

Salix	caprea	"Kilmarnock"	A weeping tree with yellow-brown branches and dark green leaves, grey-green beneath. Produces grey catkins with yellow anthers in spring, before the leaves. Height 1.5-2m. Spread 2m. Moist well-drained soil in sun.
Salix	fargesii		An upright shrub with glossy green stems when young, that turn red-brown. Produces slender green catkins in spring, with the leaves. New growth has bronzey-red tints. Height 3m. Spread 3m. Moist well-drained soil in sun. March to May.
Salix	nakamura var. yezoalpina		A prostrate gnarled deciduous shrub with upright yellow catkins on olive green stems. Height 25cm. Spread 1m. Moist well-drained soil in sun or part shade.
Salix	x boydii		An upright shrub with gnarled branches and veined grey-green leaves. Rarely produces dark grey catkins in early spring. Height 30cm. Well-drained soil in sun.
Salvia		"Eveline"	A wonderful new introduction, with the usual basal rosette of coarse dull green leaves, but with spikes of large bicoloured flowers, pink with darker calyces. Height 60-90cm. Well-drained soil in sun. Jun.-Sep.
Salvia	nemerosa	"East Friesland"	A dwarf perennial with greyish green leaves and deep violet-blue flowers Height 45cm. Moist well-drained soil in sun or part shade. Jul.-Sep.
Salvia	nemerosa	"Lubecca"	Rosettes of grey-green leaves with spikes of violet-purple flowers. Height 60cm. Moist well-drained soil in sun or part shade. Jun.-Sep.
Salvia	nemorosa	"Amethyst"	Rosettes of wavy-edged, grey-green leaves with spikes of of violet-blue flowers. Height

			50cm. Moist well-drained soil in sun or part shade. Jun.-Sep.
Salvia	nemorosa	"Caradonna"	A new variety with deep green aromatic foliage and spikes of long-lasting violet-blue flowers on purple-black stems. Height 45cm. Moist well-drained soil in sun or part shade. Jun.-Jul.
Salvia	nemorosa	"Marcus"	A new dwarf variety with deep green aromatic foliage and spikes of long-lasting deep blue flowers. Height 25cm. Moist well-drained soil in sun or part shade. Jun.-Jul.
Salvia	nemorosa	"Puszttaflamme"	Rosettes of grey-green leaves with plumes of purple flowers. Height 60cm. Moist well-drained soil in sun or part shade. Jun.-Sep.
Salvia	nemorosa	"Rosenwein"	Rosettes of grey-green leaves with spikes of of mid-pink flowers. Height 50cm. Moist well-drained soil in sun or part shade. Jun.-Sep.
Salvia	nemorosa	"Schwellenburg"	Rosettes of grey-green leaves with bracts of a pinky purple colour. Height 60cm. Moist well-drained soil in sun or part shade. Jun.-Sep.
Salvia	officinalis	"Icterina"	A bushy subshrubby, evergreen perennial with aromatic, yellow and green variegated leaves. Rarely produced, pale blue flowers in summer. Height 45cm. Well-drained soil in sun. Jul.- Aug.
Salvia	officinalis	"Purpurescens"	"Sage". A bushy subshrubby perennial with aromatic, purple-red leaves when young. Blue flowers in summer. Height 60cm. Moist well-drained soil in sun or part shade. Jul.-Aug.
Salvia	officinalis	"Tricolor"	A bushy, evergreen subshrubby perennial with aromatic, grey-green, cream and pink to purple variegated leaves. Blue flowers in summer. Height 40cm. Well-drained soil in sun. Jul.-Aug.

Salvia	pratensis	"Swan Lake"	Basal rosettes of mid-green crinkled leaves and spires of white flowers. Height 40-50cm. Well-drained soil in sun. Jun.-Aug.
Salvia	pratensis	"Sweet Esmeralda"	Basal rosettes of mid-green crinkled leaves and spires of deep pink flowers with a carmine-rose lip. Height 40-50cm. Well-drained soil in sun. Jun.-Aug.
Salvia	uliginosa		An erect perennial with narrow mid-green leaves and terminal clusters of clear blue flowers. Height 2m. Moist soil in sun. Frost hardy. Aug.-Oct.
Salvia	x superba	"Adrian"	An erect perennial with wrinkled, softly hairy, mid-green, aromatic leaves and spikes of white flowers. Height 40cm. Moist well-drained soil in sun. Jun.-Sept.
Salvia	x superba	"Rosakoenigen"	An erect perennial with wrinkled, softly hairy, mid-green leaves and rose-pink flowers. Height 75cm. Moist well-drained soil in sun. Jun.-Sept.
Salvia	x sylvestris	"Mainacht"	An erect perennial with wrinkled, softly hairy, mid-green leaves and large indigo-blue flowers. Height 75cm. Moist well-drained soil in sun. Jun.-Jul.
Salvia	x sylvestris	"Viola Klose"	An erect perennial with wrinkled, softly hairy, mid-green leaves and large rich dark violet-blue flowers. Height 50-60cm. Moist well-drained soil in sun. May-Sept.
Sambucus	nigra	"Black Lace"	A new variety of elder with filigree black foliage and flat heads of pink-red flowers. Height 3m. Spread 2.5m. Well-drained soil in sun or part shade. Prune hard in spring to encourage new growth.
Sambucus	nigra	"Pulverulenta"	An upright, bushy, deciduous shrub with white striped and mottled green leaves and musk-

scented white flowers, followed by glossy black fruit. Height and spread 2.5m. Moist well-drained soil in sun or part shade. Flowers from May to June.

Sambucus	racemosa	"Sutherland Gold"	A bushy shrub with finely cut leaves, bronze when young, turning golden yellow. Creamy yellow flowers in spring, followed by glossy red fruit in summer. Resistant to scorching in bright sunlight. Height 3m. Spread 3m. Moist well-drained soil in sun or par
Samolus	repens		A primula relative from New Zealand. Creeping stems of small deep green glossy leaves with white flowers in the leaf axils. Height 10cm. Moist soil in sun. June. Best in an alpine house.
Sanguinaria	canadensis		An alpine with bluish grey-green leaves. Pretty white flowers with yellow stamens emerge as the leaves unfurl. Height 15cm. Well-drained soil in part shade. Apr.-May.
Sanguinaria	canadensis	"Plena"	An alpine with bluish grey-green leaves. Pretty double white flowers emerge as the leaves unfurl. Height 15cm. Well-drained soil in part shade. Apr.-May.
Sanguisorba		"Tanna"	Mounds of glossy green, ferny foliage with stems carrying heads of rounded, cylindrical burgundy flowers. Height 45cm. Moist soil in sun or part shade. Jul.-Aug.
Sanguisorba	hakusanensis		Clumps of mid-green pinnate leaves and arching sprays of rose-pink bottlebrush flowers. Height 70-90cm. Moist soil in sun or part shade. Jun.-Aug
Saponaria		"Bressingham"	A mat-forming, herbaceous alpine with mid-green leaves and clusters of brilliant deep pink flowers. Height 8cm. Well-drained soil in sun.

			Jun.-Aug.
Saponaria		"Rosenteppich"	A spreading alpine of open habit. Narrow dark green leaves and bright pink flat-faced rounded flowers. Height 10cm. Well-drained soil in sun. Apr.-Jun.
Saponaria	ocymoides		"Tumbling Ted". A mat-forming herbaceous alpine with bright green leaves and loose clusters of pink flowers. Height 8cm. Spread 45cm. Jun.-Aug.
Saponaria	ocymoides	"Snow Tip"	A mat-forming, herbaceous alpine with bright green leaves, and loose clusters of small white flowers. Height 8cm. Spread 45cm. Well-drained soil in sun. Jun.-Aug.
Saponaria	x olivana		A cushion-forming alpine with mid-green, narrow leaves and clusters of pale pink flowers. Height 5cm. Well-drained soil in sun. Jun.-Aug.
Sarcococca		"Rudolph"	A dense, bushy evergreen suckering shrub with glossy dark green leaves. Clusters of very fragrant white flowers in winter followed by glossy red fruit. Height and spread 1m. Moist soil in part shade. Jan.-Feb.. Good on chalk.
Sarcococca	confusa		A dense, bushy evergreen suckering shrub with glossy dark green leaves. Clusters of very fragrant white flowers in winter followed by glossy black fruit. Height and spread 1m. Moist soil in part shade. Jan.-Feb.. Good on chalk.
Sarcococca	hookeriana var. digyna		A compact evergreen suckering shrub with narrow, glossy dark green leaves. Clusters of fragrant white flowers followed by black or blue-black fruit. Height 1.5m. Spread 2m. Moist well-drained soil in part shade. Jan.-Feb.

Sarcococca	hookeriana var. humilis		A dwarf suckering evergreen shrub with glossy dark green leaves. Clusters of fragrant pink-tinged, white flowers in winter followed by dark blue-black fruit. Height 60cm. Spread 1m. Moist well-drained soil in part shade. January to February. Shelter from
Sarcococca	orientalis		An evergreen shrub with very large deep green glossy leaves and fragrant white flowers in late winter followed by black berries. Height 1.5m. Grow in most soils in sun or part shade. Happy in chalk soils.
Sarcococca	ruscifolia		A dense, bushy shrub with arching stems of glossy dark green leaves. Clusters of very fragrant, creamy white flowers are followed by dark red fruit. Height 1m. Spread 1m. Moist well-drained soil in part shade. Flowers from January to February.
Sarcococca	ruscifolia	"Dragon Gate"	A dense, bushy evergreen shrub with arching stems of glossy dark green leaves. Clusters of very fragrant, creamy white flowers, followed by dark red fruit. Height 1m. Spread 1m. Moist well-drained soil in part shade. January to February. Shelter from cold
Saxifraga		"Ballawley Guardsman"	A mossy variety with deeply cut dark green foliage and many stems carrying blood crimson-scarlet flowers. Height 10-15cm. Moist well-drained soil in part shade. Apr.-May.
Saxifraga		"Clarence Elliott"	A cushion-forming alpine with slightly fleshy rosettes. Produces stems carrying umbels of small red flowers. Height 15cm. Well-drained soil in part shade. May-Jun.
Saxifraga		"Elf"	A miniature, cushion-forming mossy saxifrage with soft rosettes of green leaves and carmine-pink flowers on very

		short stems. Height 10cm. Moist well-drained soil in sun or part shade. May-Jun.
Saxifraga	"Gaiety"	An evergreen cushion-forming mossy saxifrage with soft rosettes of bright green leaves and stems of mid-pink flowers. Height 5-10cm. Moist well-drained soil in sun or part shade. Apr.-May.
Saxifraga	"Gleborg"	An evergreen cushion-forming mossy saxifrage with soft rosettes of bright green leaves and stems of clear deep red flowers. Height 5-10cm. Moist well-drained soil in sun or part shade. Apr.-May.
Saxifraga	"Hare Knoll Beauty"	A silver saxifrage with greyish lime encrusted leaves and stems carrying red flowers fading to pink. Height 10cm. Well-drained soil in sun. Jun.-Jul.
Saxifraga	"Southside Seedling"	Rosettes of pale green leaves. Arching panicles of white flowers heavily spotted red. Height 15cm. Well-drained soil in part shade. May-Jun.
Saxifraga	"Tumbling Waters"	A rosette-forming saxifrage with lime-encrusted silvery green leaves and magnificent arching panicles of white flowers. Height 45cm. Well-drained soil in part shade. May-Jun.
Saxifraga	"White Pixie"	An evergreen cushion-forming mossy saxifrage with soft rosettes of yellowish green leaves and stems of white flowers. Height 5-10cm. Moist well-drained soil in sun or part shade. Apr.-May.
Saxifraga	"Whitehill"	A cushion-forming saxifrage with rosettes of silvery green leaves and panicles of white flowers. Height 10-15cm. Probably best in part shade in well-drained soil. May.-Jun.
Saxifraga	"Winifred Bevington"	A low, cushion-forming saxifrage with rosettes of green

			leaves. Panicles of rich pink flowers. Height 10-15cm. Well-drained soil in part shade. May-Jun.
Saxifraga		"Winston Churchill"	A cushion-forming mossy saxifrage with tight rosettes of bright green leaves and red flowers fading to pink. Height 10-15cm. Moist well-drained soil in part shade. April to May.
Saxifraga	cochlearis	"Minor"	A cushion-forming saxifrage with small rosettes of lime-encrusted mid-green leaves and panicles of white flowers spotted red. Height 10cm. Well-drained soil in sun. May-Jun. Water well during hot spells in summer.
Saxifraga	cuneifolia	"Variegata"	A mat-forming saxifrage with fleshy rosettes of deep green variegated leaves and clusters of creamy white flowers. Height 8cm. Well-drained soil in part shade. Feb.-Apr.
Saxifraga	federici-augusti ssp. grisebachii		Rosettes of lime-encrusted spatulate leaves with tall hairy purplish stems erupting from the centre, carrying funnel shaped purple flowers. Height 5-10cm. Well-drained soil in sun. Best over wintered in alpine house.
Saxifraga	ferdinandi-coburgi	"Drakula"	An excellent variety with heavily lime-encrusted rosettes and stems carrying clusters of intense yellow flowers. Height 8cm. Well-drained soil in sun. Keep moist in summer. Mar.-Apr.
Saxifraga	ferdinandi-coburgi var rhodopea		Cushions of grey-green rosettes and stems carrying clusters of golden yellow flowers. Height 8cm. Well-drained soil in sun. Keep moist in summer. Mar.-Apr.
Saxifraga	fortunei	"Autumn Hues"	Bristly green leaves with shades of red and maroon. Small, stary greenish-cream flowers with yellow centres

			and red tipped stamens. Height 20cm. Moist well-drained soil in sun or part shade. Sep.-Oct.
Saxifraga	fortunei	"Black Ruby"	Dark red leaves, turning black in strong light and deep ruby red flowers. Height 20cm. moist well-drained soil in sun or shade. Oct.-Nov.
Saxifraga	fortunei	"Blackberry & Apple Pie"	Large heads of fawn coloured flowers. Bristly green leaves flushed red. Height 35cm. Moist soil in part shade. Sep.-Nov.
Saxifraga	fortunei	"Cheap Confections"	Petal-like bracts of candy-pink show from rounded mounds of bright green leaves. Height 25cm. Moist well-drained soil in part shade.
Saxifraga	fortunei	"Cherry Pie"	Dark glossy foliage and many starry purple-red flowers. Height 25cm. Moist well-drained soil in part shade. Oct.-Nov.
Saxifraga	fortunei	"Cotton Crochet"	Fans of shiny, lobed, green leaves, from which arise shaggy double, pure white flowers. Height 30cm. Moist well-drained soil in part shade. Oct.-Nov.
Saxifraga	fortunei	"Kokaku"	Rounded mounds of hairy bright green leaves that darken with age. Stems carry clusters of greenish five-petalled flowers. Height 25cm. Moist well-drained soil in part shade. Oct.-Nov.
Saxifraga	fortunei	"Mt. Nachi"	Bristly leaves, red underneath and starry white flowers. Height 20cm. Moist well-drained soil in part shade. Oct.-Nov.
Saxifraga	fortunei	"Obtusocuneata"	Small green bristly leaves with stems carrying many white starry flowers. Height 15cm. Well-drained soil in part shade. Oct.-Nov.
Saxifraga	fortunei	"Pink Ray"	Medium sized, dark green scalloped palmiform leaves and thin petalled, starry flowerheads of sugar pink.

Saxifraga	fortunei	"Rubrifolia"	Height 30cm. Well-drained soil in part shade. Sep.-Oct. Sprays of white flowers over glossy bronze, red tinged leaves. Height 30cm. Well-drained soil in part shade. Sep.-Nov.
Saxifraga	fortunei	"Sue Drew"	Bristly green leaves flushed red and maroon. Heads of starry pale pink flowers that fade to white. Height 25cm. Moist soil in part shade. Sep.-Nov.
Saxifraga	fortunei	"Sugar Plum Fairy"	Largish, scalloped palmiform leaves and persistent bracteose rounded flowerheads of pale sugary-pink. Height 35cm. Well-drained soil in part shade. Oct-Nov.
Saxifraga	fortunei	"Wada's Form"	Rosettes of beetroot-red leaves. Sprays of starry white flowers from Oct.-Nov. Height 40cm. Well-drained soil in part shade.
Saxifraga	marginata f. intermedia		Hard domes of lime=encrusted leaves with stems of white flowers, pinkish at the claw. Height 8cm. Well-drained soil in sun, but keep moist during the summer. Mar.-Apr.
Saxifraga	marginata var. bubakii		Hard domes of lime=encrusted leaves with stems of white flowers, ageing to a pinkish tinge. Height 8cm. Well-drained soil in sun, but keep moist during the summer. Mar.-Apr.
Saxifraga	marginata var. rocheliana		Hard domes of lime=encrusted leaves with stems of white flowers, ageing to a pinkish tinge. Height 8cm. Well-drained soil in sun, but keep moist during the summer. Mar.-Apr.
Saxifraga	obtusa		Rosettes of glossy green leaves in neat hummocks and reddish stems carrying beautiful white flowers with yellow stamens. Height 8cm. sunny well-drained spot. Keep moist during Summer.

Saxifraga	oppositifolia	"Alba"	A loose mat-forming saxifrage with thin rosettes of dark green leaves and white flowers. Height 3cm. Spread 20cm. Moist well-drained soil in part shade. Mar.-Apr.
Saxifraga	oppositifolia	"Latina"	A loose mat-forming saxifrage with thin rosettes of dark green leaves with prominent silvery-white glands and deep pink flowers. Height 3cm. Spread 20cm. Moist well-drained soil in part shade. Mar.-Apr.
Saxifraga	paniculata	"Lagraveana"	A dense mat-forming saxifrage with rosettes of silvery, grey-green leaves with lime-encrusted margins. Stems carry panicles of white flowers. Height 15-20cm. Probably best in partial shade in poor well-drained soil. May-Jun.
Saxifraga	paniculata	"Lutea"	A dense mat-forming saxifrage with rosettes of silvery, grey-green leaves with lime-encrusted margins. Stems carry panicles of yellow flowers. Height 15-20cm. Probably best in partial shade in moist well-drained soil. May-Jun.
Saxifraga	paniculata	"Rosea"	A mat-forming saxifrage with largeish rosettes of green leaves with lime-encrusted margins. Stems carry panicles of rose-red flowers. Height 20cm. Probably best in partial shade in moist well-drained soil. May-Jun.
Saxifraga	paniculata	"Rosularis"	A mat-forming saxifrage with rosettes of silvery, grey-green leaves with lime-encrusted margins. Stems carry panicles of creamy white flowers. Height 8cm. Probably best in partial shade in moist well-drained soil. May-Jun.
Saxifraga	paniculata var. baldensis		A dense mat-forming saxifrage with rosettes of silvery, grey-green leaves with lime-encrusted margins. Stems carry panicles of creamy white

			flowers. Height 5cm. Probably best in partial shade in moist well-drained soil. May-Jun.
Saxifraga	paniculata var. minutifolia		A dense mat-forming saxifrage with tight rosettes of small, silvery, grey-green leaves with lime-encrusted margins. Stems carry panicles of creamy white flowers. Height 5cm. Probably best in partial shade in moist well-drained soil. May-Jun.
Saxifraga	paradoxa		A silver saxifrage with rosettes of grey-green pointed leaves and stems of pure white flowers. Height 10cm. Well-drained soil in sun. Apr.-May.
Saxifraga	stolonifera	"Maroon Beauty"	Mats of evergreen, pink backed, maroon marked leaves with white veining. Airy stems of white star shaped flowers. Height (flower) 30-40cm. Moist well drained soil in part shade. Jun.-Aug.
Saxifraga	umbrosa	"Variegata"	Rosettes of dark green leaves splashed yellow form mounds with tall stems of whitish flowers. Height 25cm. Moist well-drained soil in part shade. May-Jun.
Saxifraga	x anglica	"Cranbourne"	A dense mat-forming, saxifrage with rosettes of lime-encrusted grey-green leaves. Almost stemless deep rose-pink flowers. Height 3cm. Well-drained soil in sun. Mar.-Apr. Keep moist in summer.
Saxifraga	x anglica	"Myra"	Rosettes of lime-encrusted, grey-green leaves. Almost stemless deep rich rose-pink flowers. Height 5cm. Gritty soil in sun. Mar.-Apr. Keep moist in summer.
Saxifraga	x apiculata	"Alba"	Hummocks of mid-green leaves with short stems of white flowers. Feb.-Mar. Height 10cm. Well-drained soil in sun, but keep moist during the summer.
Saxifraga	x apiculata	"Gregor Mendel"	Hummocks of mid-green leaves with short stems of

			yellow flowers. Feb.-Mar. Height 10cm. Well-drained soil in sun, but keep moist during the summer.
Saxifraga	x apiculata	"Primrose Bee"	Hummocks of mid-green leaves with short stems of pale yellow flowers. Feb.-Mar. Height 10cm. Well-drained soil in sun, but keep moist during the summer.
Saxifraga	x biasolettoi	"Chrystalie"	Greyish rosettes from which arise purple stems carrying deep purple flowers. Height 10cm. well-drained soil in sun. Mar.-Apr
Saxifraga	x biasolettoi	"Phoenix"	Long stems from silvery-green rosettes carry purple flowers. Height 10cm. Well-drained soil in sun. Mar.-Apr
Saxifraga	x boydii	"Faldonside"	A dense rosette-forming, kabschia saxifrage with rosettes of grey-green to silver-green leaves. Clusters of bright yellow flowers in early spring. Height 5cm. Well-drained soil in sun. Keep moist in summer.
Saxifraga	x boydii	"Sulphurea"	A dense rosette-forming, kabschia saxifrage with rosettes of grey-green leaves. Clusters of pale yellow flowers in early spring. Height 5cm. Well-drained soil in sun. Keep moist in summer. Feb.-Mar.
Saxifraga	x burnatii	"Esther"	A cushion-forming, saxifrage with rosettes of silver-grey leaves, heavily encrusted with lime and creamy yellow flowers. Height 8cm. Probably best in partial shade in well-drained soil. Apr.-May.
Saxifraga	x burseriana	"Gloria"	A cushion-forming, saxifrage with rosettes of spiky grey-green leaves. Cup-shaped white flowers with a yellow centre on bright red stems. Height 5cm. Well-drained soil in sun. Feb.-Mar. Keep moist in summer.
Saxifraga	x burseriana	"Prince Hal"	Hummocks of spiky grey-green leaves and relatively large stemless white flowers. Height

			5cm. Well-drained soil in sun. Mar.-Apr. Keep moist in summer.
Saxifraga	x bursiculata	"King Lear"	Sturdy hummocks of spiky grey-green leaves and pink stems carrying white flowers. Height 5cm. Well-drained soil in sun. Mar.-Apr. Keep moist in summer.
Saxifraga	x edithae	"Bridget"	Sturdy cushions of grey-green and pink stems carrying pale rose-pink flowers. Height 5cm. Well-drained soil in sun. Mar.-Apr. Keep moist in summer.
Saxifraga	x elisabethae	"Boston Spa"	A cushion-forming saxifrage with tight rosettes of green leaves and clusters of yellow flowers. Height 8cm. Well-drained soil in sun. Feb.-Apr. Keep moist in summer.
Saxifraga	x elisabethae	"Tully"	A dense rosette-forming, kabschia saxifrage with rosettes of grey-green leaves. Stems carry yellow flowers, several per stem. Height 10cm. Well-drained soil in sun. Mar.-Apr. Keep moist in summer.
Saxifraga	x eudoxiana	"Eudoxia"	Domes of small tight light green pointed leaves and stems carrying clusters of small yellow flowers. Height 10cm. Well-drained gritty soil in sun. Feb.-Apr. Keep moist in summer.
Saxifraga	x irvingii	"Jenkinsae"	A cushion-forming saxifrage with tight rosettes of grey-green leaves and pink flowers on short stems. Height 8cm. Well-drained gritty soil in sun. Feb.-Apr. Keep moist in summer.
Saxifraga	x irvingii	"Lusanna"	A cushion-forming saxifrage with tight rosettes and pink flowers fading to white. Height 8cm. Well-drained gritty soil in sun. Feb.-Apr. Keep moist in summer.
Saxifraga	x irvingii	"Mother Queen"	A cushion-forming saxifrage with tight rosettes of grey-green leaves and crimson

			flowers on short stems. Height 8cm. Well-drained gritty soil in sun. Feb.-Apr. Keep moist in summer.
Saxifraga	x kellereri	"Suendermannii"	Loose cushions of hard, pointed grey leaves, with white flowers, tinged pink. Height 10cm. Well-drained gritty soil in sun. Mar.-Apr. Keep moist in summer.
Saxifraga	x landaueri	"Leonore"	Hummocks of silvery rosettes and stems carrying pink-tinged white flowers. Height 10cm. Sunny spot in well-drained soil. Keep moist in summer. Mar.-Apr
Saxifraga	x megaseaeflora	"Karel Capek"	Hummocks of tight grey-green rosettes and stems of pale pink flowers with a darker eye. Height 5cm. Well-drained soil in sun. keep moist in summer. Feb.-Mar.
Saxifraga	x megaseaeflora	"Robin Hood"	Hummocks of tight grey-green rosettes and stems of pink flowers with a darker eye. Height 5cm. Well-drained soil in sun. Keep moist in summer. Feb.-Mar.
Saxifraga	x megaseaeflora	"Vladana"	Hummocks of tight grey-green rosettes and stems of pale beige-cream flowers. Height 5cm. Well-drained soil in sun. keep moist in summer. Feb.-Mar.
Saxifraga	x petraschii	"Kaspar Maria Sternberg"	A cushion-forming saxifrage with tight rosettes of grey-green leaves and white flowers on short stems. Height 8cm. Well-drained gritty soil in sun. Mar.-Apr. Keep moist in summer.
Saxifraga	x poluanglica	"Miluj Mne"	Translates as "Love me". Deep pink flowers above hard mats of dark green leaves. Height 5cm. Well-drained soil in full sun. Keep moist in summer.
Saxifraga	x poluanglica	"Tvuj Pisen"	Translates as "Your Song". Good pink flowers on short stems in early spring. Height 5cm. Sunny spot in well-

			drained soil. Keep moist in Summer.
Scabiosa		"Butterfly Blue"	A clump forming perennial with pincushion heads of blue flowers. Height 30-45cm. Fertile well-drained soil in sun.
Scabiosa		"Pink Buttons"	A hairy perennial with dull green basal leaves and pincushion pink flowerheads. Height 15cm. Well-drained soil in sun. Jun.-Sept.
Scabiosa		"Pink Mist"	A clump forming perennial with grey-green leaves and candy-pink flowers. Height 30cm. Well-drained soil in sun. Jul.-Aug.
Scabiosa		"Vivid Violet"	A clump forming perennial with mounds of pinnate foliage and pincushion heads of violet=purple flowers. Height 25-40cm. Fertile well-drained soil in sun. Jun.-Sept.
Scabiosa	caucasica	"Blausiegel"	A clump-forming perennial with grey-green leaves. Pretty scented lavender-blue flowerheads. Height 70cm. Fertile well-drained soil in full sun.
Scabiosa	caucasica	"Deep Waters"	A clump-forming perennial with grey-green leaves and pretty deep blue flowerheads. Height 50cm. Well-drained soil in sun. Jul.-Aug.
Scabiosa	caucasica	"Miss Willmott"	A clump-forming perennial with grey-green leaves. Pretty white flowerheads Height 70cm. Fertile well-drained soil in full sun.
Scabiosa	caucasica	"Stafa"	A clump-forming perennial with grey-green leaves. Pretty deep blue flowerheads, Jul.-Sep. Height 80cm. Full sun in fertile well-drained soil.
Scabiosa	columbaria	"Misty Butterflies"	From neat mounds of compact, leafy rosettes, arise wiry stems of large pincushion flowers in shades of soft pink to lavender-blue. Height 25cm. Well-drained soil in sun. May-Sept.

Scabiosa	columbaria	"Nana Pincushion Pink"	A hairy perennial with grey-green basal leaves and pincushion soft pink flowerheads. Height 20cm. Well-drained soil in sun. Jun.-Sept.
Scabiosa	columbaria	"Nana"	A hairy perennial with grey-green basal leaves and pincushion bluish lilac flowerheads. Height 15cm. Well-drained soil in sun. Jun.-Sept.
Scabiosa	ochroleuca	"Moondance"	A clump-forming perennial with fine pinnatifid leaves and stems carrying "pincushion" flowers of pale yellow. Shorter than the species. Height 40cm. Well-drained soil in sun. Jun.-Oct.
Schizophragma	hydrangeoides	"Moonlight"	A deciduous climber with toothed, green leaves that have a silvery sheen. Slightly fragrant creamy white flowerheads. Height 12m. Moist well-drained soil in sun or part shade. Flowers from June to July.
Schizostylis	coccinea	"Alba"	A pretty clump-forming perennial with sword-like bright green leaves and spikes of white flowers. Height 60cm. Moist well-drained soil in sun. Sep.-Nov.
Schizostylis	coccinea	"Fenland Daybreak"	A pretty clump-forming perennial with sword-like bright green leaves and spikes of rose-pink flowers. Height 60cm. Moist well-drained soil in sun. Sep.-Nov.
Schizostylis	coccinea	"Major"	A pretty clump-forming perennial with sword-like bright green leaves and spikes of large red flowers on stiff stems. Height 60cm. Moist well-drained soil in sun. Sept.-Nov.
Schizostylis	coccinea	"Molly Gould"	A pretty clump-forming perennial with sword-like bright green leaves and spikes of cup-shaped warm pink

			flowers with irregular deeper pink mottling. Height 75cm. Moist well-drained soil in sun. Aug.-Oct.
Schizostylis	coccinea	"November Cheer"	A pretty clump-forming perennial with sword-like bright green leaves and spikes of clear pink flowers on stiff stems. Height 60cm. Moist well-drained soil in sun. Sept.-Nov.
Schizostylis	coccinea	"Pink Princess"	A pretty clump-forming perennial with sword-like bright green leaves and spikes of blush-pink flowers with narrow petals. Height 60cm. Sheltered moist well-drained soil in sun. Aug.-Nov.
Schizostylis	coccinea	"Professor Barnard"	A pretty clump-forming perennial with sword-like bright green leaves. Spikes of rose-red flowers in autumn. Height 45cm. Moist well-drained soil in sun. Sept.-Nov.
Schizostylis	coccinea	"Red Dragon"	A pretty clump-forming perennial with sword-like bright green leaves and spikes of large bright red flowers on stiff stems. Height 75cm. Moist well-drained soil in sun. Sept.-Nov.
Scilla	autumnalis		Conical to pyramidal spikes of lilac-blue flowers followed by leathery grass-like leaves. Height 15-20cm. Well-drained soil in sun. Aug.-Sept.
Scilla	bifolia		A pretty, small, spring-flowering bulb with narrow green leaves and star-shaped blue to purple-blue flowers. Height 8-15cm. Well-drained soil in sun or part shade. Ma.-Apr.
Scilla	greilhuberi		Strap-like leaves appear in autumn followed by spikes with loose racemes of pale blue flowers. Height 10-15cm. Well-drained soil in sun. Jan.-Feb. Probably best in a greenhouse.

Scilla	lingulata		Short spikes of bright blue flowers from neat broad foliage. Height 10cm. Well-drained soil in sun. Oct.-Jan. Probably best in a greenhouse.
Scilla	mischtschenkoana		A pretty, small bulb with narrow green leaves and star-shaped pale blue flowers with a dark blue stripe on each petal. Height 8-15cm. Well-drained soil in sun or part shade. Jan.-Mar..
Scilla	peruviana		A clump-forming, nearly evergreen, bulbous perennial with narrow green leaves. Produces a tall spike of star-shaped deep purple-blue flowers. Height 15-30cm. Well-drained soil in sun or part shade. May-Jun.
Scilla	siberica		A pretty spring-flowering bulb with narrow basal green leaves and pendent, bowl-shaped blue deep flowers. Height 15-20cm. Moist well-drained soil in sun or part shade. Mar.-Apr.
Scutellaria		"Sherbert Lemon"	Forms a mat of dark green, toothed leaves and masses of yellow "snapdragon" flowers. Height 20cm. Well-drained soil in sun or part shade. Jun.-Sep.
Scutellaria	alpina	"Arcobaleno"	Carpets of rounded slightly hairy leaves and plump spikes of violet-blue and white flowers. Height 20cm. Well-drained soil in sun or shade. Jun.-Aug.
Scutellaria	indica var. parviflora		Bushy stems of grey-green leaves. Blue-grey and cream tubular flowers. Height 10cm. Well-drained soil in sun. Apr.-May.
Scutellaria	indica var. parviflora	"Alba"	Bushy stems of light green leaves. White tubular flowers. Height 10cm. Well-drained soil in sun. Apr.-May.
Scutellaria	prostrata		Forms loose mats with downy, deeply and coarsely toothed leaves and bi-coloured flowers of cream and violet-blue.

			Height 5cm., spread up to 30cm. Well-drained soil in sun. May-Jul.
Scutellaria	suffrutescens	"Texas Rose"	A dense bushy alpine with small dark green leaves. Erect stems of small rose-red flowers with white shading. Height 15cm. Well-drained soil in sun. Jun.-Aug.
Sedum		"Carl"	A clump forming perennial with succulent grey-green leaves and brilliant rose-pink flowerheads. Height 45cm. Well-drained soil in sun. Jul.-Aug
Sedum		"Purple Emperor"	Exceptionally dark leaves on a plant 40cm. high. Flat heads of red flowers. Well-drained soil in sun. Jul.-Sep
Sedum		"Ruby Glow"	A low perennial with fleshy purple-green leaves. Clusters of star-shaped ruby-red flowers. Height 25cm. Well-drained soil in sun. Jul.-Sept.
Sedum		"Stewed Rhubarb Mountain"	A perennial with greyish fleshy leaves and mounded heads of pink buds that open to white flowers. Height 40cm. Well-drained soil in sun. Jun.-Sept.
Sedum		"Vera Jameson"	An herbaceous perennial with spreading stems of bluish purple leaves loose clusters of star-shaped soft pink flowers. Height 25cm. Well-drained soil in sun. Aug.-Sept.
Sedum	alboroseum	"Frosty Morn"	Pale pink flowers amid large white bracts on stems 45cm. tall. Sep.-Oct. White variegated leaves. Fertile well-drained soil in sun.
Sedum	cauticola	"Lidakense"	An alpine with arching stems and blue-green leaves. Star-shaped rosy red flowers. Height 10cm. well-drained soil in sun. Aug.-Oct..
Sedum	erythrostickum	"Mediovariegatum"	A clump-forming perennial with pretty creamy yellow variegated leaves. Clusters of star-shaped pale pink flowers. Height 30cm. Well-drained soil

in sun or part shade. Aug.-Oct.

Sedum	hidakanum		An evergreen mat forming alpine with small succulent grey leaves and pink flowers. Height 10cm. Spread up to 1m. Well-drained soil in sun. Jul.-Sept.
Sedum	kamschaticum	"Variegatum"	Striking green variegated leaves. Clusters of yellow flowers, ageing to crimson in autumn. Height 15cm. Well-drained soil in sun. Jun.-Aug.
Sedum	middendorffianum		Erect stems with narrow reddish brown, green leaves. Star-shaped, bright yellow flowers. Height 20cm. Well-drained soil in sun. Jul.-Aug.
Sedum	pachyclados		A spreading alpine with rosettes of grey leaves and star-shaped white flowers. Height 10-15cm. Well-drained soil in sun. Jul.-Aug.
Sedum	rupestre		A mat-forming, evergreen alpine with grey-green leaves, that turn purple in winter. Clusters of star-shaped, yellow flowers on upright stems. Height 10cm. Well-drained soil in sun. Jun.-Aug.
Sedum	sexangulare		Tiny evergreen leaves arranged in parallel rows on sprawling stems, clothed in yellow flowers in season. Height 10cm. Spread 30cm. Well-drained soil in sun or part shade. Apr.-May.
Sedum	sieboldii	"Mediovariegatum"	A tufted perennial with arching stems, the leaves having a cream centre. Flowers of a light purple-pink in autumn. Height 8cm. Spread 20cm. Well-drained soil in sun. May need winter protection.
Sedum	spathulifolium	"Capa Blanca"	A mat-forming alpine with rosettes of silver-grey leaves and clusters of star-shaped, bright yellow flowers. Height 10cm. Jun.-Aug.

Sedum	spathulifolium	"Purpureum"	A mat-forming alpine with rosettes of evergreen, silver-grey leaves, richly suffused reddish purple and clusters of star-shaped, bright yellow flowers. Height 10cm. Well-drained soil in sun. Jun.-Aug.
Sedum	spectabile		A clump-forming perennial with upright stems of grey-green leaves and dense clusters of starry pink flowers. Height 45cm. Well-drained soil in sun. Aug.-Sep.
Sedum	spectabile	"Autumn Joy"	Flat blue-green succulent leaves and flat flowerheads with many small bright rose-salmon flowers. Height 45cm. Well-drained soil in sun. Sept.-Oct
Sedum	spectabile	"Brilliant"	A clump-forming perennial with upright stems of grey-green leaves. Dense clusters of starry bright pink flowers. Height 45cm. Well.drained soil in sun. Aug.-Sept.
Sedum	spurium	"Dragon's Blood"	A mat-forming evergreen alpine with red stems of toothed mid-green leaves, purple-tinted when mature. Clusters of star-shaped deep pink flowers. Height 10cm. Well-drained soil in sun. Aug.-Sept.
Sedum	spurium	"Purpurteppich"	A mat-forming alpine with red stems of toothed deep plum-purple leaves. star-shaped dark purplish red flowers Height 10cm. Aug.-Sep.
Sedum	spurium	"Voodoo"	A spreading alpine with dark green leaves heavily shaded mahogany and clusters of rosy-red flowers. Height 15cm. Well-drained soil in sun. Jul.-Aug.
Sedum	telephium	"Matrona"	A clump-forming perennial with erect stems of purple-tinted, dark green leaves topped by clusters of star-shaped pale pink flowers. Height 50-60cm. Full sun in

well-drained soil. Aug.-Sep.

Sedum	telephium	"Munstead Red"	A clump-forming perennial with erect stems of purple-tinted, dark green leaves and clusters of star-shaped dark purplish red flowers. Height 45-60cm. Well-drained soil in sun. Aug.-Sept.
Sedum	trollii		A slow growing species forming mats of succulent, evergreen rosettes with stemless, star-shaped white flowers. Height 8cm. Well-drained soil in sun
Selenium	wallichianum		A perennial with finely divided green leaves and stems bearing flat flowerheads of white "Cow-Parsley" flowers. Height 1.2m. Well-drained soil in sun. Jul.-Aug.
Semiaquilegia	ecalcarata		A short-lived perennial with pretty mid-green leaves and pendent open nodding bell-shaped pink to purple-red flowers. Height 15-30cm. Moist well-drained soil in sun or part shade. May-Jun.
Sempervivum		"Alpha"	An alpine succulent with evergreen rosettes of crimson and green leaves. Height 10cm. Well-drained soil in sun.
Sempervivum		"Amanda"	Large rosettes of green and purple-brown tapering leaves. Height 10cm. Gritty soil in full sun.
Sempervivum		"Blood Tip"	Green rosettes with maroon-red tips that suffuse through the leaf with age. Height 5-8cm. Gritty soil in full sun.
Sempervivum		"Blue Boy"	Succulent medium-sized rosettes of of blue-grey leaves in summer. Height 5-8cm. Gritty soil in full sun.
Sempervivum		"Blue Time"	Large succulent rosettes of blue-grey leaves with suffused maroon tips. Height 5-8cm. Gritty soil in full sun.
Sempervivum		"Brock"	Evergreen perennial. Spreads by short stolons. Dark red

		narrow leafed rosettes with sharp points. Height 8cm. Gritty soil in full sun.
Sempervivum	"Bronco"	Small green rosettes with very pointed leaves flushed heavily at the tips with purple. Height 8cm. Gritty soil in sun.
Sempervivum	"Cherry Frost"	Evergreen perennial. Spreads by short stolons. Hairy green rosettes. Height 8cm. Gritty soil in full sun.
Sempervivum	"Dark Beauty"	Medium sized dark-red rosettes, almost black in summer. Fleshy stems, produce pink flowers. Height 8cm. Well-drained gritty soil in sun.
Sempervivum	"Delta"	Evergreen perennial. Spreads by short stolons. Crimson rosettes and pink flowers. Height 10cm. Gritty soil in full sun.
Sempervivum	"Engel's Var."	Evergreen perennial. Spreads by short stolons. Grey-green rosettes tipped maroon. Height 8cm. Gritty soil in full sun.
Sempervivum	"Engle's"	The leaves are covered in a soft bloom so that the new leaves in the centre are dusky grey-green changing to dusky rose-pink on the outside. Height 8cm. Well-drained soil in sun.
Sempervivum	"Flanders Passion"	Evergreen perennial. Spreads by short stolons. Flowering rosettes die, but offsets remain. Sun in gritty soil. Good trough plant.
Sempervivum	"Grey Dawn"	Medium to large succulent rosettes of downy, greyish-green leaves with shades of coral. Height 8cm. Gritty soil in full sun.
Sempervivum	"Hayling"	An alpine with succulent, rosettes of large glossy leaves that are dark purplish-red throughout the season. Height 8cm. Well-drained soil in sun.
Sempervivum	"Icicle"	An evergreen perennial with medium sized rosettes of red and green leaves, with heavy silver frosting. Height 8cm.

Well-drained soil in sun.

Sempervivum	"Irazu"	An alpine with succulent, rosettes of silver edged violet leaves that turn dull greyish pink during the season. Height 8cm. Well-drained soil in sun.
Sempervivum	"Jet Stream"	Small, many-leaved rosettes of dark purplish red with silver cilia. Flowers are cream with pink tips. Height 8cm. Well-drained soil in sun.
Sempervivum	"Jubilee"	Succulent rosettes of green and maroon leaves. Produces pinkish red flowers in summer. Height 5-8cm. Gritty soil in full sun.
Sempervivum	"Jungle Fires"	An evergreen perennial that spreads by short stolons. Large rosettes of red leaves edged bluish-green. Height 10cm. Well-drained soil in sun.
Sempervivum	"Kelly-jo"	An alpine with succulent, green rosettes that turn a darkish brown-red in the summer. Height 8cm. Well-drained soil in sun.
Sempervivum	"King George"	An evergreen perennial with succulent rosettes of narrow, slightly hairy maroon leaves. Height 8cm. Well-drained soil in sun.
Sempervivum	"Kramers Spinrad"	A rosette-forming alpine with succulent rosettes of mid-green leaves suffused red and cobwebbed with fine white hairs. Height 8cm. Well-drained soil in sun.
Sempervivum	"Lavender & Old Lace"	Medium sized rosettes of lavender-grey leaves flushed red. Height 8cm. Gritty soil in sun.
Sempervivum	"Lilac Time"	An alpine with succulent, rosettes of large glossy leaves that are a beautiful pale lilac throughout the season. Height 8cm. Well-drained soil in sun.
Sempervivum	"Lively Bug"	An evergreen perennial with succulent, very hairy rosettes of greyish-green leaves. Height

8cm. Well-drained soil in sun.

Sempervivum	"Mahogany"	An evergreen perennial with succulent rosettes of maroon leaves. Height 8cm. Well-drained soil in sun.
Sempervivum	"Malby's Hybrid"	Large rosettes of grey-green leaves with red tips. Height 10-15cm. Well-drained soil in sun.
Sempervivum	"Midas"	An evergreen perennial with neat rosettes of narrow green leaves, flushed with gold in summer. Height 8cm. Well-drained soil in sun.
Sempervivum	"Noir"	A variety with maroon-red rosettes. Height 8cm. Well-drained soil in sun.
Sempervivum	"Pekinese"	Medium-sized rosettes with apple green leaves flushed pink and covered in cobwebs. Height 8cm. Well-drained gritty soil in sun.
Sempervivum	"Pink Cloud"	An evergreen with slightly hairy rosettes of pinkish colour. Height 8cm. Well-drained soil in sun.
Sempervivum	"Red Devil"	Evergreen perennial. Spreads by short stolons. Dark red rosettes. Height 10cm. Gritty soil in full sun.
Sempervivum	"Red Mountain"	An evergreen perennial with slightly hairy greenish rosettes with maroon-red tips, ageing to maroon-red. Height 10cm. Gritty soil in full sun.
Sempervivum	"Reinhard"	An evergreen perennial with vivid emerald green rosettes with maroon-red tips. Height 10cm. Gritty soil in full sun.
Sempervivum	"Rheingold"	Green rosettes with red tips. Height 8cm. Well-drained soil in sun.
Sempervivum	"Rosie"	Evergreen perennial. Spreads by short stolons. Pale green rosettes flushed dull pink. Height 10cm. Gritty soil in full sun.
Sempervivum	"Rubin"	Evergreen perennial. Spreads by short stolons. Rosettes are a deep burgundy red with hairs

		on the edges, giving a hazy effect. Flowering rosettes die, but offsets remain. Sun in gritty soil. Good trough plant.
Sempervivum	"Russian River"	Good sized pinky-grey rosettes and pink flowers. Height 8cm. Well-drained gritty soil in sun.
Sempervivum	"Silberspitz"	Dark red rosettes with hairy margins and apical tufts. Flowers are bright pink. Height 8cm. Well-drained soil in sun.
Sempervivum	"Silver Jubilee"	Greyish-green rosettes covered with silvery hairs. Dull pink flowers. Height 10cm. Gritty soil in full sun. Jun.-Jul.
Sempervivum	"Silver Thaw"	Evergreen perennial. Spreads by short stolons. Flowering rosettes die, but offsets remain. Sun in gritty soil. Good trough plant.
Sempervivum	"Sir William Lawrence"	An evergreen perennial that spreads by short stolons. Large rosettes of grey-green leaves tipped red. Height 10cm. Well-drained soil in sun.
Sempervivum	"Skrocki's Beauty"	Evergreen perennial. Spreads by short stolons. Rosettes green leaves with dull red markings. Leaves are fringed with silver hairs. Sun in gritty soil. Good trough plant.
Sempervivum	"Sprite"	An arachnoideum type with small green rosettes flushed heavily at the tips with purple. Height 8cm. Gritty soil in sun
Sempervivum	"Tederheid"	Evergreen perennial. Spreads by short stolons. Flowering rosettes die, but offsets remain. Greyish-green leaves with dull red tips. Sun in gritty soil. Good trough plant.
Sempervivum	"Twilight Blues"	Evergreen perennial. Spreads by short stolons. Medium to large rosettes of olive-green shaded lavender tipped purple. Height 10cm. Gritty soil in full sun.
Sempervivum	"Wollcott's Var."	An evergreen succulent alpine with large rosettes of green and maroon pointed leaves. Height

10cm. Gritty soil in full sun.

Sempervivum	arachnoideum		A rosette-forming alpine with succulent rosettes of mid-green to red leaves, cobwebbed with fine white hairs. Produces reddish pink flowers. Height 8cm. Well-drained soil in sun. Jun.-Aug.
Sempervivum	arachnoideum	"Rubrum"	A rosette-forming alpine with succulent rosettes of mid-green leaves, tipped red and cobwebbed with dense silver-white hairs. Produces red flowers. Height 5cm. Well-drained soil in sun. Jun.-Aug.
Sempervivum	arachnoideum ssp. tomentosum		A rosette-forming alpine with succulent rosettes of mid-green to red leaves, cobwebbed with dense silver-white hairs. Produces red flowers. Height 8cm. Well-drained soil in sun. Jun.-Aug.
Sempervivum	arachnoideum var. bryoides		A rosette-forming alpine with tiny, succulent rosettes of mid-green leaves, cobwebbed with dense silver-white hairs. Produces red flowers. Height 5cm. Well-drained soil in sun. Jun.-Aug.
Sempervivum	arachnoideum x pittonii		An alpine with succulent, compact greenish-purple rosettes covered in fine hairs. Height 8cm. Well-drained soil in sun.
Sempervivum	ballsii		An evergreen perennial with small, succulent rosettes of smooth green leaves, often tinged pink in summer. Fleshy stems produce red flowers. Height 10cm. Well-drained soil in sun.
Sempervivum	calcareum	"Mrs. Giuseppi"	An alpine with succulent, compact rosettes of grey-green leaves with red tips. Height 8cm. Well-drained soil in sun. Pink/red flowers Jun.-Aug.
Sempervivum	ciliosum var. borisii		Succulent rounded rosettes of pale grey-green leaves. Produces greenish yellow

Sempervivum	erythraeum		flowers in summer. Height 8cm. Gritty soil in full sun. An evergreen perennial with succulent rosettes of velvety grey-green leaves, often tinged pink. Fleshy stems produce red flowers. Height 10cm. Well-drained soil in sun.
Sempervivum	marmoreum		An alpine with succulent rosettes of green leaves with small red tips. Flowers should be red with white margins. Height 10cm. Well-drained poor soil in sun.
Sempervivum	montanum var. braunii		An alpine with succulent rosettes of green leaves with small red tips. Pink flowers with darker centres. Height 10cm. Well-drained poor soil in sun
Sempervivum	pittonii		A species with small green rosettes tipped chocolate brown. Yellow flowers. Height 10cm. Well-drained soil in sun.
Sempervivum	ruthenicum		an alpine species with medium to large rosettes of upright pale green leaves with the outer leaves being red-brown. Flowers are yellow. Height 10cm. Gritty soil in sun.
Sempervivum	tectorum		A rosette-forming alpine with succulent rosettes of blue-green pointed leaves, often suffused red and eventually purple-red flowers. Height 15cm. Well-drained soil in sun.
Sempervivum	tectorum	"Nigrum"	Rosettes of glaucous leaves with red tips. Pale pink to dull purple flowers. Height 8cm. Well-drained soil in sun.
Serratula	seoanei		A small herbaceous perennial with deep green serrated and pinnate leaves and branched heads of fluffy pink flowers. Height 20cm. Moist well-drained soil in sun. Sept.-Oct.
Sidalcea		"Elsie Heugh"	An erect perennial with rounded rich green leaves.

			Spikes of satin-pink flowers with fringed petals. Height 80cm. Moist well-drained soil in sun. Jun.-Jul.
Sidalcea		"Loveliness"	A compact erect perennial with rounded rich green leaves and spikes of shell pink flowers. Height 75cm. Moist well-drained soil in sun. Jun.-Jul.
Sidalcea		"Mrs. Borrodaile"	An erect perennial with rounded rich green leaves and spikes of deep, dusky crimson-purple flowers. Height 90cm. Moist well-drained soil in sun. Jun.-Jul.
Sidalcea		"William Smith"	An erect perennial with rounded rich green leaves and spikes of deep rose-pink flowers. Height 90cm. Moist well-drained soil in sun. Jun.-Jul.
Sidalcea		"Wine Red"	An erect perennial with rounded rich green leaves and spikes of cup-shaped deep wine-red flowers. Height 75-90cm. Moist well-drained soil in sun. Jun.-Jul.
Sidalcea	candida		An erect perennial with rounded rich green leaves and spikes of cream or white flowers. Height 60-90cm. July to August.
Silene	acaulis	"Frances"	Forms hummocks of tight yellow-green leaves with small pink almost sessile flowers. Height 7cm. Well-drained soil in sun. Apr.-Jun.
Silene	acaulis	"Francis Copeland"	Forms hummocks of tight yellow leaves with small pale pink almost sessile flowers. Height 7cm. Well-drained soil in sun. Apr.-Jun.
Silene	acaulis	"Mt. Snowden"	A dwarf moss-like cushion of narrow, bright green leaves. Almost stemless, pink flowers. Height 3cm. Well-drained soil in sun. Ap.-Jun.
Silene	acaulis	"Pedunculata"	A dwarf moss-like hummock of narrow, bright green leaves. Almost stemless, deep

pink flowers. Height 5cm.
Well-drained soil in sun or part shade. Apr.-Jun.

Silene	delavayi		A clump forming perennial with dark green linear leaves and masses of small lilac-purple flowers. Height 25cm. Moist well-drained soil in sun or part shade. May-Sep.
Silene	dioica	"Firefly"	A clump-forming perennial with mounds of dark green leaves and clusters of double magenta flowers. Height 75cm. Well-drained soil in sun or part shade. May to July.
Silene	keiskei	"Alba"	Seed raised, this produces a tufted evergreen alpine with mid-green lanceolate leaves and white flowers. Height 15cm. Well-drained soil in sun. Jun.-Jul.
Silene	keiskei var. minor		A small tufted evergreen alpine with small dark green leaves and deep rose-pink flowers. Height 10cm. Well-drained soil in sun. Jun.-Jul.
Silene	uniflora	"Druett's Variegated"	A mat-forming alpine with green and cream variegated leaves. Single white flowers. Height 5cm. Well-drained soil in sun. Jun.-Aug.
Sisyrrinchium		"Blue Ice"	A clump-forming perennial with fans of green leaves. Upright stems of pretty sky-blue flowers. Height 10cm. Well-drained soil in sun. Jun.-Aug. Protect from winter wet
Sisyrrinchium		"Californian Skies"	A clump-forming perennial with narrow dark green leaves. Upright stems of pretty star-shaped deep blue flowers with violet stripes. Height 15cm. Well-drained soil in sun. Jun.-Aug.
Sisyrrinchium		"Devon Skies"	A clump-forming perennial with fans of green leaves. Upright stems of deep sky-blue flowers. Height 10cm. Well-drained soil in sun. Jun.-Aug. Protect from winter wet

Sisyrrinchium		"E.K. Balls"	A clump-forming perennial with fanned out green leaves. Upright stems of pretty dark mauve flowers with a yellow eye. Height 10cm. Well-drained soil in sun. Jun.-Aug. Protect from winter wet.
Sisyrrinchium		"Sapphire"	A strong growing variety with emerald-green foliage and sapphire-blue flowers with a yellow eye. Well-drained soil in sun or part shade. Apr.-Jun.
Sisyrrinchium	idahoense		A clump-forming perennial with narrow dark green leaves. Upright stems of pretty star-shaped deep blue flowers with violet stripes and a yellow throat. Height 10-15cm. Well-drained soil in sun. Jun.-Aug.
Sisyrrinchium	idahoense	"Album"	A clump-forming perennial with narrow dark green leaves. Upright stems of pretty star-shaped white flowers with a yellow throat. Height 10-15cm. Well-drained soil in sun. Jun.-Aug.
Sisyrrinchium	idahoense	"Rocky Point"	Slightly taller and later flowering than the type, with purple-blue flowers. Height 15-20cm. Well-drained soil in sun. Jun.-Aug.
Sisyrrinchium	macrocarpon		A clump-forming alpine with narrow dark green leaves. Upright stems of pretty, large rich golden yellow flowers with a maroon base. Height 15cm. Jun.-Aug.
Skimmia	japonica	"Rubella"	A male evergreen shrub with shiny green leaves, margined red. Fragrant white flowers open from dark red buds in spring. Height 6m. Spread 6m. Moist well-drained soil in part shade. Apr.-May.
Skimmia	japonica	"Veitchii"	A female evergreen shrub with shiny dark green leaves. Fragrant white flowers open from red buds in spring followed by red fruit. Height 1.5m. Spread 1.5m. Moist

well-drained soil in part shade.
Flowers from April to May.
Fruits from June. Probably not
ha

Smilacina	racemosa		A clump-forming perennial with veined mid-green leaves. Plume-like creamy white flowers in spring followed by red berries. Height 90cm. Moist well-drained site in shade. Apr.-May.
Solanum	crispum	"Glasnevin"	A scrambling climber with dark green leaves and fragrant clusters of deep purple-blue flowers, followed by yellowish white fruits. Height 6m. Moist well-drained soil in sun. or part shade. Flowers from June to August.
Solanum	jasminoides	"Album"	A scrambling climber with dark green leaves. Fragrant clusters of white flowers with yellow centres, followed by black fruits. Height 6m. Moist well-drained soil in sun. Flowers from June to September. Needs a sheltered site.
Soldanella		"Spring Symphony"	A <i>S. carpatica</i> x <i>S. pusilla</i> cross with rounded dark green leaves. Bell-shaped bluish-purple flowers with fringed petals. Height 10-20cm. Moist well-drained soil in part shade. Mar.-Apr.
Soldanella	alpina		Pretty funnel-shaped violet-blue flowers, with fringed petals in early spring. Height 8-12cm. Part shade in moist well-drained soil.
Soldanella	carpatica		Rounded dark green leaves. Bell-shaped blue flowers with fringed petals. Height 12cm. Moist well-drained soil in part shade. Mar.-Apr.
Soldanella	carpatica	hybrid	Rounded dark green leaves. Bell-shaped blue flowers with fringed petals. Height 8-12cm. Moist well-

			drained soil in part shade. Mar.-Apr.
Soldanella	cyanaster		Rounded dark green leaves. Bell-shaped deep lilac flowers with fringed petals. Height 12cm. Moist well-drained soil in part shade. Mar.-Apr.
Soldanella	montana		Leathery, rounded cordate dull green leaves with pretty funnel-shaped violet-blue flowers with fringed petals. Height 10cm. Part shade in peaty soil. Mar.-Apr.
Soldanella	pindicola		Leathery, rounded dull green leaves with pretty funnel-shaped rose-lilac flowers with fringed petals. Height 10cm. Part shade. Mar.-Apr.
Soldanella	pusilla		Rounded shiny green leaves. Bell-shaped flowers with fringed petals, pink with a hint of purple. Height 12cm. Moist well-drained peaty soil in part shade. Mar.-Apr.
Soldanella	villosa		A vigorous species with rounded mid-green leaves. Pretty nodding, funnel-shaped violet, flowers with fringed petals. Height 20cm. Moist well-drained soil in part shade. Mar.-Apr.
Solidago	cutleri		A dense tufted alpine with long green leaves and sprays of golden yellow flowerheads. Height 15-25cm. Well-drained soil in sun. Sept.-Oct.
Solidago	minutissima		Clumps of small, glossy, dark green leaves and almost stemless tiny yellow daisy-like flowers. Height 8cm. Moist well-drained soil in part shade. Jul.-Aug.
Sorbaria	sorbifolia	"Sem"	A dwarf upright thicket-forming deciduous shrub with deeply divided green leaves bronze when young. Conical clusters of white flowers. Height 1m. Spread 1.5m. Moist well-drained soil in sun or part

			shade.. Flowers from July to August. Prune in spring to k
Sorbus	cashmiriana		A spreading tree with divided dark green leaves. Clusters of white or pink flowers in late spring are followed by white berries. Height 8m. Spread 7m. Moist well-drained soil in sun or part shade. Flowers from April to May.
Sorbus	reducta		A thicket-forming shrub with glossy dark green leaves, turning red and purple in autumn. Clusters of white flowers from April to May are followed by pink berries in July. Height 1.2m. Well-drained soil in sun or shade.
Spiranthes	cernua f. odorata	"Chadd's Ford"	A hardy orchid with spikes of heavily scented white flowers. Height 45cm. Moist well-drained soil in part shade. Aug.-Nov.
Stachyurus	praecox		An open spreading deciduous shrub with arching red-purple stems. Pretty bell-shaped, pendent racemes of pale yellow-green flowers on bare stems. Large heart shaped leaves. Height 2-4m. Moist well-drained soil in sun or part shade. February to March.
Stachyurus	praecox	"Joy Forever"	A deciduous shrub, the grey-green leaves having an irregular golden margin. Beads of many primrose bell-shaped flowers clothe the bear stems in early spring. Height 2.5m. Moist well-drained soil in sun or part shade.
Stachyurus	praecox	"Rubriflora"	An open spreading deciduous shrub with arching red-purple stems. From red buds come pretty bell-shaped, pendent racemes of pale yellow-green flowers, flushed red on bare stems. Large heart shaped leaves. Height 2-4m. Moist well-drained soil in sun or part

Sternbergia	<i>lutea</i>		A bulbous perennial with goblet-shaped deep yellow flowers at the same time as the strap-like deep green leaves. Height 15cm. Well-drained soil in sun. Sept.-Oct.
Stewartia	<i>monadelphica</i>		A large shrub or small tree with beautiful peeling bark. Single white camellia-like flowers with dark anthers in mid Summer followed by leaves turning yellow and red in Autumn. Height 3-4m. in 10 yrs. Sunny sheltered site in fertile, moist but well-drained
Stewartia	<i>pseudocamellia</i>		Deciduous tree, eventually to 40ft. Beautiful peeling bark. Single white camellia-like flowers in mid Summer followed by leaves turning yellow and red in Autumn. Sunny sheltered site in fertile, moist but well-drained neutral to acid soil.
Stipa	<i>gigantea</i>		An evergreen grass with narrow green leaves. Large open panicles of large golden spikelets in late spring changing to straw-colour. Height 1.8m. Well-drained soil in sun. May-Jun.
Styrax	<i>formosanus</i> var. <i>formosanus</i>		A deciduous large shrub or small tree. Brown new growths turning into deep green leaves. Hanging racemes of scented white flowers. Height and spread 3m. Moist well-drained acid soil in sun or part shade. Flowers from May until June.
Styrax	<i>japonicus</i>	"Pink Chimes"	A floriferous form of this graceful spreading tree with glossy green leaves, turning yellow or red in autumn. Pretty bell-shaped pale pink flowers produced along the undersides of the branches from early to mid-summer. Height and spread after 10 years 3-5
Symphytum		"Goldsmith"	A spreading perennial with evergreen leaves variegated

gold and cream. Clusters of pale blue flowers from mid to late spring. Height 30cm. Most soils, sun or shade.

Symphytum		"Rubrum"	A moderately spreading perennial with downy green leaves. Clusters of dark red flowers from early to mid summer. Height 50cm. Spread 45cm. Flower colour Red. Flowers from June to July.
Symphytum	x uplandicum	"Variegatum"	An erect perennial with greyish green leaves with bold cream margins and drooping clusters of lilac-pink flowers. Height 90cm. Moist well-drained soil in sun or part shade. May-Aug. Requires rich soil to retain variegation.
Synthyris	missurica var. stellata		Evergreen perennial with rounded glossy toothed leaves, bearing dense spikes of violet blue flowers in early spring. Height 25cm. Moist soil in part shade.
Synthyris	pinnatifida var. laciniata		Short spikes of violet blue flowers with protruding stamens arise from tufts of glabrous toothed green leaves. Height 10-20cm. Moist well-drained soil in part shade. Apr.-May.
Syringa		"Josee"	A spreading deciduous shrub with deep lilac coloured panicles of flowers. Height 1.8m. Spread 1.5m. Well-drained soil in full sun. Prune after flowering.
Syringa	josikaea		A deciduous shrub with long glossy green leaves, paler beneath and upright panicles of fragrant violet-mauve flowers during June. Height 4m. Well-drained soil in full sun. Prune after flowering.
Syringa	meyeri	"Palabin"	A compact rounded deciduous shrub with oval leaves and dense clusters of fragrant lavender-pink flowers. Height 1.5m. Spread 1.5m. Moist

			well-drained soil in sun. May to June..
