b>Ranunculus</b>	montanus	"Molten Gold"	A mat-forming perennial with glossy dark green basal leaves and stems of cup-shaped, shining bright yellow flowers. Height 10cm. Moist well-drained soil in sun or part shade. Jun.-Jul.
<b>Ranunculus</b>	parnassifolius		Rosettes of heart shaped deep green leaves, and short stems of white buttercup flowers. Height 15cm. Well-drained soil in sun. Apr.-May. Dislikes winter wet.
<b>Ranunculus</b>	seguieri		Finely cut, tiny, waxy, grey-green leaves and short stems of milky white flowers with a yellow centre. Height 10cm. Moist well-drained soil in sun or part shade. May-Jun.
<b>Reineckia</b>	carnea		An evergreen perennial with arching green leaves and fragrant deep pink flowers, rarely followed by red berries. Height 20cm. Moist peaty soil in part shade. Apr.-May
<b>Rhamnus</b>	alaternus	"Argenteovariegata"	An evergreen shrub with grey-green leaves with conspicuous white margins. Clusters of yellow-green flowers followed by red fruit ripening to black. Height 5m. Spread 4m. Well-drained soil in sun. Flowers from May to June. Fruits from August.
<b>Rhamnus</b>	frangula	"Asplenifolia"	A deciduous shrub with narrow cut-leaf glossy green foliage. Insignificant greenish white flowers in summer are followed by red berries that turn black as they ripen. Height 4-5m. Spread

			2-3m. Moist well-drained soil in sun or part shade.
<b>Rhamnus</b>	imeretina		A large shrub with stout upright stems and large corrugated leaves, dark green above, downy below. Leaves turn a bronze-purple in autumn. Height 2.5m. Moist soil in part shade.
<b>Rhaphiolepis</b>	umbellata		A bushy evergreen shrub with leathery, dark green leaves. Pretty white flowers sometimes tinted rose-pink. Height 1.5m. Spread 1.5m. Moist well-drained soil in sun. June to July. Shelter from cold drying winds.
<b>Rhodanthemum</b>		"African Eyes"	Silvered filigree foliage and stems of daisy flowers with white petals and dark brown centres. Height 25cm. Well-drained soil in sun. Needs winter protection.
<b>Rhodanthemum</b>	catananche		A silver-grey leaved perennial with daisy-like cream flowers with a maroon stripe and a small yellow centre. Height 15cm. Well-drained soil in sun. Jun.-Aug. Frost hardy.
<b>Rhodanthemum</b>	catananche	"Tizi-n-Tichka"	A silver-grey leaved perennial with daisy-like white flowers with a maroon base to the petals and a small yellow centre. Height 15cm. Well-drained soil in sun. Jun.-Aug. Frost hardy.
<b>Rhodanthemum</b>	hosmariense		A spreading subshrub with divided silver leaves and daisy-like white flowers with a yellow centre. Height 10-30cm. Well-drained soil in sun. Mar.- Sept.
<b>Rhododendron</b>		"Dormouse"	Compact shrub with pink bell-shaped flowers. The new leaves are a lovely copper colour. Apr.- May. Height 1.5m. Acid soil in sun or part shade.
<b>Rhododendron</b>		"Pink Pebble"	Free-flowering dense shrub with loose trusses of rose-pink flowers from red buds. Pretty bronze-tinged new foliage. Height and spread 1m. Acid soil in sun or part shade. April to

			May.
<b>Rhododendron</b>	yakushimanum	"Caroline Allbrook"	Long, dark green leaves with neat flat trusses of pale lavender flowers with darker frilly petal margins. Height 1.5m. Moist well-drained acid soil in part shade. Flowers from May until June.
<b>Rhododendron</b>	yakushimanum	"Fred Peste"	Long, dark, olive green leaves with moderate orange-yellow indumentum and neat flat trusses of cardinal red flowers with maroon-red spotted throats. Height 90cm. Moist well-drained acid soil in part shade. Flowers from May until June.
<b>Rhododendron</b>	yakushimanum	"Percy Wiseman"	Peachy-pink and cream flowers with a yellow throat. Height 1m. Moist well-drained acid soil in part shade. Good in pots.
<b>Rhodohypoxis</b>		"Donald Mann"	A bulbous clump forming perennial with larger than normal crimson-red flowers. Height 10cm. high. Gritty lime free soil in full sun. Apr.-Sep.
<b>Rhodohypoxis</b>		"E. A. Bowles"	Bulbous clump forming perennial with large mid-pink flowers. Height 8cm. high. Gritty lime free soil in full sun. Apr.-Sep.
<b>Rhodohypoxis</b>		"Fred Broome"	Bulbous clump forming perennial with pale pink flowers. Height 8cm. high. Gritty lime free soil in full sun. Apr.-Sep.
<b>Rhodohypoxis</b>		"Great Scot"	Bulbous clump forming perennial with short hairy grey-green leaves and deep red flowers. Height 8cm. high. Gritty lime free soil in full sun. Apr.-Sep.
<b>Rhodohypoxis</b>		"Monty"	Bulbous clump forming perennial with short hairy grey-green leaves and cerise red flowers. Height 8cm. high. Gritty lime free soil in full sun. Apr.-Sep.
<b>Rhodohypoxis</b>		"Perle"	Bulbous clump forming perennial with white, flowers. Height 8cm. high. Gritty lime

free soil in full sun. Apr.-Sep.

<b>Rhodohypoxis</b>		"Pintado"	A small clump-forming alpine with keeled, greyish green hairy leaves and white flowers flushed deep reddish-pink towards the edges. Height 10cm. Well-drained acid soil in sun. Jun.-Aug. Protect from winter wet.
<b>Rhodohypoxis</b>		"Rubies"	Bulbous clump forming perennial with small pink flowers, darkening towards the edges. Height 8cm. high. Gritty lime free soil in full sun. Apr.-Sep.
<b>Rhodohypoxis</b>		"Stella"	A small clump-forming alpine with keeled, greyish green hairy leaves and clear mid-pink flowers. Height 10cm. Well-drained acid soil in sun. Jun.-Aug. Protect from winter wet.
<b>Rhodohypoxis</b>	baurii	"Lily Jean"	Bulbous clump forming perennial with double white/pale pink flowers. Height 8cm. Gritty lime free soil in full sun. Apr.-Sep.
<b>Rhodohypoxis</b>	deflexa		A diminutive species of this bulbous perennial with small red flowers. Gritty lime free soil in full sun. Jun.-Sep.
<b>Rhodohypoxis</b>	milloides		Bulbous clump forming perennial with deep red flowers. Height 8cm. Gritty lime free soil in full sun. Apr.-Sep.
<b>Rhodohypoxis</b>	milloides	"Claret"	Bulbous clump forming perennial with deep red flowers, larger than the species. Height 8cm. Gritty lime free soil in full sun. Apr.-Sep.
<b>Rhodoxis</b>		"Hebron Farm Rose"	Bulbous clump forming perennial with wide leaves and white flowers suffused with rose-pink and a yellow centre. Height 8cm. Gritty lime free soil in full sun. Apr.-Sep.
<b>Rhodoxis</b>	hybrida	"Hebron Farm Cerise"	Bulbous clump forming perennial with deep cerise flowers and a yellow centre. Height 8cm. Gritty lime free soil in full sun. Apr.-Sep.

<b>Rhodoxis</b>	hybrida	"Hebron Farm Pink"	Dainty bulbous clump forming perennial with pink flowers and a yellow centre. Height 8cm. high. Gritty lime free soil in full sun. Apr.-Sep.
<b>Rhodoxis</b>	hybrida	"Hebron Farm Red-eye"	Bulbous clump forming perennial with white flowers and a red centre, 8cm. high. Gritty lime free soil in full sun. Apr.-Sep.
<b>Ribes</b>	aureum		A compact, deciduous upright shrub with clusters of hanging, fragrant golden yellow flowers followed by blue-black fruit. Height 3m. Spread 2.5m. Well-drained soil in sun.. Flowers from April to May. Prune after flowering.
<b>Ribes</b>	laurifolium		An evergreen shrub with leathery dark green leaves and pendent cup-shaped, greenish yellow flowers. Height 1m. Spread 1.5m. Well-drained soil in sun. Flowers from February to March.
<b>Ribes</b>	sanguineum	"Brianjou"	A bushy shrub with bright yellow leaves becoming paler in summer, and pendent racemes of magenta pink flowers. Height 1.2m. Spread 1.2m. Best in well-drained soil in sun. Flowers from March to May.
<b>Ribes</b>	sanguineum	"Porky's Pink"	A deciduous shrub with apple-green three-lobed leaves that can be mottled yellow and drooping racemes of pink flowers. Height and spread 2m. Moist well-drained soil in sun or part shade. Flowers from March to May. Prune after flowering.
<b>Ribes</b>	sanguineum	"White Icicle"	A deciduous shrub with apple-green three-lobed leaves and drooping racemes of white flowers. Height 3m. Spread 2.5m. Moist well-drained soil in sun or part shade. March to May. Prune after flowering.
<b>Rodgersia</b>	pinnata		A clump-forming perennial with crinkled dark green leaves. Stems of yellowish white, pink or red

			starry flowers. Height 1.2m. Moist soil in sun or shade. Jul.-Aug.
<b>Rodgersia</b>	podophylla		A clump-forming perennial with bold, crinkled, glossy, green leaves, bronze when young and upright stems of creamy green starry flowers. Good autumn colour. Height 1.5m. Moist soil in sun or part shade. Jul.-Aug.
<b>Roscoea</b>		"Beesiana"	A tuberous perennial with large cream and purple-pink mottled, orchid-like flowers. Height 40cm. Well-drained soil in part shade. Aug.-Sep.
<b>Roscoea</b>		"Beesianum Album"	A tuberous perennial with cream, orchid-like flowers. Height 40cm. Well-drained soil in part shade. Aug.-Sep.
<b>Roscoea</b>		"Summer Deep Purple"	A tuberous perennial with deep green leaves and purple orchid-like flowers in mid-summer. Height 45-75cm. Well-drained soil in part shade. Jun.-Jul.
<b>Roscoea</b>	auriculata		A tuberous perennial with whorls of dark green leaves on upright stems and purple, orchid-like flowers. Height 30-50cm. Moist well-drained soil in part shade. Jul.-Sep.
<b>Roscoea</b>	cautleyoides		A tuberous perennial with dark green leaves and pale yellow, orchid-like flowers. Height 30-50cm. Moist well-drained soil in part shade. Jun.-Aug.
<b>Roscoea</b>	cautleyoides	"Early Form"	A tuberous perennial with dark green leaves and pale yellow, orchid-like flowers. Height 30-50cm. Moist well-drained soil in part shade. May.-Aug.
<b>Roscoea</b>	cautleyoides	"Jeffrey Thomas"	A tuberous perennial with dark green leaves and pale yellow, orchid-like flowers, the hood being darker than the bottom lip. Height 30-50cm. Moist well-drained soil in part shade. Jun.-Aug.

<b>Roscoea</b>	humeana	"Cream Form"	A tuberous perennial with deep green leaves that appear in late spring and creamy-yellow orchid-like flowers. Height 25-30cm. Well-drained soil in part shade. Jun.-Jul.
<b>Roscoea</b>	humeana	"Purple Form"	A tuberous perennial with deep green leaves that appear in late spring and purple orchid-like flowers. Height 25-30cm. Well-drained soil in part shade. Jun.-Jul.
<b>Roscoea</b>	purpurea		A tuberous perennial with deep green leaves and purple orchid-like flowers in early and mid-summer. Height 40cm. Well-drained soil in part shade. Jun.-Jul.
<b>Roscoea</b>	purpurea	"Tall Selection"	A tuberous perennial with deep green leaves and exceptionally large light purple orchid-like flowers. Height 40cm. Well-drained soil in part shade. Aug.-Sept.
<b>Roscoea</b>	purpurea	"Wisley Amethyst"	A tuberous perennial with deep green leaves and white flowers with the lower petals streaked amethyst-purple. Height 25-40cm. Well-drained soil in part shade. Jun.-Jul.
<b>Roscoea</b>	purpurea f. rubra	"Red Gurkha"	A tuberous perennial with thick stems and deep green leaves with red-brown caudices. Broad brick-red orchid-like flowers late in the season. Height 40cm. Well-drained soil in part shade. Jul-Aug.
<b>Roscoea</b>	scillifolia		An upright tuberous perennial with narrow dark green leaves and small orchid-like dark violet flowers. Height 15-20cm. Well-drained soil in part shade. Jun.-Jul.
<b>Rosmarinus</b>	officinalis		An aromatic shrub with leathery, narrow grey-green leaves. Pretty purple-blue to white flowers. Height 1.5m. Well-drained soil in sun. Mar.-Jun.
<b>Rosmarinus</b>	officinalis	"Miss Jessopp's Upright"	An aromatic evergreen shrub with leathery, narrow leaves on

strong upright growth. Pretty pale blue flowers. Height 1m. Well-drained soil in full sun. Mar.-Jun.

<b>Rosmarinus</b>	officinalis	"Roman Beauty"	An evergreen, aromatic shrub with narrow grey-green leaves and tight, arching growth forming a neat mound. Dark blue flowers produced in spring. Height 40cm. Well-drained soil in sun.
<b>Rosmarinus</b>	officinalis	"Sissinghurst Blue"	An aromatic, evergreen shrub with leathery, narrow dark green leaves and pretty dark blue flowers. Height 60cm. Well-drained soil in sun. Mar.-May.
<b>Rubus</b>	arcticus		A dwarf bramble with relatively large pink flowers. Apr.-May. Height 10cm. Well-drained soil in sun or part shade. Apr.-May. Good autumn colour.
<b>Rubus</b>	lineatus		A shrub with rambling, silky-hairy stems and dark green leaves, silver underneath with conspicuous veining. Small clusters of white flowers in spring, followed by small red or yellow fruits. Height 1m. Spread 1m. Well-drained soil in sun.
<b>Rubus</b>	spectabilis	"Olympic Double"	A thicket-forming shrub with glossy, dark green leaves pretty double, bright purple-pink flowers. Orangy egg-like fruits. Height 2m. Well-drained soil in sun. Apr.-May. Deciduous.
<b>Rudbeckia</b>		"Goldquelle"	A clump-forming perennial with deep green incised leaves and pretty bright double lemon-yellow flowers. Height 90cm. Moist well-drained soil in sun. Jul.-Oct.
<b>Rudbeckia</b>	alpicola		An herbaceous perennial with deeply lobed leaves and loose clumps of stems carrying flowers with no ray florets and brownish conical centre. Height 1.5m. Moist well-drained soil in sun. Jun.-Oct.

<b>Rudbeckia</b>	fulgida var. deamii		A clump-forming herbaceous perennial with hairy stems and mid-green leaves. Bright orange-yellow daisy-like flowers with a blackish brown centre. Height 60cm. Well-drained soil in sun or part shade. Aug.-Oct.
<b>Rudbeckia</b>	fulgida var. fulgida		A clump-forming perennial with glossy green leaves and bright yellow daisy-like flowers with a blackish brown centre. Height 50-60cm. Well-drained soil in sun or part shade. Jul.-Oct.
<b>Rudbeckia</b>	fulgida var. speciosa		A clump-forming perennial with mid-green leaves and bright orange-yellow daisy-like flowers with a blackish brown centre. Height 90cm. Well-drained soil in sun or part shade. Aug.-Oct.
<b>Rudbeckia</b>	fulgida var. sullivantii	"Goldsturm"	A clump-forming perennial with golden yellow daisy-like flowers with a blackish brown centre. Height 60cm. Well-drained soil in sun or part shade. Aug.-Oct.
<b>Rudbeckia</b>	laciniata		An herbaceous perennial with deeply lobed leaves and loose clumps of stems carrying bright yellow flowers with a brownish conical centre. Height 1m. Moist well-drained soil in sun. Jul.-Oct.
<b>Rudbeckia</b>	laciniata	"Hortensia"	An herbaceous perennial with deeply lobed leaves and loose clumps of stems carrying fully double bright yellow flowers. Height 1.5m. Moist well-drained soil in sun. Jul.-Oct.
<b>Rudbeckia</b>	maxima		Broad glaucous leaves with light gold flowers with black centres. Height 75cm. Well-drained soil in sun or shade. Jul.-Sep.
<b>Rudbeckia</b>	paniculata		A clump forming perennial with broad deeply cleft leaves and lemon-yellow daisy flowers with a prominent central cone. Height 90cm. Moist well-drained soil in sun. Jul.-Aug.
<b>Rudbeckia</b>	subtomentosa		A clump forming perennial with stems of butter-yellow daisy

flowers with brownish centres.  
Height 1.2-1.5m. Moist well-  
drained soil in sun or part shade.  
Aug.-Oct.

<b>Rudbeckia</b>	subtomentosa	"Henry Eilers"	A clump forming perennial with narrow upright stems bearing yellow-gold daisy flowers with quilled petals. Height 1-1.2m. Moist well-drained soil in sun or part shade. Jul.-Oct.
------------------	--------------	----------------	---

<b>Rudbeckia</b>	triloba		An upright herbaceous perennial with branched stems of lobed ovate leaves and heads of yellow daisy flowers with a dark centre. Height 1.5m Well-drained soil in sun or part shade. Jul.-Oct.
