Weigela	middendorffiana		An upright shrub with bright green leaves and bell-shaped, pale yellow flowers, marked orange or red in the throat. Height 1.5m. Spread 1.5m. Flowers from April to May. Well-drained soil in part shade.
Weldenia	candida		Strap like leaves with white three-petaled flowers. Height 15cm. Gritty soil in sun. Probably best grown in pots. Keep dry in winter. May-Sep.

Wisteria		"Caroline"	A twining, deciduous climber with pendent racemes of deep purple-blue pea-like flowers, often before the pinnate leaves. Height 9m. Moist well-drained soil in sun. May to June. Can bloom again in late summer.
Wisteria		"Lavender Lace"	A twining, deciduous climber with pendent racemes of bicoloured blue and white flowers, often before the pinnate leaves. Height 9m. Moist well-drained soil in sun. May to June. Can bloom again in late summer.
Wisteria	floribunda	"Alba"	A twining climber with pendent clusters of fragrant, white pea-like flowers often before the leaves. Height 9m. Well-drained soil in sun or part shade. Flowers from May to June.
Wisteria	floribunda	"Domino"	A twining, deciduous climber with pendent racemes of lilac-blue flowers, becoming light blue, often appearing before the pinnate leaves. Height 9m. Moist well-drained soil in sun. May to June. Can bloom again in late summer.
Wisteria	floribunda	"Harlequin"	A twining, deciduous climber with pendent racemes of dark purple flowers with standards of pale mauve with a small yellow blotch, often before the pinnate leaves. Height 9m. Moist well-drained soil in sun. May to June. Can bloom again in late summer.
Wisteria	floribunda	"Multijuga"	A twining climber with pendent clusters of fragrant, lilac-blue pea-like flowers that can reach up to 1m. long. Height 9m. Moist well-drained soil in sun or part shade. Flowers from June to July.
Wisteria	floribunda	"Rosea"	A twining, deciduous climber with long, pendent racemes of pale rose flowers tipped purple, often before the pinnate leaves. Height 9m. Moist well-drained soil in sun. May to June. Can bloom again in late summer.
Wisteria	sinensis	"Amethyst"	A twining climber with many pendent clusters of fragrant, bright violet to deep purple pea-like flowers. New growth has a strong bronze tinge. Height 9m. Moist well-drained soil in sun or part shade. Flowers from May to June.
Wisteria	sinensis	"Black Dragon"	A twining climber with many pendent clusters of fragrant, double dark purple pea-like flowers. Height 9m. Moist well-drained

soil in sun or part shade. Flowers from May to June.

x Heucherella		"Burnished Bronze"	A clump forming evergreen perennial with large, cut dark bronze glossy foliage and long spikes of pale pink flowers. Height 35cm. Most soils in sun or shade.
x Heucherella		"Golden Zebra"	Mounds of large greenish yellow leaves, ageing to golden yellow with a burgundy-red central blotch. heads of foamy white flowers. Height 35cm. Well-drained soil in part shade.
x Heucherella		"Kimono"	Lovely palmate leaves of purple with silver and green shades. Flowers are a metallic pink colour. Height 40cm. Tolerates most soil conditions. Apr.-Sep.
x Heucherella		"Stoplight"	Mounds of large bright yellow leaves with a burgundy-red central blotch. heads of foamy white flowers. Height 45cm. Well-drained soil in part shade.
x Heucherella		"Sweet Tea"	Mounds of large red-orange leaves with a burgundy-red central blotch and heads of foamy white flowers. Colours darken in summer. Height 45cm. Well-drained soil in part shade.
x Heucherella		"Tapestry"	Wonderful incised and scalloped leaves, blue-green with a large dark purple-black centre, and stems of warm pink fluffy flowers. Height 30-40cm. Moist well-drained soil in sun or part shade. Apr.-May.
x Phylliopsis	hillieri	"Pinocchio"	An evergreen dwarf shrub with glossy dark green leaves and clusters of bell-shaped purple-red flowers. Height 20cm. Moist acid soil in part shade. April to May.
x Sinocalycanthus	raulstonii	"Hartlage Wine"	A large deciduous shrub with glossy green elliptic leaves that turn yellow in Autumn. Large camellia-like flowers of a rich maroon/ wine-red colour. Height 3-4m. Spread 2-3m. Moist well-drained soil in sun or part shade. Flowers from July to August.
x Solidaster	luteus		A clump forming perennial with upright stems of lanceolate mid-green leaves

carrying branched heads of small yellow daisy flowers. Height 60cm. Moist well-drained soil in sun. Jul.-Aug.

Xanthoceras	sorbifolium		A large shrub or small tree with pinnate leaves, having sharply toothed leaflets. Erect panicles of white flowers with a carmine eye are produced on old wood. Height 4m. after 10yrs. Moist well-drained soil in sun or part shade. Flowers in May.
--------------------	-------------	--	--

Ypsilandra	thibetica		Rosettes of lanceolate, pale green, evergreen leaves, with central stems of pale lilac-white downward facing flowers with blue stamens. Height 20-35cm. moist soil in part shade. Mar.-May.
-------------------	-----------	--	---

Zauschneria	californica	"Dublin"	A woody-based perennial with hairy, grey-green leaves and tubular, bright red flowers. Height 25cm. Well-drained soil in sun. Some protection in winter. Jul.-Oct.
--------------------	-------------	----------	--

Zauschneria	californica ssp. garrettii		Compact dwarf shrub with greyish-green hairy leaves and orange-red tubular flowers. Height 30cm. Well-drained soil in sun. Jul.-Sep. Prune in spring.
--------------------	-------------------------------	--	---

Zauschneria	californica ssp. latifolia		Compact dwarf shrub with silvery-green hairy leaves and scarlet-red tubular flowers. Height 30cm. Well-drained soil in sun. Jul.-Sep. Prune in spring.
--------------------	-------------------------------	--	--

Zenobia	pulverulenta		A spreading semi-evergreen shrub with arching branches of glossy, blue-green leaves and upright spikes of pendent, bell-shaped, scented white flowers. Height 2m. Spread 1.5m. Moist well-drained acid soil in sun or part shade. Flowers from June to July. Pr
----------------	--------------	--	---

Zenobia	pulverulenta	"Blue Skies"	A spreading semi-evergreen shrub with arching branches of glossy, glaucous leaves, particularly blue when young and upright spikes of pendent, bell-shaped, scented white flowers. Height 1.5m. Spread 1m. Moist well-drained acid soil in sun or part shade.
----------------	--------------	--------------	---

Zephyranthes	candida		A bulbous perennial with thin green leaves and a succession of pure white flowers. Height 15-
---------------------	---------	--	---

20cm. Well-drained gritty soil in sun. Jun.-Sept.

Zephyranthes minima

Grass-like foliage and tiny white flowers with a pink-red reverse. Height 8cm. Well-drained soil in sun. Best in Alpine House. Aug.-Oct.
